Grain Growers! Build the Bishopric Way

If you build and renovate with Bishopric products, your new buildings and improvements, made this year, will cost you no more than to build in the old way would have cost you in 1914. There's a clear saving in both labor and materials.

Residence Built with Bishopric Products

Bishopric Stucco Board is the ideal material for Barns, Stables, Poultry Houses, and Grain Storage buildings, as well as for exteriors and interiors of dwellings. It makes warmer, dryer buildings than you can possibly get with ordinary boards.

Bishopric Stucco Board is made of asphalt mastic, reinforced with kiln-dried laths. This gives a surface absolutely proof against wind and dampness, rats and vermin.

It costs less, gives better service, and is so much easier to put up.

BISHOPRIC STUCCO BOARD

Write for our booklet, describing it in detail, with many illustrations showing Bishopric Products in actual use.
