RESULTS I

The management of the Canadian Gold Fields Syndicate, limited, now have over 150 feet of underground development to their credit in the rich Sunset No. 2. From the beginning there has been no "let up" in the exploration and development of this fine property. The work is to be pushed more vigorously, if possible, until the Sunset is a regular producer of pay ore in quantity. With pay ore in quantity come increased share values and dividends. As an investment therefore, the fully-paid and absolutely non-assessable shares of the Canadian Gold Fields syndicate, limited, at TEN CENTS per share appeal most forcibly to every intelligent investor.
