Roy Kerr,

When the dough is flat, sour, heavy, will not rise,-when the bread is soggy, tasteless, indigestible-then you have cheap and inferior flour.

You may use pure fresh yeast, faithfully adhere to the old-time successful bread making traditions, the methods usually successful-but the @ baking turns out badly-simply because you have not used the right kind of flour.

Royal Household Flour is purified and sterilized by electricity, it is therefore uniformly pure and wholesome.

And because it is thoroughly purified it will yield a sweet, wholesome, light sponge that will bake into flaky, deliciously flavored, nourishing bread or pastry.

It is really the only absolutely pure flour you can get.

this class. To live in quarters the size of an or-dinary dry goods box is not the life that the everydey sallor cares to essay. To endure such life for hours at a stretch without sleep or food, and to stand exposed in all climates—such is life aboard a torpedo craft for officers and men alike. There is no discrimina-tion; that is why one sees beardless faces and slender figures behind the conning towers when these long, three and four-stacked flyers run into port for coal and water at frequent intervals.
