## ERRONEOUS BELIEFS.

BOME QDD NOTIONS THAT ARE FIXED IN MANY MINDS.

Popular Ignorance as to Law Is Everyday Occurrences - Cashiers' Mistakes In Banks-The Finding of Dead Bodies-Sunday Contracts.

It is an American predilection to believe the outre and freakish stories that are based solely on hearsay testimony and to reject often the commonplace matter of fact. A list of the cheerful lies that are commonly believed would fill a volume. Only a few of them are given below.

How often have you been inflicted with the story of the man who was overpaid when cashing a check at the bank and the cashier telling him that no mistakes would be corrected after the customer left the window? Ac cording to the story, the cashier laid down the mandate before the cashier knew the mistake was in his favor. It makes an excellent yarn, but diligent search discloses that it never had any foundation in fact. Banks have no such rule. If a customer is underpaid or overpaid the mistake will appear when the balance is struck at the end of the day's business, and the error will be cheerfully rectified. But the majority of the public believe the ficti-tious story of "how the fellow got the best of the bank" simply because it is a good story and they like to believe it. Probably the most common error on the part of the public is the belief that

when a dead body is found no one has a right to touch or move the remains "until the coroner comes." There never was any such law, is not now and probably never will be. The citizen who is of an inquiring turn of mind has a perfect right to examine the dead bodies he runs across in the course of his travels, to move the remains and even search the pockets of the de-ceased, provided, of course, that his motives are honest. That is all that is

There is also a prevalent belief that a note signed or contract entered into on Sunday is void and that either party can plead the fact of the sacred day to get out of a bad bargain. This is not true. If a man enters into a contract or signs a note on Sunday he is legally bound and can have no defense that he would not have if the transaction had occurred in the middle of the week.

"I had my back against my own house when I struck this man," says the defendant in police court. He believes that his proximity to his castle gives him more rights than he would have if he were in the street. This belief has been the cause of much cantankerous litigation, and it has ever resulted in the ruling that a man has a right to defend himself in a reasonable manner if he is attacked, whatever may be his geographical position, and the incidental contiguity of his home "cuts no ice" in the case.

The public has great confidence in the magic number three, and without any reasonable basis for the belief. It is commonly believed that if a drowning person sinks for the third time he is gone for good and all. The facts contradict this. Many persons die in the first sinking, and if one has the strength and vitality to rise to the surface of the water twice it furnishes an excellent presumption that he will be able to do so again. In an eddy or rapidly moving waters people have sunk from sight a half dozen times and lived to tell the experience to their

Then there is the third congestive chill, commonly believed to be fatal. Most people who die from this cause succumb to the first or second attack If a man succeeds in weathering two of them the odds are in favor of his coming out victor in the third. Almost every community possesses a citizen who benets the fact that he has a silver plate in his skull. Surgeons say that very few attempts were ever made at such an operation, and all of them were failures. There does not exist a man who has a silver plate in his skull, although many men honestly believe that they are carrying this species of paraphernalia in their craniums. The bone of the skull cannot live and be healthy in the presence of a foreign body. It is said by surgeons to be a physical impossibility, but this serves in no way to overcome the common

and erroneous belief. The medical fraternity has another false belief to combat in cases of "shingles." This disease consists of a skin eruption, always following affected nerves and commonly appearing on the body. It is a very common belief that if the "shingles" completely surround the body and strike a meeting point the patient will die instantly The belief is untrue.

Considerate.

After the tea things had been cleared away the young wife came over and sat on hubby's knee, put her plump arms about his neck and kissed him half a dozen times.
"Well, what is it now?" he queried.

"A new dress, dear," she answered.
"But don't you know that times are awfully hard just at present?" he que-

"Of course I do," she replied. "That's why I want to give he poor dress-maker something to do."

No Repentance. at leisure, didn't she?"
"She hasn't repented any that I know
of."

"But she is divorced?"
"Yes. But she gets \$200 a month alimony."

He that will keep a monkey should pay for the glasses he breaks.—Solden.

Very small and as easy

CURE SICK HEADACHE.

VEGETABLE CATERPILLAR. A Curious Combination of Animal and Plant Life.

Vegetable caterpillar is the name given to a fungus-Cordyceps robertsiifound in New Zealand. It exhibits a curious and mysterious combination of animal and vegetable life and is invariably found associated as a parasite with the bulrush caterpillar. How the spores of the fungus enter the insect, which has never yet been met with as a grub or moth, is not certainly known. Sir Joseph Hooker suggests they get lodged in its neck as it buries itself. At any rate, the fungus springs from the head of the buried insect and gradually absorbs its inside till the whole body becomes full of purely vegetable tissue, though in outward appearance it remains unchanged, head, legs and claws being seen clearly in detail. The pulpy vegetable matter has a nutty flavor and is eaten with relish by pigs and greedily devoured by the Maori wood hen. The fungus, after growing to a height of about six inches, dies and dries up. - London Standard.

Sarcastic. At the sidewalk of one of the ferry houses in New York recently stood a police vehicle, backed against the curb waiting its load. Walking leisurely in the center of the pushing, racing mob from a landing ferryboat was a tramp, all rags, but placid of manner. At his side walked a bluecoat, who led him to the waiting patrol wagon. As the tramp was about to enter he bethought himself, and, standing on the wagon steps, he leaned far out to one side and to the driver he called in the drawling voice of a bored boulevardier, "Home, James!"

## BLOOD WILL TELL.

It takes lots of vitality, nervous force and strength to win a race. Blood must be pure and good.

Without good red blood a man has a weak heart and poor nerves. Thinness of the blood, or anemia, is common in men and young women, and all those who work indoors, who do not get enough good opygen in their lungs, consequently have too many white blood corpuseles.

Keep the nerves nourished, the heart strong, the head cool, the stomach vigorous, the liver active with a tonic which has stood the test of time and has a wide reputation, such as Dr. Pierce's Golden Medical Discovery.

Tonics consisting of large portions of alcohol, iron or cod liver oil, do not bring the desired changes in the blood, because they do not enter the system and are not absorbed into the blood, with the exception of the alcohol, which shrivels up the red blood corpuscles when it does come in contact with them. Therefore do not allow the dealer to insult your intelligence by telling you he has something better than Dr. Pierce's Golden Medical Discovery.

The cost of mailing only. "The People's Common Sense Medical Adviser," sood large pages, is sent free on receipt of thirty-one one-cent stamps, for the paper-covered book, or fifty stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

For constitution, the true, scientific cure is Dr. Pierce's Pleasant Pellets. Mild, harmless.

For constipation, the true, scientific cure is Dr. Pierce's Pleasant Pellets. Mild, harmless, yet sure. No other pill can com-pare with them.

"LITTLE DORRIT."

Dickens' Novel, is Still Living in England. Few people are aware that the ori-

but in her maiden days, when she first became acquainted with Dickens, she was a Miss Mitton. Her father she was a Miss Mitton. Her father lived at Sunbury, some eighteen miles from London, and Dickens was a frequent visitor there. He bestowed the nickname of "Little Dorrit" on Miss Mitton, and in 1855 told her that he was going to write another book which he intended to call "Little Dorrit" and that he should put her in it.

There are several people still living and more or less prominent who have figured in famous novels of the past. "Angela Marsden Messenger," the heroine of the late Sir Walter Besant's most popular story, "All Sorts and

heroine of the late Sir Walter Besant's most popular story, "All Sorts and Conditions of Men," was modeled after the Baroness Burdett-Coutts. The Duke of Rutland, then Lord George Manners, was the "Lord Henry Sidney" of Disraeli's "Coningsby," and the "Duke of Brecon" was Lord John's father, the then Duke of Rutland. Corporal Farmer, a Victoria cross hero still living in London, is the hero of James Grant's novel, "Violet Jermyn."

The Clare family in Mr. Hardy's "Tess" was drawn from that of the was drawn from that of the Moule, vicar of Fordington,

Rev. H. Moule, vicar of Fordington, and the "brilliant brother at Cambridge," who is mentioned, is the present bishop of Durham. It is generally understood that the "Lord Linlithgow" of Mouley Relayers to be a second to the control of the control understood that the "Lord Liniumgow" of Morley Roberts is no other

an novelist quitted Box Hill, his Sur

It generally has been understood that the latter was the case and that the author of "Lorna Doone" relied, in the main, on well founded traditions for his account of the brotherhood in that and other of his romances. Quite recently, however, E. J. Rowle, who published a work on the subject, declared his conviction that the whole of the Doone stories had sprung from Mr. Blackmore's brain. The London Athenaeum has just published a lengthy and detailed statement to the contrary by the Rev. J. Charles Cox, a clergyman of the Exmoor district. During the last few weeks this gentleman has visited every parish in Carhampton Hundred and inquired as to the Doones in every direction, and of a great number of the older Exmoor folk. In the course of his statement

"In every single case I met with "In every single case I met with a more or less indignant surprise that any one who knew the district possibly could doubt as to the reality of a band of Doone robbers infesting the Clare district and as to the stories of them being commonly prevalent years be-fore Mr. Blackmore wrote his novel." Quite an unusual number of houses with literary associations have come with literary associations have come into the market of late, and to these must now be added the "Villa Palmieri," which is supposed to have been the scene of the telling of the talos of Boccaccio's, "becameron." The mansion which the peasants call the "Villa Boccaccio," stands near Florence and belongs to the Dowager Lady Crawford, who is an English peeress. It is an old Medician villa of considerable architectural magnificence, and was architectural magnificence, and was bought in 1874 by the late Lord Crawford, who spent a large sum in modernizing it. Queen Victoria resided in it during two of her visits to Florence.

The place is to be sold next month, Justin McCarthy has finished the two concluding volumes of his "History of Our Own Times," and which will appear shortly. They cover the
