We notice by a recent interview with head of the Nevisianut and other vivers vince an eff or should be made by our cold winter reaches us. The considera-tion of this brings us to the fact that here in Bathurst at the present time, our ready sale for all sorts of produce, hay, for the purpose of improving the roads young people are thrown very much on oate, poultry, butter, etc., in Bathurst at leading to that portion of the country during the winter. Some few years ago and by the number of traders seen in We are advised that splendid traces of farming lands lie between Bathurst and when the writer was younger, we had a town during the past week we should say the head of the Pabineau stream where a curling rink and also a skating rin and business must be fairly brisk. We notice fine settlement might be opened it a good the latter was always crowded with our by a recent paper that during the past road was provided, such a road would lead young men and maidens while to the year a great quantity of fowl has been also to the hunting grounds and if proper ment, now that this source of revenue is active, much might be accomplished for the future of the county, which would bear fruit in keeping many of our young men at home, instead of having them seck homes elsewhere.

Speaking of protection and such matters we are informed by a gentleman belonging to Bathurst that when crossing the main Nepisiquit bridge a few days ago he noticed what apppeared to be a net set at a short distance above the bridge. Coming to town he informed the fishery overseer who on proceeding to the spot found the net and confiscated it. Surely this is a strange thing, where are our fishery officers, and what was a net doing there at this season of the year.? If it is left to a casual observer to find out such a flagrant violation of the law, fishery officers are not much use.

The death of Mrs. Dr. Histings dughter of the late A. R.
