Ir has been noticed as a fact, that during the recent terrific thunder-storms the lightning has never done any damage in cities of any considerable size. Undoubtedly the iron, which enters so largely into the construction of cities, in buildings railroads, telegraph lines, etc., dissipates the electric fluid so rapidly and completely as it approaches the earth, that it is rendered harmless.

Out of the most terrific hail-storms ever experienced in the Ottawa Valley, visited Buckingham village about four o'clock on Saturday afternoon. Persons who were present at the time aver that hail the size of hen eggs fell in a regular shower for several minutes. Windows were broken, trees were knocked down, lumber piles were upset, and a considerable amount of damage was done during the time the storm lasted.
