#### Civic Jealousies.

The dispute between the city council and the Western Fair board as to the of the fair buildings is jealousies that occas crop up between different

-jealousies in which no principle is

involved, which are usually over trifling matters, and which benefit nobody, while they sometimes result injuriously to the city. In this particular case it was little more than a tempest in a teapot. The city owns the fair buildings, but hands them to the fair board for the purposes of the fair. The city may be called the landlord, while the fair board is in the position of a tenant. The tenant wants some repairs, and asks the landlord to make them; and the landlord agrees to pay make the repairs-landlord or tenant? It is the right of the landlord to make any repr.rs for which he is going to pay. Jut it is no unusual thing for him to say to the tenant, "You get

the work done, and I will pay for it.'

This was exactly the situation in

the case under consideration. The council passed a resolution to the effect that if the fair board shingled the building at a cost not to exceed \$1,200 the council would pay half. Any one would consider that resolution an authority to the board to go on and do the work up to the limit fixed. The board so thought, and promptly made a contract for less than the sum fixed. But as soon as the contract was let, the mayor discovered that it was an infringement of the rights of the council and raised such a disturbance that the board promptly canceled the contract, and left the matter in the hands of the council. Last night some of the aldermen wanted to amend the of the aldermen wanted to amend the minutes to make the resolution read different from that which was passed.

So the aldermen wanted to amend the by other persons, have a purpose of your own, weigh counsel, but act from your own, weigh counsel, but act from your own best thought.

Yankee Steamer That Gave to do that. But they practically reversed their former action and agreed to put on a wooden shingle roof if the draw out the most profitable informafair board would pay half the cost tion. though the wooden shingles will cost as much as the metal ones the board

We have seen disputes of this kind before, in which the council was apparently jealous of its technical rights We have seen squabbles between the council and the school board, and between the council and other boards. over the expenditure of money-the result only being that more of the taxpayers' hard-earned cash was spent
than otherwise would have been done.

The sult of the taxpayers' hard-earned cash was spent
that the distribution of the taxlutely right—making a mistake in business is like falling down in a foot race,

of all claims.

The sult of the taxlutely right—making a mistake in business is like falling down in a foot race,

of all claims. Because, whichever department establishes its rights in any particular case. the tax-payer has to not only provide the money over which the dispute arises, but has to pay all expenses

accrued in settling the dispute. shows itself on the aldermanic board ments. when there is a question of utilizing cipal affairs. If some of the business take a hand in settling some public indignant because his rights—or rather recall any points you may have forgot-rested by order of the Sultan. his importance—as an alderman has

not been sufficiently recognized. The council is a responsible body, for It is elected by the people to manage their affairs. And the control of public funds must remain in the hands of the aldermen would be only too glad to have the assistance of citizens who are not holding office, but who may be personally interested in the city's affairs to an extent even greater than the average alderman. If tax-payers who are not in office, and are not seeking office, are willing to serve the city. even if they should go so far as to do some of the work which the aldermen are expected to do, who is going to suffer thereby? Certainly not the citizens at large, who are more concerned In seeing municipal business properly managed than in upholding the dignity of the men who happen to have seats

To return to our special case: The city council was willing to spend not more than \$600 in shingling the fair building. What harm could possibly have accrued to the city by allowing the directors of the Western Fair to spend the amount? They are the men who understand the needs of the fair, the conditions of the buildings, the character of improvements that are required. They have the greatest personal interest in the success of the fair. And as tax-payers they have as in doing anything that may be required to put the buildings in proper condition for the exhibition. What has been gained by his worship's interference with the work of the directors, ence with the work of the directors, when the work has been done by the council, and the bills are paid, and the bills are paid, and the whole truth; and the whole truth is an entire in the result of a competition put up by the company. They were entertained by the company. They were entertained by the company for two days at Mondatis good for one industrial country, let us say in a neutral market, is sight-seeing around the city. Mr. Geo. Hamilton Western Ontario manager, was one of the party, and was successful in having five representative qualify from this district, all of the whole truth; and the whole truth whom enjoyed the trip and say they council, and the bills are paid, and the character of the work seen, and the could have in-
