PRICE OF PEARS

Good Supply of Potatoes At Dollar Bushel.

To-day's market was well supplied ernment and American oil interests. Fruit arrived in quantity during the morning, but there was little price chiefly represented by Crucible Steel, General Electric, Reading, Chicago & Steel, General Electric, Reading, Chicago & Steel, Steel, General Electric, Reading, Chicago & Steel, Steel, General Electric, Reading, Chicago & Steel, General E which stiffened materially. Elberta peaches are commencing to come on the market, an indication that the season is slowly drawing to its close. Pears are also plentiful and are a little

There was a good supply of potatoes, which, in a few isolated cases, sold down to \$1 a bushel, but these were not of good quality. For the best the price has not changed since Tuesday. Spring chickens are slightly higher,

Mr. Egelton left London 22 years ago for Chicago and now occupies the responsible position of credit manager for the incoming executive board of the sponsible position of credit manager for the Rothschild Company. He is an nephew of Detective R. C. Egelton.

roubles in England and the fear of City's Borrowing Power Is Nearly Exhausted.

> INCLUDES INVESTMENTS. Revenue Producers Should Not Be Included.

The debenture debt of the City of Lon.

don is to-day stated to be \$10,709,780.17 by City Treasurer Bell, in a special report to the retiring Council on the financial condition of the city. This report shows that all but \$1,309,969.32 of the city's present borrowing power has been exhausted, and was prepared at the suggestion of Ald. J. Cameron Wilson, who is chairman of a special committee appointed to investigate the whole tax-debenture-finance situation in civic departments, and to suggest, possible, a more economical method of raising money for civic expenditures. One outstanding fact of the report i that while barely more than \$1,000,000 stands between the city and its borrowing power limits there are \$2.067.705 charged against the city debt which, financial men hold, should not have been so charged. This amount is made of \$1,231,813.13 of debentures issued on account of the waterworks depart-ment since 1906, which debentures were charged against the city's general debt, although there is no business institution in London, it is said, which is as certain of a definite revenue from year to year, or that exercises so complete monopoly on a commodity of general

City Treasurer Rell takes that position and pointed out: "The waterworks and electrical departments should be made responsible for their debts instead of the people generally. They are revenue producing in the fullest sense of the word. For last year the waterworks department showed a small deficit. But this year rates were raised, without any objection from citizens, to make that deficit good and show a surplus. It is unreasonable that the burden of their

MASONIC LODGES TO BEGIN AUTUMN WORK 10,000

Program of Inter-Masonic Social Activiles Being Arranged.

This week will see a general reopening of Masonic lodges in London after the summer vacation. Practically all of the city's nine blue lodges will hold regular or emergent sessions this week and next, and Capitular, Templar and Scottish Rite lodges will also hold sessions at an early date.

Applications for initiation into the mysteries of the ancient craft are said to be unusually numerous and indicates the influence of Masonry on London

Several of the lodges are planning interesting programs of fall and winter social activities which will bring their this morning and once more the routing members into closer touch with each other. These plans include not the putting on of elaborate "fourth degrees," but social events that will bring out the estimated that from 9,000 to 10,000 chilwives, daughters and other members of dren were enrolled in the city's public Masonic families.
