

known to me, this gall is not yet described from the U. S., and is very similar to those of *A. millefolium* described by Mr. Fr. Loew, Verhdl. Wien. Z. B. Ges., 1878, vol. 28, p. 130, which is to be found in Baron Thuemen Herbar. mycolog. oeconom. Suppl., I., No. 60. Our collection possesses a specimen by Prof. Thomas with the indication of *Tylenchus (Anguillula) millefolii* Loew. At first I believed to see also in Prof. Farlow's specimens, besides the Phytoptas, some *Anguillula*. But the polarised light showed directly that I had mistaken some fragments of the fine white hairs for *Anguillula*; the polarised light would have shown directly the muscular apparatus in the *Anguillula*. It is nevertheless probable that other plants of *Achillea* may contain the *Tylenchus*. I believe that the galls before me may have contained before a Cecidomyia, though the European species is not yet recorded from the U. S. As *Achillea millefolium* is common in the north of the U. S., I desire to draw the attention of Entomologists to this plant. The European literature on the parasites of *A. millefolium* is somewhat large.
