

LISTERINE

The word Listerine assures to the Medical Profession a non-poisonous antiseptic of well proven efficacy; uniform and definite in preparation, and having a wide field of usefulness.

On account of its absolute safety, Listerine is well adapted to internal use and to the treatment of Catarrhal Conditions of the mucus surfaces.

LAMBERT'S LITHIATED HYDRANGEA !

RENAL ALTERATIVE—ANTILITHIC.

The ascertained value of Hydrangea in Calculous Complaints and Abnormal Conditions of the Kidneys, through the earlier reports of Dr. Alce, Horsley, Monkur, Butler and others, and the well-known utility of Lithia in diseases of the uric acid diathesis, at once justified the therapeutic claims of LAMBERT'S LITHIATED HYDRANGEA when first announced to the medical profession, whilst subsequent use and close clinical observation has caused it to be regarded by physicians generally as a very valuable Kidney Alterative and Antilithic agent in the treatment of

Urinary Calculus, Gout, Rheumatism, Cystitis
Diabetes. Hematuria, Bright's Disease,
Albuminuria, and Vesical Irritation Generally.

LAMBERT PHARMACAL CO., ST. LOUIS.

SCOTT'S EMULSION

of cod-liver oil is so well known to physicians, why do we bother you with it?

Because 100 others are bothering you with substitutes for it.

Why are they doing that? Because its virtue has made a great business in it. They want this business.

If their emulsions are better than Scott's, let 'em have it. If theirs are as good as Scott's, let 'em have their full share—we'll waive precedence.

If Scott's is the best, insist on it! Never mind us; consider your patients.

SCOTT & BOWNE,

Toronto, Canada.
