ARGENTINE BEEF NOT COMPETITOR

U. S. Packers Now in Control of Output, It is Alleged.

Canadian Press Despatch. NEW YORK, Sept. 9.—Beef packers of the United States are now in absolute control of the Argentine output of beef, thus destroying the value of Argentine beef as a competitive check on the price of native beef, according to testimony given today at the inquiry into the advance in the price of living necessities before Chief Magistrate Machado.

Jacob Bloch, member of a firm owning several meat markets in this city, asserted that every bit of beef from Argentine must now be bought from the American packers.

As an instance of how this control influenced the price, the witness stated that at one time beef hearts could be bought for 25c each. When the American packers obtained control of the Argentine output, he continued, beef hearts were put into cold storage, thus diminishing the supply, so that today the cost of these hearts is about \$1.5 each.

Dealers at Marcy. The packers have arranged the territory outside New York City so that the small dealers are at their mercy. The witness testified, in a small town incapable of supporting more than one good sized establishment, one packing concern is located, and the butchers are forced to buy from that one packing concern. In large places the business is split up.

asked to explain the cause of the present shortage of beef, the witness said a shortage had existed for thirteen years. In that time, he said, the supply of cattle in this country fell short of the demand by 16,000,000, and the shortage was growing more pronounced.

As remedies for the present conditions, he offered the following suggestions for action by congress: An export duty should be placed on beef, the government lands of the west should be thrown open for grazing, killing of any female calf under five years old, or of any calf weighing less than 150 pounds, should be prohibited, 10 per cent of the income tax should be used for the purpose of raising of cattle; public slaughter houses, like those in England, should be established by the government.

ORDERS FOR STEEL SHOW A DECREASE. NEW YORK, Sept. 9.—Foreign exchange was more active today, storage in a manner that denoted a better inquiry at London. Cables and demand for local supply bills. Hardselling of the rate was ascribed to demands from local banking interests, which will have to send large remittances abroad for dividends by the end of the month.

According to trade authorities the past few weeks have witnessed a marked increase in steel orders. The decline has been pronounced thus far this month, but contrary to expectations, the port trade has not developed fast enough to offset lack of domestic demand.

Newark, N. J., Sept. 9.—The United States Steel Corporation to be issued tomorrow an agreement for the purchase of the preceding month. Because of a holiday, the Chicago grain market suspended operations today, but local quotations remained easier with only nominal market for corn. Other commodity markets reflected more stability.

Crop conditions as a whole appear to have been favored thus far this month judging from the weekly weather report. For the four weeks ending August 12th the Hollinger gold mine yielded 12th gross profits of \$171,975.76. Working costs during the period were \$88,573.27, and the total ore hoisted was 15,391 tons.

The mill ran 96 per cent of the run-ning time and treated 16,456 tons of ore. The average value of ore treated was 15.46 per ton; approximately 15 per cent was 94.4 per cent, and milling costs \$1.18 per ton.

During the four weeks there was expended on plant \$30,546.24. Profits from January 1st to August 12th amounted to \$1,015,451.07, and of this \$720,000 has been paid out in dividends. In his report Manager Robbins says: "During the period ten of the new stamps were started and since then ten percent have been started, so that at the present time six stamps are working upon Hollinger ore."

Work underground continues to show good results. A winze has been started below the 675-foot level and the next level (800-ft.) should be reached by the end of October. The vein upon the 875-foot level has opened out to twenty feet in width and averages 31.90 over that width. This value is about the average of this portion of No. 1 vein upon the upper level."

One More Chance to Say Good-bye to Canada's Continent. Those who took advantage of the special opportunity afforded to visit Valcartier Military Camp last week-end, at a purely nominal cost, have expressed such appreciation of the enterprise shown by the Canadian Northern Railway, in insuring the \$10 excursion, that it has been decided to repeat the service to Valcartier, Quebec, and Hotel Lake St. Joseph, once more.

Intending passengers are advised that the \$10 rate will still be in effect, good Friday and Saturday, Sept. 11 and 12, on regular trains; return limit until Sept. 16, 1914. The same comfortable equipment will be noticeable on the homelike dining car service between Quebec and Valcartier, and the dining and commissary car service at the camp throughout the days.

Passengers are again cautioned that the Canadian Northern Railway is the only through line to the camp, and in order to avoid vexatious delays, the company will be sure to book via the C. N. R. Tickets can be obtained and sleeping car reservations made at the city ticket office, 52 King street, east, Main 5179, or Union station, Adel. 5488.
