

In the past five years I have adjusted a large number of trusses (my own manufacture) by special request for leading members of the medical faculty in the Dominion of Canada, never failing in any case to give satisfaction, which is sufficient proof that the reducing of hernia, fitting and adjusting trusses to retain large scrotal and other unmanageable ruptures of long standing

IS A SPECIALTY

Acquired only by constant practice and a thorough knowledge of the various kinds of rupture.

Therefore the old method of going to your druggist and buying an improper truss, is the cause of so many deaths resulting from strangulated hernia, much suffering and so many large scrotal ruptures, at least 80 per cent. of which could have been cured if properly treated.

My prices are very reasonable considering nature of appliance and trouble I take to ensure perfect satisfaction in every case, viz., \$5 to \$15.

Send for professional certificates and testimonials.

TREATMENT OF CHILDREN A SPECIALTY.
