wired:

Prices broke sharply today, when the absence of frost over Sunday. Stop or orders were caught, assisting the decline. Heavy offerings for the account of a prominent southern speculator, the last of the bulls to unload, carried winter options thru 11 1-4c before support was encountered. This liquidation has not been unexpected. Wednesday's reports on both condition and ginning will confirm bearish estimates. Prices have been sustained so far thru fear of early frost, which speculation has magnified to an extent that offsets all bearish news. The market, ints of live stock for the week ending sets all bearish news. The market, in our opinion, continues in an unmbs, 3600 hogs and 700 calves. The of
