COBALT.

The Rich Silver District Recently Discovered in New Ontario.

The eyes of the world are now turned towards Ontario, where the newest silver discoveries are creating the mad-dest excitement in the whole history of North America.

Cobalt is the centre of a greater mining boom than was Dawson City in its

up, and the budget debate would be advanced a stage. Mr. Ross observed that his colleague from Monck (Harcourt) would not re-turn till Wednesday, and the premier then said the debate would go over. Mr. Whitney intimated that there would be business enough to keep the house in session several weeks yet. Fishery Overseers. Allan Trebilcock, dog fancier, whose kennels are at 177 Simcoe-street, was London, April 2.--Reynold's News paper yesterday, in "Secret History of To-day," said it is quite on the cards that the Prince of Wales may make another Australian voyage, leaving England in September or October next, and returning by way of Japan and Canada. Mr. Ross was informed by Hon. Dr. Reaume that 85 fishery overseers had been dismissed since Feb. 7, 1904, and that the outset there were five of them. Only two are now living. Mrs. Finimark's sense of pity had been aroused by the animals' howling. Ed-win Albertin, finding that two of the

he did, and afterwards the third dog died. The animals he led along the street were described by P. C. Thomp-son as half-starved and half dead. Wm. Mole, M.R.C.V.S., who examined the

two dead dogs in the defendant's yard, found no apparent evidences of dis-temper, the disease the defendant stat-ed they had been suffering from.

A great many Americans, both men and women, are thin, pale and puny, with poor circulation, because they have ill-treated their stomachs by hasty eating below the stomachs by hasty eating or too much eating, by consuming alco-holic beverages, or by too close confine-ment to home, office or factory, and in consequence the stomach must be treated in a natural way before they can rectify their earlier mistakes. The muscles in many such people, in fact in every weary, thin and thin-blooded person, do their work with great difficulty. As a result fatigue comes early, is extreme and lasts fatigue comes early, is extreme and lasts long. The demand for nutritive aid is ahead of the supply. To insure perfect health every tissue, bone, nerve and muscle should take from the blood cermuscle should take from the blood cer-tain materials and return to it certain others. It is necessary to prepare the stomach for the work of taking up from the food what is necessary to make good, rich, red blood. We must go to Nature for the remedy. There were certain roots known to the Indians of this country before the advent of the whites which later came to the knowledge of the settlers and which are now growing rapidly in professional favor for the cure of obstinate stomach and liver troubles. These are found to be safe and yet cer-tain in their cleansing and invigorating

tries.

pal committee.

Audited and certified a full and true statement of the Company's position on December 31st, 1905, as shown by their books. (Signed) EDWARDS, MORGAN & CO.,

March 24th, 1906. Chartered Accountants In moving the adoption of the report the President in part said:

"I desire, first, to express our regret at the absence from the meeting today of the General Manager of the Company, Mr. Potter, and especially so. because of the reason of his absence. It is generally known to the Shareholders that he met with a very serious accident in December last, while in the performance of his duties. He was engaged in the inspection of the new stables which were in the course of erection, when an accident to the hoist resulted in his serious injury. Most of the time since the 8th of December he has been in the hospital. I am glad, however, to be able to say that some two weeks ago he was sufficiently improved to go south, and is rapidly recovering. We expect that within thirty days he will be back at his desk again.

"Our business during 1905 has shown a very substantial increase over that of 1904. More than 2000 have been added in the year to our list of daily customers. The gross business done, the gross profit earned, and the net profit, have all increased very substantially. The net profit of course shows the greatest increase, being over 50 per cent. greater than that of 1904. "The net profit for the year amounts to a little better than 11 per cent. upon the total paid-up Preferred Stock of the Company.

"The Directors have felt it wise to establish a Reserve Account, and have been able, out of the surplus earnings of the year, to carry the respectable sum of \$7,500 to that account.

"The growth in the business has been steady during the year, and con-tinues at this date. The months of January and February, 1906, show an even greater increase over the corresponding months of the year before than did the months of January and February, 1905, over the same months of 1904 There is the best of reason for expecting that the improvement which has been so marked during the last eighteen months will continue."

Mr. A. E. Ames, the Vice-President, seconded the motion for the adoption of the repor

At this stage, the President read a statement from the absent General Manager, in which Mr. Potter said:

"I am sorry to be absent to-day, but hope my absence now will enable me soon to take up my regular duties.

"Our hope expressed at the last annual meeting, that the showing for the year 1905 would be an improvement on 1904, has been more than realized. However, the time when it was necessary to come before you with prognostication has passed, and the history we are now making is taking the place of these, and is much more satisfactory.

"Comparing the business of 1905 with that of 1904, there has been an increase in the total sales of over 12 per cent., an increase in the gross profit of over 19 per cent., and an increase in the net profit of upwards of 60 per

from using the roads after sundown, because of the fright caused to horses "Of the increase in the sales, 70 per cent. occurred in the last six months of the year. by the blinding flashlights. Those who

"For the months of January and February of this year, as compared with the same months last year, the increase is even better than the showing o order. made in those two months of 1905 over 1904. The increase in gross business Bookbinding in all its branches, special for these two months was 19 per cent., while the net profits increased by facilities for leather and cloth edition work. over 50 per cent

"In April, 1905, we had a disastrous fire in our College-street stables Advertising Specialties, cardboard resulting in the loss of forty-one horses and other damage. The small loss not covered by our insurance policies has been written off out of the year's and celluloid signs, hangers, etc. Adver-tising novelties, stamping, embossing. profits.

"This fire and our inability to renew the lease of the Huron-street stables, made it necessary to provide adequate stable facilities at once, and such stables are now about completed on the site of the old College-street stables. The construction is reinforced concrete, prefectly fire proof, 85x112 feet, three storeys high. The doors, roof, stalls and partitions are all of concrete. This building will accommodate our wagons on the first or ground floor, \$6 horses on the second floor, while on the third floor are located the wagon, blacksmith, paint and harness shops, with space for the storage of hay and grain and twenty or thirty extra stalls when needed. This stable is unques tionably the most substantial and up-to-date one in Toronto.

"In view of the figures submitted, I think it is unnecessary for me to make any further comments other than to say that the manager accepts for himself the City Dairy confession, which is, 'We are mortal-we do not profess to have attained perfection-but with our eye on an ever advancing standard, we strive never to do a thing a second time without doing it better.' "

The motion to adopt the report was unanimously carried. Messrs. Edwards, Morgan & Company, were appointed Auditors. Scrutineers having been appointed, the following Directors were elected viz, S. J. Moore, A. E. Ames, C. D. Massey, Geo. Weston, J. L. Spink, J. F McLaughlin, James Carruthers, T. E. Robertson and C. E. Potter.

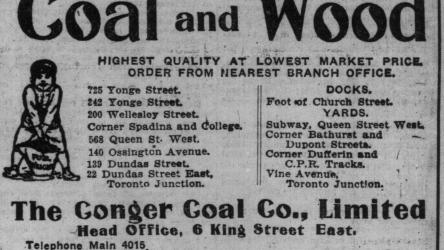

At a subsequent meeting of the Board the following officers were reelected: President, S. J. Moore; Vice-President, A. E. Ames.
