

ARMY BASE IN PROGRESS A WELL-THOUGHT-OUT THAT THOBS TO LIFE

BEHIND BRITISH LINES IN FRANCE, Aug. 8.—(Correspondence of the Associated Press).—As "General Headquarters" is the brain of the army, from which all orders emanate, so "The Base" is in a very large measure the heart, whence the blood circulates to the remotest parts of the body.

A visit to a base shows that it is something far bigger and more comprehensive than a camp. It is a district, its centre is a town of size and importance; a town whose church spire and towers tower high into the air, and whose distance, while its railways and street car lines present a busy scene during all hours of the day and night. There is a large civilian population, carrying on business as usual, though air-raids are frequent, and demolished houses are constant reminders of ever-present danger. The town hall has been badly damaged, and a shot hole from a long-range naval gun can be seen in the tower.

In the streets of the town, people of all five continents jostle each other. There are the French, civilian and military; there are British troops of all ranks and descriptions, even the khaki-clad women of the auxiliary army corps; there are Austrians, Canadians, Americans, Belgians, Chinese, East Indians, and Africans, and many others. The excellent transport drivers, while the Chinese are employed on ordinary labor

of various kinds.

The sight of two Chinamen bathing in a small puddle in a busy square, using their soap by turns and drying themselves on strips of rag with true Oriental unconcern as to all that is going on around them, is becoming familiar. Their camp is some distance from the town, and their nearest neighbors are the inhabitants of a German prisoner-of-war camp, who can be seen daily at work in a leisurely manner on a military railway. Their work in the open has been tanned to an almost African brown, and the slender size of their guard suggests that they are very well content with their lot, and not at all anxious to attempt escape.

In the town itself can be seen guns by the hundred, parked as close as they can possibly be packed. Outside the town are other parks of artillery and weapons and demoralized houses are everywhere—some for men waiting to go up the line, others for those who are employed more or less permanently at the base on transport and other duties.

Hospitals are situated here, too, always on the sites most favorable for fresh air and sunlight. The quarters of the base commandant, the base cashier, the intelligence officer and other important officials are situated in the town itself.

Notice in both French and English are posted everywhere about the place, and military police are on duty at crossroads and other points of importance.

AMIENS-HAM LINE OF RAILWAY OBJECT HAIG'S NEW THRUST

Germans in Soissons-Montdidier Salient May Have To Retire.

PARIS, Aug. 8.—The Franco-British offensive southeast of Amiens has been expected for some time in well-informed quarters. The recent advances in Picardy and Flanders suggested that such a step was in order.

The axis of the manoeuvre in the present attacks seems to the railway from Amiens to Ham, Tergnier and Laon.

The battle may develop great effect upon the struggle going on between the Aisne and the Aisne. Failure to obtain reinforcements to combat the Franco-British armies, it is believed here, may force the German crown prince to retreat behind the Aisne, possibly to the Chemin-des-Dames.

If the offensive from Montdidier to Albert is successful and the army of von Marwitz is forced to retreat, the armies of von Hinder and von Eben, which are located between Montdidier and Soissons, will be in danger of a compulsory retirement.

THREE MEN KILLED AND TWO INJURED WHEN TOWER FALLS

DETROIT, Mich., Aug. 8.—Three men were killed instantly and two injured in the collapse of a marine tower being built for the Union Depot Elevator Company at the foot of Seventeenth street, this afternoon.

The dead: J. J. Boylark, Guy Cross, O. M. Worthington.

A strong wind caused the structure, which was nearing completion, to fall. All the men were millwrights, and were inside the tower when it collapsed.

The tower was 117 feet high, and was to be used in loading and unloading grain. Practically the entire structure was destroyed.

Several other workmen narrowly escaped. One man at work 80 feet up on the tower, saved his life by jumping and catching hold of another structure.

MATTHEW NEWTON WAS GOING DOWN HILL FAST, HE SAYS

Was Just About "All in" When He Began Taking Tanlac—Like New Man Now.

"Talking about things that help people, this Tanlac has done me more good than anything and I can eat what I want, and I feel like a new man."

Matthew Newton, recently, said that he had been in bed for a long time, and that he was losing weight and strength.

"I bought Tanlac," he continued, "because I needed something to get me out of that awful rundown condition which I had been in for six or seven months. I have been on the night shift now for some time, and for the past three months, especially, I haven't felt at all like myself. My appetite was bad, my strength was away and I felt tired and drabby all the time. I would come home in the mornings exhausted and 'all in' and what little sleep I got seemed to do me no good. I actually dreaded to start out to work at night because I felt so worn out and no account, and I seemed to be losing ground every day."

"Tanlac has acted different from any other medicine I have ever tried. It has built me up in every way. My appetite is much better and I can eat what I want and thoroughly enjoy it. That drowsy, mean feeling has left me, and I get home from my work in the mornings feeling like a different man. I was in pretty bad shape and Tanlac has straightened me out where I am now feeling fine. Tanlac has been a fine thing for me, and I can conscientiously recommend it to anyone."

There are thousands of people who complain of being nervous and run-down. They are not at all strong, but feel tired out and good for nothing most of the time. They need something to build them up and throw off the symptoms of this weakened, debilitated condition.

The system, besides being purified by Tanlac, is toned up and invigorated as the medicine, aside from assisting the blood, reinvigorates the constitution, overcoming as it seems to quickly do, nervousness, indigestion, non-assimilation of the food, headache, backache, kidney derangements, general debility and many other ailments that are so common to the thousands of half-sick, depressed men and women.

Tanlac is sold in London by Standard Drug, Limited, and by an established agent in every town.

TORONTO BEING SUED BY CITIZEN, RESULT OF SATURDAY'S RIOT

G. W. V. A. Counsel Wants Supreme Court Judge on Case.

TORONTO, Aug. 8.—Mayor Church today received the first claim against the city made by citizens of damages in consequence of being assaulted by the police during the riot of Saturday night. It is for Messrs. Dewar, Harding, Maw & Wright, on behalf of S. A. Wood, 25 Wood street, against the city of Toronto for damages for being assaulted on Saturday night, when he and his wife were making some purchases for Sunday.

Mayor Church said that the constables who exceeded their authority would be made personally liable, although the city had made a party and defended former actions against the police commission and individual police.

H. H. Dewar, K.C., has been retained by the Great War Veterans' Association to represent the injured in the investigation into the methods employed by the police and the failure to protect property on Friday night.

So many interests are involved, Mr. Dewar thinks, that the matter should be dealt with by a supreme court judge, who will have all the power under the Dominion inquiries act.

ST. THOMAS WILL GO INTO COAL BUSINESS, COUNCIL DECIDES

Bylaw Given Final Reading at Special Session.

ST. THOMAS, Aug. 8.—With the temperature near the hundred mark, St. Thomas city fathers today met in the council chamber of the city hall to consider a bylaw proposed by the council.

After some discussion a bylaw providing for the erection and financing of a fuel yard was passed.

The bylaw has been under consideration for some time, but it is now necessary to obtain the consent of the lieutenant-governor of the province.

STREET IN CHATEAU THIERRY

Scene of fierce hand-to-hand fighting when Franco-American troops ousted the German and prince's soldiers from Chateau-Thierry, a strategic centre on the Marne, the loss of which necessitated the great German retreat in the Soissons-Rheims salient.

75,000,000 POUNDS OF BEEF EXPORTED BY CANADA IN YEAR

225,000,000 Pounds of Pork Sent Abroad.

RESULT OF CONSERVATION Economy Rules of the Food Board Are Bring Big Results.

OTTAWA, Aug. 8.—In issuing an appeal for the continued conservation of wheat, meat, dairy products and sugar, the Canada Food Board says that the country has been successful in saving 75,000,000 pounds of beef, 225,000,000 pounds of pork, and nearly 68 per cent, and a net increase of 225,000,000 pounds in the export of pork, or 67 per cent.

A pre-war importation of 7,000,000 pounds of butter per annum has been changed into an annual export of 4,000,000 pounds, and it is estimated that Canada exported at least 25 to 30 per cent more wheat during the last twelve months than could have been exported had it not been for the efforts for conservation and organization of the country's food resources.

Standardization of flour has resulted in a saving of 20,000 barrels of flour, and with other conservation measures and voluntary saving in homes the total savings has been 2,840,000 barrels of flour, equivalent to 12,000,000 bushels of wheat.

We are saving enough meat to feed half a million soldiers. Restrictions in the use of sugar will save 100,000 tons a year.

"Protegeering has been greatly diminished," says the appeal. "For example, flour sold at \$14.50 per barrel in the spring of 1915, whereas the farmer had received only \$5.25 for wheat used therein. In the spring of 1918 the price had been kept down to \$11 per barrel, while the farmer had received \$5.25 for the wheat used therein."

NEW NURSES' HOME FOR AMASA WOOD Hospital, Probable

Plans Submitted for \$6,500 Structure.

ST. THOMAS, Aug. 8.—The council may at any time authorize the board of governors of the Amasa Wood Hospital to expend approximately \$6,500 in the erection of a new nurses' home for the employees of the Amasa Wood Hospital.

Plans and specifications were submitted to a special meeting of the board of governors, and were approved by the board.

The present quarters are, it is said, very inadequate, and the new building would be a great improvement.

The building would be a great improvement, and the new building would be a great improvement.

PHYSICIANS BELIEVE FEVER EPIDEMIC AT CHATHAM CHECKED

CHATHAM, Aug. 8.—The fever epidemic here is believed by physicians to be checked, as the number of new cases has fallen to a very low figure.

The total number of known cases is now about one hundred and fifty, and while some of the patients are very ill, no deaths have been recorded.

AIRSHIP BAGS SUB NEARLY COMPLETELY "NOT A TRACE" LEFT

Signals With Wireless and Trawlers Do the Rest.

SNARED ON THE BOTTOM

When U-Boat's Crew Shows Preference for Death, All Is Over.

LONDON, July 14.—British Wireless Service.—A sea sport which has arisen out of the war—having German submarines by airship—is described in the Times. The writer's story concludes with telling how the crew of the U-boat apparently preferred death to being captured.

One of the crew of an airship spotted a submarine lying on the bed of the ocean, in fairly shallow water.

The wireless operator, "reside" the account in the Times, "and soon away went the airship, followed far astern by four trawlers, all racing toward the spot where the airship cruised around."

The unsuspecting quarry, "The deeper came up first, of course, and it was not long before, guided by wireless instructions, her trawlers were close upon her."

To greet the unsuspecting U-boat should it bob to the surface, it seemed ages to the impatient crew before the trawlers arrived, but things moved off quickly once they were at the scene of action.

Working in pairs they approached their victim from opposite directions, steaming toward each other. Between each trawler and the U-boat was stretched and allowed to hang in a huge loop that it might traverse the sea-bed. The vessel was crossed each other's tracks immediately above the doomed craft. The "sweep" of either trawler engaged the U-boat and aft simultaneously, and held her in a gigantic circle.

Finished Like a Fish. "Thus far the German boat had shown no signs of alarm, although those with her must have heard the churning of the trawlers' screws. Now she seemed to be aware of the menace that threatened her."

The article goes on to describe the fate of the submarine. "She wriggled and squirmed about in a frantic endeavor to escape, but it was useless. Not a trawler was allowed to slide into the net, and she was held in a huge loop that it might traverse the sea-bed. The vessel was crossed each other's tracks immediately above the doomed craft. The "sweep" of either trawler engaged the U-boat and aft simultaneously, and held her in a gigantic circle."

POLISH POPULATION HAS DECREASED BY OVER FOUR MILLIONS

Unbearable Conditions Have Prevailed in Stricken Country During War.

LONDON, Aug. 8.—Polish newspapers declare that the population of the kingdom has decreased from 14,000,000 to 10,500,000 during the war, according to an Exchange Telegraph dispatch from Warsaw.

The decrease is attributed to the unbearable conditions which have prevailed in the stricken country during the war.

HEAD NURSE LEAVES HOSPITAL: NOBODY KNEW SHE RESIGNED

Governors of Amasa Wood Held Secret Sessions.

ST. THOMAS, Aug. 8.—Ald. Hookway this afternoon at a special meeting of the city council asked Mayor Horton what changes had been made in the nursing staff at Amasa Wood Hospital.

The mayor said that the head nurse had resigned, and that the council had held secret sessions to discuss the matter.

Weekly Theatrical Letter

Specially Written For The Advertiser by Brett Page. (Copyright, 1918.)

NEW YORK, Aug. 3.—Novel from a dramatic point of view, so American and so truly of this moment that it thrills without the artifices of melodrama, is "Friendly Enemies," which is a whole lot more than a play. Theatre to an eager audience, which applauded as much as they perspired.

"Friendly Enemies" is pre-eminently a study in the psychology of the German-American, and although it is described as "a comedy in three acts," it is a comedy in the broadest sense of the word.

One left Germany with his eyes opened. The other still gives his support to the land of his birth. He even contributes to a fund for propaganda in this country. And so his amazement and anger are great when he learns that his son has enlisted in the American army.

The family of the pro-German is not without dissension after a violent scene the boy sails for France. Then comes news that the father has been blown up by the very plotters to whose fund the father contributed.

Now, let us give thought for a moment to the play. One could not imagine two actors better equipped for these particular roles. In the character of Sam Bernard, the loyal American, Louis Mann the pro-German, and in the character of the father, Louis Mann the pro-German, and in the character of the father, Louis Mann the pro-German.

There are other scenes and other numbers and many many more. The play is a study in the psychology of the German-American, and although it is described as "a comedy in three acts," it is a comedy in the broadest sense of the word.

FORD MOTOR PLANT TO RESUME WORK ON MONDAY NEXT

Staff Will Be Reduced 50 Per Cent.

WINDSOR, Aug. 8.—Announcement was made today by the Ford Motor Company that the plant manufacturing will be resumed, beginning next Monday. The output will be reduced to 100 cars per day instead of 250 as heretofore. Scarcity of materials is given as the reason for the cut. Under the new system the working force will be reduced about 50 per cent.
