PURCHASE RINK.

The Preston parks commission has purchased the old rink at the entrance to Speek Park for \$2.720. The building was erected 24 years ago. A few years ago it became too small and the new arena was built. Since then it has been devoted to curling. The parks board proposes to sell the building to make **som* for extensive improvements to the park. It is proposed to erect a handsome memorial gate at the entrance and construct a two-mile automobile drive through the park and new bridle paths. An expenditure of \$25,000 is to be made in park improvements.

Great Fortunes Are Made When Oil Is Struck

All the oil enterprises that are today pouring forth such vast riches were at the start speculative. This is speculative. If this were not speculative—if oil were actually spouting from wells on this property today-you wouldn't have this opportunity-your money wouldn't be needed or accepted.

It has been proven, many times, where one has lost a few dollars in one of these speculations that same person invested in another that

located in known oil bearing centres—It's not acres you want but "locations."

Property "A"—Fisher County—317 acres northeast of Roby. Our leases here are well within the area of new test wells and a gusher here would mean thousands perhaps millions to our stockholders.

Property "B"—Wilbarger County—140 acres in three leases, one of 86 acres and two 30 acres each. Many experienced oil men and eminent geologists believe that the oil sands here are directly connected with the immense producing sands of the wonderful Burkburnett and North West Burkburnett Extension pool districts, and predict that this is a continuation of one or both of these pools with enormous production.

Property "C"—Where We Are Now Drilling—25 acres in Wichita County south of the town of Electra 700 feet from Good wells. The world now knows of this county as being one of the Glant producing counties in which is situated the Burkburnett original development. Everybody interested in oil knows this district to be a phenomenal producer. Will you be one of those who will have a real interest in the way of money returns?

Note—You probably know the close proximity of these properties to the various locations where other wells are now drilling and many spouting oil —where hundreds of wells have been brought in including Gushers shooting up thousands of barrels a day. (See press reports here quoted—You probably see hearing of these brought in any development.

were numered by wells have been brought in including dustress should be thousands of barrels a day. (See press reports here quoted—You probable are hearing of these big giants that go over the derricks frequently now).

Our Holdings in This Rich Field Offer Choice Locations for Many Wells

Our leases are fully paid for and ample funds new in Texas banks for work in hand and our leases offer choice locations for upwards of 60 wells. Our chances of striking a gusher are equal to any and better than most. The Company's land shows all the surface indications of oil that these other fields ever had. Producing wells are being brought in nearer to our properties every day—wells are now drilling to the north, east and south of us. You are invited to 'look up' this Company through any channel you may choose. The officers and directors whose names follow, are all men of integrity and reliability. They are putting their own money, their time and faith in this enterprise with a determination to make it a big success.

Many new locations are being made near our leases—driking rigs are being rapidly moved in and constructed to begin operations at once. The activity in this section is increasing daily and development is being rushed on a large scale. Any day word may reach us of the bringing in of these wells—a gusher—would mean thousands or perhaps millions of dollars in increased values of our leases and the stock of this Company.

These are some of the reasons—without going into geological or technical details—why the officers and directors of the Company have such faith in this property.
