Enhis & stoppant wired to J. L. Mitch-ell: Wheat has been rather nervous to-day. There was an early bulge of ½c. followed by a break of a cent and a final recovery to top price again at the close. There was good buying by the large commission houses, selling coming from the local crowd. The northwest news is still thir-ed, and there was a heavy hallstorm in e South Dakota last night, undoubtedly do-ing considerable damage. The weather up there is rather cooler, and damage re-ports came in to-day. Liverpool came %c lower, which about equaled our de-cline yesterday. Bradstreet's report was buillish, increasing \$75,000 bush. against 5.000,000 increase last year. The world's ly visible is now about 52,000,000 bush. below II last year.

Prices Easier, Especially For Cows -Sheep and Lambs Steady

## - Hogs \$6.65.

Receipts of live stock at the City Mar-ket to day, as reported by the rallways, were 83 car loads, composed of 1285 cattle, 812 hogs, 2017 sheep and lambs and 190 calves.

which were fairly good quality, the bal-ance were of inferior, common and med-

94% 96% 1.01%

them. This latter class of cows were slow of reale. Several of the dealers stated that they were fortunats in having bought a supply of the better classes of butchers' cattle at the Union Yards on Monday. Exporters. There were no loads of exporters re-ported as being on sale, but had there been they would no doubt have sold at about the same prices as on Monday. Butchers. The best loads on the market were bought by George Rowntree for the Har-ris Abattor at 4,75 per cwt; medium to good sold at \$3.75 to \$4,25; cows, \$2.50 to \$4. Feeders and Stockers.

Freeders and Stockers.
 There were several lots of stockers with a very few feeders on sale. Prices were reported at \$2.75 to \$3.25; feeders, \$5.40 to \$3.75 per cwt.
 Milkers and Springers.
 There was a good market for choice milkers and springers that will come in about a month or six weeks. Prices ranged from \$30 to \$60 each, but only one was reported at the latter price. The best cows averaged about \$45 to \$45 each.
 Veal Calves.
 Prices were fairly steady at \$3 to \$6 per cwt.

Wheat has been rather nervous to-day There was an early builge of %c follows to top price again at the close. There were fairly steady at \$ to \$55 nouses, selling coming from the lock of the fair of the fair

Outside of about three loads of cattle,

Ium classes. Trade was slow, with prices tending downwards, especially for butchers' com-mon cows, of which there were a large number that had little flesh or fat on them. This latter class of cows were slow

Receipts of farm produce were 200 bush-els of grain, 20 loads of hay, two loads of straw and several hundred bushels of potatoes.

of straw and several hundred bushels of potatots. Wheat has been rather nervous to-day.

To the American People : If my facts have been grooved together aright, I have made absolutely plain your powerlessness against the System. I have shown how few men

have fashioned out of the honest joists and timbers of your civilization an ingenious machine that enables them to siphon into their own coffers the profit of your labors. I have shown these men becoming billionaires by the manipulation of this process; how one by one they have captured the innermost stronghold of government until the very Constitution which our fathers believed would infailibly bulwark your liberties has become the Gibraltar of special privilege. To-day this American tovernment is the System's, not yours, and the laws devised for your protection are con-

ATAST

strued for the justification and defence of their usurpations. If further proof of your impotence were necessary, the failure of Roosevelt, the acquittal of the big life insurance grafters, the grabbing of the Equitable Life Assurance Society by the boldest of all System masters, Tom Ryan, and the reversal of the Standard Oil \$29,000,000 fine, and the skinning of the public and pickling of the people's judge who dared decree it by some other judges, who, when President Roosevelt proclaimed their action an outrage of justice, contemptuously replied: "Roosevelt---oh, he dosen't count," must have proved to you that neither in the law nor in the government is the virtue to banish or punish these vultures of finance.

If the Government is powerless to check or alter the conditions that have left you prostrate beneath the claws and teeth of the plunderers, and if the law licenses the plunderer and his plundering, then there must be found some new way to cope with the enemy of the common weal. The weapons of the System must be turned against the System, and the propo-sition I shall fully disclose to you in my to-morrow's advertisement is the

one to accomplish this purpose. To recapitulate: These were my conclusions in 1890 after 20 years of outs with the System had convinced me of the facts:

1st-That any band of men who could control the banks and trust companies, thereby for all practical purpose controlling the money of the country, would be able to fix and sway the value of the stocks and bonds of the country-now 70 billions.

2nd-That the power to fix and sway the prices of stocks and bonds would give such a band the power to make-take from the people-unlimited money.

3rd-That with the power to make unlimited money, this band must absolutely control all the affairs of the people and make business "good" or "bad" at will-every kind of business.

In 1890, with a full knowledge of existing financial conditions, I concluded that through the creation of a certain type of corporate instrument a way could be found to enable the people to do those very things for themselves. I planned an institution directed to accomplish the purpose I had in mind, but as I added one by one the factors requisite I despaired of uniting the combination in one institution.

My plan called for a corporation, with a perpetual charter, allowing it to engage in any business, own banks and trust companies and railroads, operate manufactures and mines, buy and sell stocks and bonds, that it should have a large capitalization, expandable to any degree and free from taxation, and that it should already have complete corporate existence with a large list of stockholders, and its stock established on the leading American markets.

To perform the functions I had designed for my institution it was necessary that the System be in ignorance of its possibilities and plans, so at its inception the grantor State should not insert prohibitions tending to nullify the latitude of those using it; without freedom from taxation it would be impossible to pay taxes on its great capitalization; if there were not a large body of stockholders it would be possible for the System to purchase a majority of its stock once its menace was realised. Above all, the complete control of the affairs of this institution must be in the hands of some one man in whose ability and honesty of purpose the stockholders should have sufficient faith, to vote as he saw fit at its meetings, and that this one man should be fully empowered to issue and sell to the public any amount of stock, so it would have in its treasury at all times any amount of cash independent of the System's banks and trust companies, or of the Government itself.

My conception was an ideal one. It did not seem possible that any corporation in existence met all these requirements. In 1894 I found that there actually was such an institution in being, the Bay State Company of Delaware.

This corporation was the offspring of an up to that time unheard of

By 1896 Bay State had become one of the most active properties on the New York and Boston Exchanges, and it had, through the sale of its stock, become possessed of some \$10,000,000 of cash and valuable holdings. At this stage I was planning to acquire its absolute control when two

peculiar coincidences junctured. Addicks conceived the idea of joining with Rogers and Standard Oil, and Rogers determined to corral the Bay State Company.

The result was the now historical warfare between Addicks and Standard Oil.

Out of this war and because of it, I entered into an alliance with Rogers and Rockefeller with the intention of ultimately acquiring through them the control of the Bay State Company, holding out to Rogers and Rockefeller that through it we could consolidate the entire copper companies of the world.

The following figures present an instance of the possibilities for money-making of such a corporation as my plans had called for, because if such a corporation handled the Amalgamated deal it would not only have made the profits named, but much greater ones, because it would have handled the entire deal fairly. Notwithstanding double dealing and the smashing of the Amalgamated Copper project at its very beginning, the Bay State Company made over \$4,000,000, Addicks over \$3,000,000, Regers and Rockefeller over \$50,000,000 and I over \$10,000,000 in a short time, and with never over \$1,000,000 risked.

In the working out of this deal, Rogers, Rockefeller and myself, as is known to the world, fell out, and as part of my punishment Rogers swore I should never secure control of the Bay State Company.

The world is familiar with the fight which grew out of Rogers' determination to balk my plans.

Rogers and his Standard Oil associates used every means known to man and possible to money to first crush me, and, failing in that, to com-pel me to join with them. I used "Frenzied Finance" and my following amongst the people to maintain my existence and position.

The first step in the fight was the throwing of the Bay State Co. pany, with its then twelve to fourteen million of assets into the hands of a receiver, the intention of my adversaries being to wind up the company and thereby destroy its charter, well knowing that such another could probably never again be secured.

For five years and up to 1908 the Bay State Company remained in the hands of the Federal Courts of Delaware, Pennsylvania, Massachu-setts and New York, and in the kicking of its affairs between pillar and post its assets were shrunk to \$1,750,000 cash-\$750,000 of this amount was eaten up by the lawyers, the Receiver and the expenses of the courts and legal processes.

Rogers at the beginning of the fight had become possessed of knowledge enough of my plans to realize how badly I wanted the Bay State Company-that I was prepared to pay millions for its charter, provided its organization and fifty and odd thousand stockholders were kept intact, and he directed all his efforts to the end that the charter would be destroyed and the organization scattered. At the beginning of the fight I caused it to be known that I was through with the Bay State Company and wanted nothing more of it, and trained all my guns against the cop-per interests of Rogers and Rockefeller and their Standard Oil associates. The public and everyone interested, excepting Rogers, accepted as fact the idea that I had given up all hope of acquiring control of the Bay State Company, and after a tortuous carper in the courts, the Bay State Company, shorn of all its assets but \$1,000,000 and apparently all of its power, was about to be wound up by the Courts, and its charter killed.

Had this been accomplished, the only instrument in America to-day apable of opposing and destroying the System's machinery for plundering the people would have disappeared.

At just this stage came the day I had waited so long for-the System's deviltry had culminated in disastrous panic and the American financial structure was swaying like an oriole's nest in a nor'west gale, and-

It is not my intention or desire, nor is it at all necessary to my work, to tell what "happened" between the System masters and myself during the conflagrated days and nights of the panic, or how it "happened." It is sufficient to say that it was in my power to dictate terms, and I did so, forswearing things very dear to menthat I might be in the position I am a lifetime for In winding up the general educational part of my work, as I do with this third advertisement, I would say to the public: Don't fool yourself into the belief that I am any more fascinated with this many-word effort than you are. I'm not. This sort of advertising means lots of work and heaps of money to print it. I much prefer the kind of advertisement you will read after to-morrow, brutally brief and mercilessly to their point of "business is business," but it was necessary-absolutely neces me to show at length and in detail, as I have done in these three ad-vertisements, just how the people's billions have been tricked into the hands of the few, before I set forth in my final one to-morrow how the people can regain the billions of which they had been plundered.

Hogs-Receipts about 9000; market 10c, higher; choice heavy shipping, \$5.85 to \$6,90; butchers; \$6.80 to \$6,90; choice light, \$6.75; pigs, \$4.50 to \$6.70; packing, \$6.20 to \$6.75; pigs, \$4.50 to \$6.25; bulk of sales, \$6.55 to \$6.85.
Sheep and lambs-Receipts, 12,000; market steady; sheep, \$3.50 to \$4.25; lambs, \$4.75 to \$6.25; yearlings, \$4.10 to \$4.80. nue, was charged in police court yesterday afternoon with cruelty to cats. He is said to have snared them and

He is said to have snared them and beat them when they are hanging camper BADLY BURNED (CAMPER BADLY BURNED)
KINGSTON, Aug. 11.—(Special.)—John Keichurt of Jersey City, who is camping near here, was frightfully burned and is in the hospital. While opening a can of methylated spirits it exploded. He jumped in the lake to extinguish the flames.
Queer Dynamite Explosion. ROCHESTER, Minn, Aug. 11.—Mrs.
He is said to have snared them and beat them when they are hanging in the rear of 61 Florence seven feet high around his place, putting wire on top of that again, and in addition he has placed spikes at the bottom of the gates. "The cats still come in, tho," said Turner, "and, as they are trespassing I beat them and I think. I have a right to." The case was adjourned till Friday in order that the owners of some of the injured cats can give evidence.

"CALL ME BILL."

#### (From The St. Louis Post-Despatch.) Addressed to the great American pub-

August Meyer was probably fatally in-jured to-day by a mysterious explo-sion of dynamite in bor home. Neigh-bors summoned by Mr. Meyer found the woman on the floor with her right hand torn off and her face and body badly injured. To a doctor and police-man Mrs. Meyer stilled that her bus lic by the Hon. Wm. H. Taft is the affecting invitation to familiarity, "Call me B411.' "Call me Bill." No Williams, no

Willies, no Wills, no frills; but just plain Bill-Bill for short.

Bill, then, let him be called. Bill is a good name; there is no better. Bill is a great name; there are few greater. Bill is a well-beloved name, a common. The fire insurance rates in the west are going up 30 per cent.in consequence name, a name chock full and running over with good nature and humor. Bill is the most affectionate name that a mere man can be called. Most pals are of the Kootenay fires. Mr. Beck of the Anglo-American Insurance Co. says that it is not very probable that the rates in Ontario will also be raised. Bills. Great basebail pitchers and favor-ite poets are and have been Bills. Bill is almost more than any candidate has a right to ask to be called. The officials of the Crow's Nest Pass

Co say that they know nothing of the report from Fernie that the company would loan the town enough money at six) per cent, to take over the public Bill is one of the most successful vote-getting names on record. It is full of political magic. If Teddy Roosevelt had been named Bill there is no telling where he would have stopped. We feel reasonably safe in predicting that no more William con the telling

that no mere William can be elected this year. Bill would be an advantage to Taft which nobody but another Bill Immediately after the lacrosse game to-day at Hanlan's Point, Captain Beachey will make a flight from the oval. 'To-morrow afternoon Beachey will fly from Hanlan's to Island Park, land there and return to Hanlan's. On Saturday afternoon he will attempt to to fait which nobody but another Bill himself could hope to offset. Fortunate-ly for Mr. Bryan he has an equal chance at it. He had better say ditto at once to Mr. Taft's request. The race will depend upon which of them wears the Bill to better advantage. Let us hope that the real Bill will be the Bill elected. Saturday afternoon he will attempt to said three miles high.

Lost Foot Caught in Frog. QUEBEC, Aug. 11.-A brakeman hamed Lefebyre working at La Tuque The city treasurer says that he has received about \$1000 thus far in pri-vate subscriptions to the Fernie relief had his heel caught in a frog just as a train was approaching and the wheels of the locomotive cut off the

Storm in Indiana. EVANSVILLE, Ind., Aug. 11.-Three foot. EVANSVILLE, Ind., Aug. 11.--Inter lives were lost in a storm which last night did thousands of dollars property William Borgdorf was crush-William Borgdorf was crushiamage. William Borgdorf was crush-da to death in the collopse of a stable. Two children of John Delroy were irowned by a houseboat being swamp-ed. Mrs. Delroy's legs were broken.
