### WILL STRIKE OFF POLLARD

Physician Scores Medical Council—Powers Will Be Curtailed.

Dr. Stephen B. Pollard, potwith- standing his five years' incarceration, is to be further disciplined by the Ontario Medical Council. A meeting of the discipline committee was held yesterday, and the deputy clerk of the peace certified to the records of the case. Unfortunately for the speedy dispensation of justice, the circumlocutory process by which the business of the council is conducted, the recommendation to remove Dr. Pollard's name from the list of physicians cannot be acted upon until next July.

The delay has exasperated several members of the council, and one prominent physician and noted obstetrician said to The World last night, "This is an outstanding disgrace. The council should have removed Dr. Pollard's name years ago, when most of the members knew that he was engaged in illegal practice. In the present instance there was no necessity for withholding even a year after the first trial, as the evidence disclosed then a state of affairs which was entirely condemnatory. I think if some provision were made whereby the council would deal with similar cases summarily, no technicalities of evidence would obscure the facts from the members or make a travesty of justice so far as they are concerned."

The dereliction of the Ontario Medical Council has not passed unnoticed, and The World is informed on unquestioned authority that a private bill will be introduced at the next session of the legislature, by which the council will be shorn of some of its powers. Several members have indicated their intention of probing deeply into what they believe is a reproach to the province.

Stole Wedding Gifts.

BROCKVILLE, Ont., Nov. 5.—(Special)—An English orphan boy named Bell, aged 19, got back at W. J. Webb, his employer, for being discharged as a farm hand. He returned and stole a quantity of silverware, chiefly wedding gifts belonging to Mrs. Webb. Bell pleaded guilty to burglary to-day and was remanded for sentence.

LA ROSE

This week has seen another extraordinary movement on the La Rose stock. Last week it sold down to \$5.60 and recovered. On Monday it was selling at \$6.70. The new directors, who are conceded to be conservative business men, after inspecting the property, decided to materially alter the plans for the future development of this mine. They found that it was a case of shipping to boost the market. A meeting was immediately held, and it was decided that development work should be the main object for the next few months.

The La Rose has enormous quantities of ore, and the stock is well worth the market value. The dividend was cut to 8 per cent. per annum. The action of the new directors is to be commended and the honorable way in which they acted in this matter. No one was given any information on the subject, nor was it prearranged. This action alone should commend the stock to investors, as it shows that security on the principal invested is to be the future order of the day.

We carry La Rose on \$2 per share margin.

### NEW TECHNICAL SCHOOL

Will Cost Million Dollars, to Include Departments Suggested.

The deputatin, which recently visited the United States cities, regarding the building of the new technical school, has just submitted its report, and if the board of education adopts it the cost of the structure will likely exceed over a million dollars. It is probable, tho, that the list will be boiled down. It is recommended that the new technical school will include the following: Elemental chemical laboratory, quantitative analysis laboratory, qualitative analysis laboratory, elementary physics laboratory, electrical laboratory, dynamo laboratory, steam engineering laboratory, applied mechanic room, chemical lecture room, physical lecture room, two freehand drawing rooms, room for drawing from cast, applied design room, clay modeling room, printing room, wood carving room, drawing rooms, machine drawing room, architectural drawing room, three kitchens, model dining-room and kitchen, laundry, handsewing-room, machine sewing-room, dressmaking room, millinery room, library and reading room, commercial exhibit room, auditorium to seat 800 people, gymnasium, offices, thirty class rooms.

Recreation, assembling, bicycle lunch, and supply rooms in the basement.

The report advises the addition of the following subjects to both day and night courses:

Carpentry, wood turning, pattern making, forging, foundry practice, machine shop practice, plumbing, sheet metal work, printing, design as applied to textile etc.

Wanted to Scare Sweetheart.

Beatrice Fall, 23 years, living in Lucas-street, was arraigned in police court yesterday morning charged with attempting suicide by taking carbolic acid. It appeared that it was a diluted solution that was used and that she had only placed her finger which she had wetted with the liquid on her tongue. She said she only wanted to scare her sweetheart whom she feared was about to leave her. She was turned over to the Salvation Army.

## APARTMENT HOUSE AT BLOOR AND SHERBOURNE

Dominion Bank Will Erect Large Building With Offices on Ground Floor.

It is rumored that the Dominion Bank proposes to erect an immense apartment house, with bank offices on the ground floor, on the northwest corner of Bloor and Sherbourne. The bank acquired the property lately from the Kely estate thru Executor Thomas Long, the Collingwood lumberman.

It is expected that the Bloor-street viaduct, when built, will open up a valuable business district in this neighborhood. The Dominion Bank has opened up a branch office in a private house on Sherbourne-street just south of Bloor.

There is also a rumor that the Dominion Bank and the Bank of Commerce are in competition for the northeast corner of Broadview and Danforth-avenue, at the eastern approach to the proposed viaduct.

### SIR JAMES IN OTTAWA

Sir James Whitney left for Ottawa last night, as he stated, to attend to a matter of public business. While the premier was non-committal The World understands that he will give some consideration to the provincial boundary question between Ontario and Manitoba, also the application for disallowance of the hydro-electric legislation, which looms so ominously before the mooted electric merger in this portion of the province. Sir James will return on Monday night.

### Bradstreet's Trade Review.

Montreal trade reports to Bradstreet's say the future of the cotton trade has been the further advance in cotton prices and the consequent determination of the mills here to go on short time. They will make a cut of eleven hours in sixty, and it is estimated seven thousand hands will be affected. General business continues to move satisfactorily and is steady in tone. Good sorting orders for seasonable drygoods lines are coming forward, and it is evident merchants are desirous of adding to their stocks in many lines before prices go still higher. The tendency is generally upward. Cotton quotations are withdrawn pending a new price list. Trade in hardware continues good. Structural steel and heavy lines generally are reported in good demand, and prices hold firm. Large shipments of these lines and of groceries are being rushed west as the navigation season draws to an end. Dry-trade is reported good, and collections are fairly so, although some traders report money not coming in quite so well as it has done. The export season in this year has been exceedingly good, and producers have profited very greatly as a result. Values of general lines of goods are in a fall. Collections for future trade lacks none of the bright features previously reported. It would look as tho those merchants who had ordered lightly in fall lines of drygoods would experience some difficulty in getting their wants supplied, as stocks in many lines are light. In any case renewed orders will show advanced quotations. Cotton prices have again advanced. Trade in general lines of clothing, etc., continues good, and there has also been a big business in carpets and household effects generally. Orders for staple groceries are large, and big shipments are being sent west. Prices are generally steady to firm. The hardware trade is steady in tone, with a good demand for staple lines. Building materials continue to sell freely, and the trade is actively engaged in all parts of the country. Country trade is reported to be quite active. Produce comes forward freely, and prices are generally steady. Hogs and their products hold steady to firm. Hides are unchanged in price. Collections are generally satisfactory.

Winnipeg reports say the volume of wholesale trade in all lines is in a fall. Collections are generally satisfactory. Orders are good, and merchants are in need of new lots of those lines in which they ordered sparingly. Despite the heavy grain movement, large shipments of goods are being distributed thru the country, and in many cases there is heavy need. Retail trade is reported good in all directions. Collections show further improvement.

Vancouver and Victoria reports say the tone to general trade all along the coast continues excellent. Retail trade has been good, and wholesalers are receiving excellent letter orders for all lines of goods. Provincial industries continue busily engaged. Much railroad extension has been done during the season, and the result small centres in the province have gone ahead rapidly. The shipping trade is active. Collections are generally good.

## EXCELLENT RESULTS AT GOLD MINES OF LARDER

Prospects For Winter Are Very Bright—Visitors Surprised at Activity.

LARDER LAKE, Nov. 5.—The camp has been visited during the past two weeks by a number of capitalists, who have expressed themselves as being well satisfied with the looks of things in general, and much surprised to see such vast ore bodies.

The Golden Pyramid Co. have a force of miners at work on different properties and they are meeting with great success. A new vein over two feet in width was opened up on their island claim and an assay of \$33 in gold was secured. They have machinery ready to come in as soon as the snow comes.

The Merry Widow and Deer Park properties owned by Mr. F. A. Goring of Homer, Ont., have been worked all summer with very favorable results. The dyke has been stripped 100 feet wide and traced across the both properties. The formation is green serpentine schist and a lot of free gold has been found, and values are increasing with depth. It is the owners' intention to erect an 80 stamp mill.

The Berkshire Mining Co. have now got things in good shape, and a large force of miners are at work. Mr. S. J. Clark and Mr. Wade, directors of the company, visited the properties and took a number of samples to be tested. High values have been obtained so far and the ore body is widening out. Their mine manager, Mr. A. Maynard, is an experienced western miner and considers the claims well worth a mill being erected.

The Rose Gold Co. are fixing everything up for the winter. They intend to do a lot of work blocking out ore for the spring, when the mill will be started running.

The Gold King will also be working this winter, drifting and sinking will be the program. The Torontois are continuing in their good work, and rich pay ore is being encountered. As soon as their manager returns from his wedding trip, work will be commenced on the power plant.

The Dr. Reddick Co. have increased their force, and rich ore is being met in the drift at 100 foot level. The Dr. himself is on the property to guard against any fever coming into the camp from the other towns below. So far he has been successful.

The prospects for the winter from a laboring standpoint are very bright and at present there are no idle men around the town, whilst the investment point of view everything looks rosy, as many mills will be installed, then dividends will be forthcoming.

The following are registered at the Collingwood Hotel: Prof. Wilmet, Ottawa; Geo. H. Craig, Montreal; T. Bracken, Toronto; A. Nichol, Pittsburgh, U.S.A.; J. McCullough, Ottawa; E. E. Jackson, N. Y.; J. S. Schler, Montreal; E. B. Grand, Grand Rapids, Mich.; A. D. Arundel, Minneapolis; Dr. Reddick, Winchester; F. Carnegie, Dublin, Ireland; E. Roberts, Cardiff, Wales; F. Davy, New Liskeard; S. B. Moore, Cleveland, Ohio; B. W. Harris, Buffalo, N.Y.; C. E. Eckerman, Buffalo, N.Y.; J. C. O'Donald, P. O. Sinclair, N. D. Wade, Springfield, Mass.

50,000 ENGLISHMEN READY

To Do the Western Construction Work on the G. T. P.

OTTAWA, Nov. 5.—The secretary of the local branch of the St. George's Society, received replies from St. George's societies at Toronto, Halifax, Montreal and St. John in reference to the local suggestion that branches of this society all over Canada co-operate in sending a big resolution to Sir Wilfrid Laurier, asking him not to allow Orientals to be brought into Canada to work on railways being constructed. It is claimed that 50,000 Englishmen would be glad to come to Canada to do this work, and that therefore there is no need of Orientals.

Cholera in Germany.

WASHINGTON, Nov. 5.—Cholera has invaded the German side of the Russian border, and according to the U. S. consular agent at Koenigsburg, twenty-two cases including seven deaths have occurred so far.

## Between Ourselves

Let us talk this matter over face to face.

You want to make money quickly, easily and with the least possible investment.

**Taxicab Stock at \$6.00** per share offers that rare opportunity for you to make big profits. Now is the time while the Company is growing, to make the investment.

### Some Simple Logic

You Ask—upon what do we base our prediction of big profits?

We Answer—The big earnings of Taxicab Companies in other cities in general, and the concrete results in particular of the operation of a comparatively small number of Taxicabs in Toronto covering a period of seven months.

The Logic is as plain as the simple proposition that two and two make four, and two more make six.

If the number of Taxicabs which have been running in Toronto up to date warrant the directors in paying a dividend of 2 1/2 per cent. quarterly, or 10 per cent. per annum, doubling or trebling the number of Taxicabs is bound to greatly increase the dividend earning capacity of the stock on a much larger ratio, because the overhead expenses do not increase, and the proportion borne by each cab is small.

### The Greater Scope

Besides the Taxicab end of the business, do not forget the great earning powers possessed, although at present inactive, from the marketing of commercial motors throughout the North American continent.

Motor driven vehicles for heavy trucking, all kinds of carting and light delivery are becoming more and more in demand.

The possible scope of this side of the business is practically unlimited, for as a possible customer there is every manufacturer and commercial firm in the American continent.

And the Berna Commercial Motors have no peer in the field.

## Of Interest to You

Your money will make money for you faster in Taxicab Stock than in any other industrial on the Toronto market.

The investment is secured by what is practically two distinct lines of business, either one of which would separately pay a big rate of dividends.

Thus Taxicab Stock gives you double the chance of making your money earn money that is presented by the ordinary proposition.

If you neglect to participate in a portion of what is left of the \$100,000 of Capital Stock in Berna Motors & Taxicabs, Limited, you are neglecting your own best interest.

Before the balance of our allotment is exhausted, send immediately your subscription by mail, wire or phone.

### LA ROSE

This week has seen another extraordinary movement on the La Rose stock. Last week it sold down to \$5.60 and recovered. On Monday it was selling at \$6.70. The new directors, who are conceded to be conservative business men, after inspecting the property, decided to materially alter the plans for the future development of this mine. They found that it was a case of shipping to boost the market. A meeting was immediately held, and it was decided that development work should be the main object for the next few months.

The La Rose has enormous quantities of ore, and the stock is well worth the market value. The dividend was cut to 8 per cent. per annum. The action of the new directors is to be commended and the honorable way in which they acted in this matter. No one was given any information on the subject, nor was it prearranged. This action alone should commend the stock to investors, as it shows that security on the principal invested is to be the future order of the day.

We carry La Rose on \$2 per share margin.

### RIGHT-OF-WAY

Right-of-Way was again a large shipper last week. There will be more heard from this stock during the next six months. A prominent New York Stocks, Chicago Grain, Produce, ETC., dealt in for cash or on moderate margin. Consult us on your investments. This costs you nothing. A number of our clients have made large profits. Why leave your money idle? Make it work, and in making it work be sure that it is safe.

gent engineer recently visited the property, and reports that they have at least half a million dollars of ore in sight. This does not take into account the Cobalt Merger property, which passed into the control of the Right-of-Way Company recently. Take our advice and buy this stock. There is still some of the old stock around, which can be purchased and transferred for the new at three shares to one.

We think that the record of Right-of-Way is well worth looking into. They have made a steady advance. The action of the directors in securing ninety-two acres on the south of the Hargrave is one that is unanimously endorsed by conservative business men. Another dividend will be paid in January.

We carry this on 50c per share deposit.

### CANADIAN CENTRAL MINES

This company has only 475,000 shares of stock issued. They have no debts. They are operating in the Tilbury oil fields district, where they have now ten wells with a first-class production. Another well, and it will be a big one, will be shot next week. Seven more wells are to be put down on this lease—the production will be enormous.
