

the ministry, it at the same time aims at giving a thorough education to all who aspire to the rank of graduate.

The Degree of Bachelor of Arts is given only to those who have shown by examination their acquaintance with the whole round of subjects constituting a liberal education. Impressed with the importance of keeping up the standard of attainment the University demands not less than one-third of the maximum of marks allotted to each subject, thus making the standard for passing at least as high as that of any University in the Dominion; but, as has been already pointed out, the taking of this Degree is purely optional, and therefore does not affect those who, for whatever reason, may not see fit to study for it.

A reference to the Calendar will show that by the Degree of Bachelor of Science, recently established, in connection with honours, encouragement is given to students who have completed the ordinary curriculum for B.A. to extend their knowledge of special subjects.

The principle upon which the Authorities of the College have proceeded is that the first thing to be aimed at is the imparting of a sound, and, as far as possible, complete education, and that the knowledge of special subjects of study is a secondary matter affecting only a few.

The advantages of this method are easily seen. Among them may be mentioned the consideration that no matter what the student's future course in life may be—whether he enters the Church or engages in teaching or in the practice of Law or Medicine—all his mental powers have been exercised, and he is in a position to form an intelligent judgment upon questions of speculative interest or practical importance.
