"RAKING GUTTERS"

Beaverbrook's Paper Com-
pares It to the Pickwick-
ian Election.

London, Oct. 20.—(Canadian Press).—It was predicted by the Canadian Press about ten days ago that the election would be one of the bitterest on record, and even up to the present time conditions have unfortunately only too amply fulfilled the prediction. The Sunday Observer speaks of all three parties raking the gutters to find more mud, although Stanley Baldwin sets the example in the other direction, while H. H. Asquith is the same mirror of excellence he always has been. Premier MacDonald has been the target of gross abuse, and being very human has given way to it.

Bernard Shaw Speaks

Bernard Shaw, speaking in support of Margaret Bondfield at Northampton, said that those who attacked the Government's attitude towards Russia because she had failed to pay her debts had said nothing about the French Government, which owed Great Britain six hundred million pounds sterling. Mr. Shaw criticized the "strong language" used by Lord Birkhead, Mr. Asquith and Winston Churchill, which was likely to endanger the peace of the world.

Lord Beaverbrook's Daily Express, discussing the revival of epithets and personalities amongst all the speakers in the campaign, likens the present contest as coming near to the famous Pickwickian election in virulent vituperation and corrosive invective. MacDonald has set the pace, says the Express, in corrosive superlatives which are "too hot for the ordinary politician." Not satisfied with telling his opponents that they are telling lies he compares them to angry dogs snuffing around a dung heap. Lord Birkhead has spurned such language in response to these efforts of MacDonald, and his missiles are more highly polished, but Winston Churchill is not out of the running in the orgy of epithets.

Conservative Appeal

London, Oct. 20.—(Canadian Press).—The Conservative party organizers said yesterday that the election fight in some quarters will be much more strenuous than had been generally anticipated. They expressed a fear that some Liberals might vote for Labor candidates, and other Liberals abstain from voting altogether. The Conservative headquarters therefore are appealing to all anti-Socialists to vote solidly for Conservative candidates.

SPEAKERS ADDRESS MEN OF HOLY NAME IN Y.M.C.I. BUILDING

Members of the Holy Name Society of the Cathedral, assembled in the Y. M. C. I. auditorium last evening, listened to excellent addresses at a meeting which opened a series of lectures held from time to time to encourage a greater interest in the objects and work of the organization. Louis J. McDonald, president, was in the chair.

In opening the meeting Mr. McDonald spoke briefly of the objects of the society and urged that the members take a greater interest in it. There were more than 1,000 members of the society in the parish, he said, and he could see no reason why at least 1,000 men were not members of the Holy Name Society. He congratulated the members on the excellent showing made by Sunday when more than 400 received Holy Communion. He wanted this number increased to at least 1,000 monthly.

BROWN TROUT IN LOCH LOMOND

An English Exchange says:—"At the request of a number of public bodies of St. John, N. B., the Department of Marine and Fisheries undertook to establish the European brown trout in Loch Lomond near St. John. The first eggs for this purpose were obtained in January, 1921, from the U. S. Bureau of Fisheries. A small number of the fry from these eggs have been retained in the ponds at the hatchery, and in the autumn of 1923, when the fish were a little more than two years old, a few of the larger and better developed yielded some 5,000 eggs, which are undergoing incubation.

"The eggs of the brown trout are not easily obtained in America, and in the continuation of the stocking of Loch Lomond, some 200,000 Loch Leven trout eggs, a variety closely related to the brown trout, were obtained through the United States Bureau of Fisheries in exchange for Atlantic salmon eggs. The Loch Leven trout eggs were secured from wild trout captured in the streams of Montana and are the result of small distributions of such fry some years ago. An equal number
