YACHTING.

America's Cup.

New York, Feb. 17.—The New York Yacht Club formally announced late today the acceptance of Sir Thomas Lipton's

boat's challenge for the America's Cup. The series of best three out of five races will be held over the Sandy Hook course, beginning on Thursday, July 15. Races will be held July 15, 17, 20, 22 and 24, weather permitting, or until the challenging or defending yacht will have won three races.

THE RING.

Bouts at Halifax.

Halifax, N. S., Feb. 17.—Roddie McDonald, of Glace Bay, came near being knocked out for the first time in his life by Mike McFague, of New York, at the War Veterans' tournament tonight. He took the count of nine three times in the second round, but was saved by the gong. McFague outpointed him in every round to the eighth, when he sent him to the floor with a right to the jaw. Three times again he took the count of nine, and once more the gong saved him. McFague was tired by his exertions while McDonald staged a wonderful come-back, mixing it up again with his opponent. In the eleventh he struck McFague so low as to double him up, though the referee did not believe it was intentional. McFague could not continue, and he was awarded the fight on the foul.

Scott, a featherweight overseas champion, and Blackie, formerly U. S. N. fought four hard rounds, both going through the ropes to the floor and both had to be carried to their dressing rooms.

KENNEL.

Local Show.

The New Brunswick Kennel Club held their second evening show in their rooms in the Market Building last night. There was a large turnout of dogs and they were judged by Robert Magee, the veteran terrier fancier of this city, and by W. Lasky, of Fredericton.

During the month of March the last show of the season will be held, in which the winners of each breed will come together to determine the best dog shown during the series. If this special is won by a sporting dog, another special will be awarded for the best non-sporting dog and vice-versa.

THE A. A. U. OF C. STANDS FOR AMATEUR SPORT.

(Halifax Echo.) We see by an official notification from the M. P. B. A. A. U. that Club of the Imperial team has been declared a professional, which means that the O. I. City aggregation will have to carry through to the end of the present season without the services of Roy. This is not liable to be the only suspension handed out by the official body before the matter is finally settled.

The five day period of suspension under which many of the hockey players have been living since last Tuesday will be over about this time tomorrow and it will not be necessary for these puck-chasers to think of the amateur clause for the remainder of the season. It will be wise, however, for them to find out before they take part in any league games of any description if the league has been through the formality of obtaining sanction for the series—otherwise they are liable to bump up against another dropping from the amateur ranks for a time.

"DEAD RECKONING"

Long before that officers were compelled to keep a journal, the form of which was only gradually developed. Originally it was on loose sheets of small size and the columns, when introduced, had to be ruled by hand. The log of the Dreadnought, 1879, had twelve narrow columns on a page. For want of space the column for latitude "Dred" from the reckoning, as Riddle has been headed Ded. Lat.

"This abbreviation Ded. for Deduces has become corrupted into dead, which has for generations served to exercise vain the most learned savants on two continents to get at its real and in the result perfectly simple meaning. There is not a mariner who, on reading this explanation, will fail to realize that deduce is the only word which correctly explains the method of obtaining his so-called dead reckoning. He deduces his position from the account he has kept just as any & desman deduces his profit or loss from his account."

100,000 LETTERS TO WIFE.
New York, Feb. 17.—If your husband isn't the ready letter writer when he's away from home, you'd like him to be called his attention to the statement that the late John Martin Beck of Marion, O., wrote 100,000 letters to his wife. He averaged fifteen letters a day and spent \$2,000 in postage.

Henry Harries, acting marine superintendent, Meteorological Office, thus explains the phrase in the London Morning Post: "It was not until nearly the close of the eighteenth century that printed log books were supplied by the admiralty."
