WESTERN MEADOW LARK'S NEST.

very shy at the nesting season. Al-though it will often remain on the nest until the passerby gets quite near in the hope that it will not be noticed, yet the coast is clear.

in one season. Skylarks.

A short time ago someone writing in a local paper said that the skylarks had made their home among the bushes of the hospital grounds. Now as a matter of fact a skylark will never go near bush. To him it means danger. He lives in the air or on the open ground and a tree or bush is avoided always. The skylarks are still singing in the fields between the hospital and Mount Tolmie. They are often heard there and now at last even the doubters are willing to admit that we really have skylarks in the neighborhood of the city.

Love Season. This is the love season of the birds.

Almost all of the flocks have broken up and the feathered folk gone off two and the month before they are out of the Very soon some of them will comm to build their temporary spring homes, if they have not already done so. The coming season is the interesting period of the bird's life. There is no other time of year when these creatures may be studied with so much promise of re-

were clever were it not not that we see days and eight hours making the trip in the Esquimalt machinery resulted the nest the result of their labors. As to Vancouver. there are never two birds alike, so there are never two nests alike. Usually there is a resemblance among birds of the same species. One robin's nest is usually something like every other robin's nest, but no two are alike. It is very interesting to notice the way in which the birds choose positions for their nests, to see how they adapt themselves to civilization by using the materials and the sites provided.

Another Ramble.

Editor, Times Nature Club: On Thurson the outskirts of the city. I had not gone far when I saw a pair of Gairdwoodpeckers (at least I judge that is what they were from the deion you gave of them some time to.) They are very pretty little spotthe p of the head.

AFTER COLLISION

Many Injured in Crash Between Trains on Chicago Elevated Line.

Chicago, Ills., March 23 .- More than 25 persons were injured in a rear-end collision between a northwestern elevated and an Oak Park elevated train t State and Van Buren streets early Advices received from Japan by the lue Funnel steamer Antilochus, which crowded.

A panic followed the collision and arrived yesterday, state that severe nowfalls and wintry weather is now many of those who escaped injuries when the trains came together suffer-The hills on the boundary of Niigata ing at the State Street station The hills on the boundary of Niigata and Fukushima perfectures are report-ed to be covered with snow to the depth of over twenty feet in places, while the Heiwa road, leading from Akita to Iwate and the vicinity of Sennin mountain pass, is blocked by snow to a depth of about eight feet. The snow is about

seven feet deep in the neighborhood of the Innai and Kosaka copper mines, MINING AT DEPTH IN CENTRE STAR

Shaft of Property to Be Deepened-Strike on Blue Bird.

Rossland, March 21 .- Deep mining is to be a feature of the Centre Star and its allied mines. The main shaft is to be deepened from the fourteenth to the sixteenth level, which will give a total depth on the dip of the ledge of about 2,400 feet. This depth should bring the workings down to the permanent water line, where it is thought by prominent mining experts there will be a considerable change for the better in the Cre deposits. It is thought that the mines here, should the ore prove fairly rich BURIED IN SNOW at depth, can be mined at a profit to a depth of 5,000 to 5,500 feet. There is not much water to contend with, which is an important consideration, as it costs considerable to keep the water pumped from the workings of wet mines. Good ore is being met with on the lower levels of both the Centre Star and War Eagle of late, which greatly encourages the management, The ore body on the Blue Bird has widened out to four and a half feet. The ledge is strong and well defined. This is the most important find that has been made in the south belt for a good many years, and the fortunate lessees are to be congratulated. A steam drill has been installed, and, as there was a boiler on the property, the development work and the extraction ing. His oxen reached home without of ore can be done with more speed and less expense than when the work was done by hand.

TO SETTLE DOWN

Visitor Speaks Glowingly of Woods Lake District in Okanagan Valley.

Vernon, March 21. - A. C. Jones, a prominet fruit rancher of the Wenatchee valley, Washington, spent a few days looking over fruit lands in the Ottawa, March 23.—General Otter will command the army corps that will be present at the Tercentenary up with this section of the Okanagan. tunity of inspecing, he believed that the ing. A quality of the soil on Woods lake which he had noted was the fact that owing probably to the subsoil the land required but very little water. Then for anyone wishing to make a me for himself there could not possibly be a more ideal spot than the Woods lake section. The scenery was the finest he had ever seen, and the cli mate was almost perfect. Mr. Jones had been engaged in the fruit raising husiness all his life, and his visit to Woods lake has impressed him so favorably that he expects to secure property there and stock it. One point which he had noted was the tendency to plant too many varieties of trees This had been an error in his own country, but experience has led many of are now well in hand for the spring the farmers to correct it and now only some three or four varieties suitable and Tuesday, May 18th and 19th. Purses to the soil were grown and the result to the extent of \$2,400 will be hung up. The following is the schedule of which the market absorbed the yield
