Years from now the five-star Bill will be giving good advice. It is built of selected timber, treated with wood preservative, that prevents decay. It has strong rigid walls, air-tight doors and hinges of heavy steel. Therefore it lasts, simply because it can't very well do anything else. Our folder contains more fully-extended Dept. R.

## Veteran Among Holstein Breeders

(Continued from page 4.)

There were over 100 head of cattle there, but Mr. Hallman secured first and second on his behalf. That gave him courage and he wired to Toronto if they would like his entries at the exhibition there. The return wires stated that they would if he, Mr. Hallman, would risk there being space. He went right to Toronto. The story of his subsequent success in the show-ring is well known to the older Holstein breeders. He took part actively in the first farm catalogue which Mr. Hallman got out in 1890. The introductory paragraph to the catalogue reads:

"We have exhibited only three seasons, from 1885 to 1887 inclusive and have met with perfect success. We took a larger share of honors and first prizes, diplomas and medals, than any other herd with which we competed, and we faced the best herds in the country. Some of our animals were never defeated by anything but members of our own herd. And we exhibited all along we have every reason to believe that our efforts would have been crowned with equal success."

One of the first aires used in this herd was Prairie Aggie Prince. He had a four-year-old dam with a butter record of 20 lbs. 1 ounce, a good record in those days. Another animal used was Netherland Statesman Cornelius, a grandson of Netherland Prince. Taking his herd as a whole, Mr. Hallman then had the best breeding of the day for show and butter records. His old cows were grand animals—Mr. Hallman believes fully as good as the best today. On the occasion of my first visit to Springbrook Farm he showed me some of the first records of production ever kept in Canada. For instance he had the records that he had taken from day to day of Minor Bookers, a cow sold to the New Brunswick government. As a three-year-old she produced 7,515 lbs. 2 oz. of milk in eight months. This record was made while she was feeding and while the heifer was milked three times daily for a part of the time, the last milking at night was always at six o'clock. Another famous individual in this herd, Dromy Eyes, that won from Cornelius Tensen in the show ring, made 1,570 lbs. of milk in a month as a three-year-old.

Holsteins Were Not Popular. Financially, however, all was not going well with Mr. Hallman. In spite of his show ring successes, his breed was not popular, and he could not get even reasonably good prices for his stock. Fifty dollars to \$60 was a good price for a yearling Holstein bull ready for service and compared with the prices which had to be paid for the cattle, the selling price was not always affording the cattle that he desired to, and when selling good males, he knew of a certainty that he would meet them again in the show ring. He usually held his own, however, as he had the faculty of selecting and feeding.

"People called me crazy and foolish to stay in the business," remarked Mr. Hallman to me once when speaking of this difficult portion of his career as a breeder. "About that time, however, I took a trip to New York and saw the great herds there. I saw what Holsteins could do under right conditions which I didn't have a chance to give my cattle. I knew that the Holsteins would do equally well in Canada, and looking ahead I knew that they would soon find a place in my own country. I knew what was before them as producers of both milk and beef."

A Good Farm Purchased. In the meantime, Mr. Hallman had transferred to another farm, after 15 years of almost wasted effort on the (Continued on page 12.)

## Money Savers for Farmers

DON'T eat more dinner than you can hold simply because the cook has prepared more than you can eat. If you do, you'll probably have "inside information" that things are not quite right. By the same token, don't buy something that you don't need merely because it's cheap. If Robinson Crusoe had paid one cent for a postage stamp he would have been a spendthrift.

But, when you find things that have an every-day need, selling at moderate prices, then is your time to economize by buying. Such products will save you money. We make such commodities. This page describes seven of them. Sold by good dealers everywhere.

### Everjet Elastic Paint

We have a product called Everjet Elastic Paint that will save you many a dollar every year. It is a wonderful roof paint. Applied to ready roofings, it adds years to their life, makes them leak-proof and improves their appearance. Everjet is invaluable for its implements. Protects them from rust and keeps them dry. It never peels, scales or cracks. The best carbon paint made. Good wherever you have exposed surfaces. Try a can.

### Everlastic Roofing

Insurance against wind, weather and water can be had very cheaply by laying Everlastic Roofing wherever you have a slanting roof. The best "Rubber Roofing" on the market at the price. It is easy to lay, costs little and gives satisfaction for years. Just the thing for barns, out-buildings and poultry houses. Comes in rolls of 1, 2 or 3 ply weight, each roll 36 inches wide. You could pay twice as much and not get as good.

### Carbonol, Disinfectant and Deodorant

The most necessary thing you could have around the house is a bottle of Carbonol. It is the best disinfectant, healer and cleanser ever made. Removes grease, germs and odors. Therefore, put some in the water with which you clean house. Heals cuts and wounds; prevents blood poisoning. Wonderful in the sick room because it prevents contagion. It will keep your stable and hen house clean, and drive flies away from garbage pails and cattle pens. The best thing you could have for a hundred different uses. Get a bottle today.

### Creonoid, Lice Destroyer and Cow Spray

One of the little things so often overlooked is the relation between contented live stock and profits. Best results cannot be secured if your live stock is infested or worried by flies. Spray your cows, pigs, poultry, dogs and cats with Creonoid. It positively and permanently destroys vermin and lice. Keeps flies away. Makes healthy porkers, happy cows, good tempered horses. More eggs from your hens. More milk from your cows. Follow directions carefully.

### Amatite Roofing

Amatite Roofing is distinctive for two reasons—its high attractive, sparkling appearance and its great durability. It has wide flange, too, as the roof that needs no nap. Its mineral surface is waterproof and fire resisting. Amatite is made in rolls, each roll containing enough to cover 100 square feet with a 3 inch lap.

### Barrett's Grade One Liquid Creosote Oil

The best fence post made will rot if not protected with a good preservative. You can make an ordinarily good fence post last 20 years by using Barrett's Grade One Creosote Oil. It is the best wood preservative on the market. Penetrates deeper than any other Creosote product. Hence it accomplishes more. We can show you tests to prove this. Save the expense of timber renewals. It's a big item. Wherever you have wood exposed to moisture or earth, preserve it with Barrett's Grade One Creosote Oil.

### Elastigum Waterproof Cement

Many a farmer or house owner has saved the day, by having Elastigum handy. This tough, elastic, adhesive cement is a wonder for those quick repairs that are daily coming up. And it makes those repairs permanent. If you have a leak to fix, a joint to seal, use Elastigum. Uncolled for joining or regum is a real "handy man" and you ought to have it on hand. Good for a hundred uses.
