

Facts About McClary's "Sunshine" Furnace

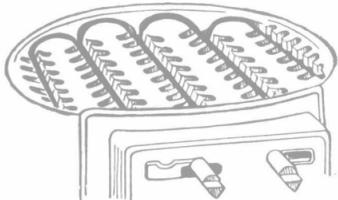

—The Understudy of the Sun—

The Fire-pot of the "Sunshine" is made of Semi-Steel—that of the ordinary furnace is made of Grey Iron.

Here's the difference—Destructive sulphur fumes penetrate Grey Iron easily because it is porous. Semi-steel is not porous—it is a close-grained material with a smooth surface secretly processed by McClary's. Gas fumes cannot penetrate Semi-Steel therefore it lasts longer. The "Sunshine" Fire-pot is built in two sections joined together with our famous cup joint. The shape of this joint, combined with a layer of McClary's asbestos cement, makes it absolutely gas, smoke and dust-proof.

Clearly, the "Sunshine" is the premier furnace as far as the Fire-pot is concerned.

The Grates of the "Sunshine" Furnace have three sides each. Plainly, they have three times the endurance of one-sided grates. Every time you rock down the ashes of the "Sunshine" you can expose a fresh side of the grate to the fierce heat of the fire—lengthen the life of the grates.

And the short, strong teeth of "Sunshine" grates simply grind up clinkers. The "Sunshine" Furnace is the best as far as grate construction goes.

Shaking an ordinary furnace is hard, back-breaking labor. You don't need to shake the "Sunshine"—you simply rock

it and the ashes drop into the ash-pan. A child can easily rock the grates of a "Sunshine"—merely another reason why you should buy a "Sunshine" Furnace.

Ordinary furnaces are called coal glut-tions. There may be good reasons for that—we don't know. But—we have built the "Sunshine" Furnace so that it is very easy on coal. Hundreds of people now using the "Sunshine," and having used ordinary furnaces, declare that the "Sunshine" makes two tons of coal do the work of three. Evidently, the "Sunshine" Furnace saves coal and money.

The ordinary furnace has a water-pan hidden somewhere about the base. There, it cannot carry out the purpose for which the water-pan was devised. The water-pan of the "Sunshine" Furnace is placed scientifically above the

radiator near the dome—the heat laps up the water, before being diffused all over the house. It contains the same amount of moisture as the air of a balmy June day. Plainly, as far as the water-pan is concerned, the "Sunshine" is the furnace you should buy.

There are many more reasons why you should invest your money in "The Understudy of the Sun"—McClary's "Sunshine" Furnace. Call on the McClary agent and ask him to show you all the mechanical reasons and exclusive devices which go to make the "Sunshine" the best and therefore the cheapest furnace you can buy. Write us at our nearest address if you cannot get in touch with him.

THE SPICE OF LIFE. SAW THROUGH THEM.

In a recent election in a little town of North-west Arkansas, one of the candidates for city marshal received only five votes out of some five hundred cast. He took his defeat very much to heart, and had many bitter things to say of the "political" ring that he claimed had brought about his defeat. To a friend who was sympathizing with him he unburdened himself. "They think I ain't on to their little game," said he, "but I know why they worked and voted against me. They didn't want me to be city marshal. That's why."

Joke-seller—Did you receive my letter and that batch of jokes?

Editor—I received the letter, but I didn't see the jokes.

Clydesdale Stallions and Fillies

Our past record for many years in the leading show-rings of Canada and in the yearly increase in volume of business is our best recommendation. This has been our best filler. We have still some of the best of last year's importation in both stallions and fillies. We solicit your trade and confidence.

SMITH & RICHARDSON, Columbus P.O., Ont.

Brooklin G. T. R.

Myrtle C. P. R.

GOSSIP.

D. M. Watt, breeder and importer of high-class Ayrshire cattle, St. Louis Station, Que., has just landed from Scotland with nineteen head of fine Ayrshires. In the lot is the champion two-year-old heifer of Scotland. This heifer was bred and exhibited by Thomas Bair, of Hobsland. She is in calf to Masterpiece, a bull recently imported by R. R. Ness, Howick, Que., and still in quarantine. The importation is a good one.

Hickman & Scruby, exporters of pedigree stock, Court Lodge, Egerton, Kent, Eng., report trade with them exceedingly good. They have done far more horse business than ever before. Late shipments have been sent to most parts of North America, and a seventh consignment is about to be shipped to an old customer who is known to the firm only by correspondence. This speaks well for the manner in which they fill their mail orders. Satisfaction to all is the motto of Hickman & Scruby. If interested in live-stock importing, give them a chance.

John Miller, importer and breeder of Scotch Shorthorns, Shropshire and Cotswold sheep, Brougham, Ont., in ordering change for advertisement, says: I have sold all the young bulls advertised in your paper. I have a fine lot coming on for next winter, all sired by Upper-mill Omega. One extra good September calf, from a Lavender dam, that some feeder should have that wants to show this fall. My imported sheep will be home about the first of August, and as there is a dozen yearling rams in the lot, think any breeder in want of a good flock-header should see them. I never was in better shape to supply good home-bred rams and ewes, also a fine lot of lambs of both breeds.

SENSATIONAL JERSEY SALES.

At the fourth annual sale of Jerseys, by W. R. Spann, at Shelbyville, Kentucky, May 27th, 90 head were reported sold for an average of \$372, the highest price being \$5,100, for the five-year-old bull Fontaine's Chief, purchased for Undulatta Farm. The top price for a female was \$1,075, for Noble's Financial Daisy, purchased for Elmendorf Farm. The yearling heifer, Noble's Eminent Nelly, was also taken by Elmendorf Farm, at \$1,000. The Jersey Bulletin says: When the sale of Fontaine's Chief was nearly closed, a mail bidder from Canada "threw his hat in the ring" and forced the agent of Undulatta to pay \$5,100 for him.

At the annual sale from the herd of T. S. Cooper & Sons, Coopersburg, Pa., on May 30th, 162 head sold for an average of \$490, despite very unfavorable weather and following the Spann sale. Elmendorf Farm was the largest buyer, taking 21 head, at a cost of \$14,610, or an average of \$695.71. The highest price for a cow was \$3,200, for the five-year-old Warder's Fawn Beauty. Seven others sold for prices ranging from \$1,700 to \$2,900. Among the buyers was the firm of B. H. Bull & Son, of Brampton, Ont., who secured, among others, the bull Violet's Bright Prince, at the bargain price of \$600.

TRADE TOPIC.

Help is one of the problems of the farm. The Heller-Aller Company, of Windsor, Ont., manufacturers of ball-bearing wind-engines, galvanized steel towers, sub-structures, towers, and tank systems of all kinds, Baker gasoline engines, house-tanks, valves, floats, and everything connected with a water system, have just issued their general catalogue, No. 28, a well-illustrated, indexed volume of nearly 300 pages, with a memoranda in the back. Along with this has come a similar booklet, "Water Systems for the Farm, Country Home, and Village." This, too, is an educative booklet. All are interested in water systems. See the company's advertisement in another column, and write for the catalogue and booklet.

"How's everything at your house?" asked Smith.
"Oh! I'd I'd Brown, 'she's all right."
