### DAY'S DESPATCHES

9,000 MEN QUIT WORK.

Chicago, July 7.-A strike of 9,000 freight handlers in Chicago was called to-day, and every freight house of the 24 railroads concerned is practically tied up. Business men fear that the strike will be the most serious which has affected their interests in years. The strike was called by a committee appointed by a meet-ing of 1,000 freight handlers last The committee was instructed to call a strike within 48 hours unless the railroads met the demands of the men at once for an increase in wages, extra pay for overtime and holidays, and recognition of the freight handlers' and warehousemen's union. Many of the railroads had small of men, previously hired, on hand when the strike was called, and forces by adding to it men from other de-partments managed to handle perish-able commodities. In the hiring of non-union men it is said the railroads run a serious risk of bringing about amsters who recent ly won their fight from the packers. Chief of Police O'Neil, when notified that a strike had been called, sent orders to his subordinates to make every preparation to preserve peace.

THE VENEZUELAN REVOLUTION.

Willemstad, Island of Curacoa, July 7.—President Castro, of Venezuela, left Caracas Sunday, not for Valencia, as had previously been announced, but for La Guaira, taking with him his private guard of 500 veteran soldiers and General Ferrer as chief of staff. The President reached La Guaira in the afternoon, and left there at midnight on the steamer Ossun, his destination being Guants or Barcelona, about 150 miles east of La Guaira. He intends to reorganize the Government forces at and about Barcelona and assumes the offensive against the Revolutionists at once. Nobody at Caracas can explain this change in his plans, and the step is considered as perilous as the invasio of the Valencia district by the main army of the Revolutionists. will be opposed by the Government army under General Seferino ment army under General Scieralo Castillo. Later in the day news reached here from Venezuela to the effect that 3,000 Government troops, under General Modesta Castro, the President's brother, were completely routed July 3 between Barcelona and Aragua by troops of the revolutionary army under the commane of Gen. Rolando. The Government forces lost all their ammunition and equip ment, and many of the soldiers deserted to the Revolutionists during the engagement. After the battle the revolutionary army moved on Barce-lona and surrounded that city. The inhabitants were panic-stricken, the shops were closed and the streets

were barricaded. andustrious Old Clock. At quaint old Castletown, the "metropolis" of the Isle of Man, there exwie a very interesting clock, which has now performed its functions of time telling in five centuries. It was presented by Queen Elizabeth in the year 1597 to Castle Rushen, the fortress which stands in the middle of Castle town, from which the town takes its name. The works are crude, being driven by ropes and pulleys, but nevertheless they keep fair time. The clock in fact, has run ever since it was built, except for rare stoppages for repairs To this day the single hand which travels slowly round the dial outside the tower of Castle Rushen is the principal source of information as to the hour to the inhabitants of Castletown. A timepiece which has worked continuously for more than 300 years as something of a real curiosity.—Jew-

Men may be born with fortunes ready made, but character they have to achieve.

### OF POPE LEO.

His Many Personal Traits-Writes With Gold Pen.

The Pope is a keen judge of many things and has a pretty wit. He is reported to have said that Mr. Hall Caine's "Italians," in spite of their names, are all Anglo-Saxons. The daily menu of the Pontiff consists of a cup of coffee with milk, a roll and no butter for breakfast. At dinner there is soup, plain meat, fried vegetables and chicken croquettes fried in butter as only mans know how, pastry and one glass of Burgundy. At 6 o'clock a cup of bouillion, and at supper a little cold meat! Fruit is always on the tubles, especially pears; a small cup of coffee with a little sugar is taken during the day now and then. The dish best liked by his Holiness is pasta, made especially for the Vatican table by the nuns of Santa Mar-

ia. .This is made from new-laid eggs and flour of the finest quality. idea The Pope has a preconceived of how he desires to have his portrait appear, says an artist who has twice painted his Holiness. Squaring himself in his seat, his raised, with two fingers extended as in the act of benediction, a conventional smile drawing back his colorless lips, he would sit motionless for a moment, stiffening every muscle as we all do in photographic expectancy; then abandoning it. "Voila mon enfant!" he would exclaim, with an air of triumph. He is always much interested in his portrait and the artist and renders every assistance necessary except that of remain-

ing still; which seems to be out of his power. Leo XIII. speaks quite as often in French as Italian and always with extreme rapidity. He only commenced to study French when appointed Nuncio to Belgium, "and I could speak as fluently as I do now by the time I reached Brussels," he is re-ported to have said. King Leopold used to exclaim, "I forget Pecci is

an Italian. He does his private writing with a gold pen, but his pontifical signature is always with a white flattened quill, which is believed to have come from the wing of a dove, although persons who have seen say it must have come from a larger bird. The same quill has been use more than forty years. It only serves for important signatures, and s kept in an ivory case. The pen with which the Pope signed and dated the first document of the twentieth century was a present from the citizens of Naples. It is of gold, mounted with precious stones.

#### Law of Plant Food.

The following four axioms were announced by Liebig, a noted German agriculturist and chemist:

1. "A soil can be termed fertile on ly when it contains all the materials requisite for the nutrition of plants, in the required quantity and in proper form.

these ingredients is removed. A part of this portion is again added from the inexhaustible store of the atmosphere; another part, however, is lost forever if not replaced by man. 3. "The fertility of the soil re-mains unchanged, if all the ingred-ients of the crop are given back to Such a restitution is e

the land.

lected by manure. 4. "The manure (ordinarily) produced in the course of husbandry not sufficiently to maintain perman ently the fertility of a farm; it lacks constituents which are annually exported in the shape of grain, hay milk and live stock.

milk and live stock.

Commenting on No. 3, we will say that a soi! that is producing can not remain stationary in fertility. If none of the products are removed, the soil will become more fertile, the soil will become more fertile. in better condition to produce and This improvement will be more rapid with some crops than with others. Notably, the legumes are rapid improvers of soil.

The above axioms may be consider-

uoes not know the law, or, knowing it, and transgresses, will not be an

up-to-date farmer.

Trades for the Blind. At a recent conference on matters relating to the blind, held at London, a member announced that he had sent out papers to 100 institutions at home and abroad asking what trades and occupations they recom-mended for the blind. The following was the list obtained, in order of merit: Basket, brush, and broom making, piano tuning, mat weaving, chair caning, music (in all branches), mattress making, knitting, typewriting, legal and clerical work. As new employments he suggested telephone exchange work, linotype typesetting, reporting, gardening (for the partially blind), massage, lecturing, commercial agencies, organ blowing, bell ringing. In the discussion which followed much time was given to the question of massage, several doctors speaking in favor of it. In regard to typewriting, it was mentioned that such an office had been started in Birmingham. Four blind girls are now employed. They made £250

last year.

Raising Chicks. The old fashioned hen is used for brooding the chick by E. C. Tefft, a successful Rhode Island poultryman. He takes great care to have the young chicks protected from dampness, and feeds the following mash, upon which they seem to thrive: For picks up to six days mash two boiled eggs with one pound of crackers.

feed once in three hours, adding a ew rolled oats. From one week to six weeks old, give one-third meal, one-third chops, ne-third wheat bran. To a peck of food add one quart of beef this dry scraps. Mix this with cold water and bake into a bread. Mr. Tefft ad-vises, and whoever uses them should always follow this advice, the use of he best beef scraps on the market. The mash is fed in the morning. For noon and evening, he feeds a mixture of equal parts of corn and wheat.

### MANY MATTERS

Continued From First Page. the use of the Delahunty lots in Wood's survey, for the purpose of de-

positing tin cans and refuse. On motion it was decided to draw on Walkerton for \$50 for small-pox tents sold that town.
Inspector Mounteer reported that

there was only one case of scarlet fever in the city.

The Medical Health Officer reported in favor of amending the public health by-law in regard to the distance of

chicken pens and cow stables form dwelling houses.

On motion the chairman and city clherk were instructed to draft a bylaw in accordance with the recondations of the Health Officer.
