

A Perfect Roofing —AT THE— Lowest Possible Cost.

This roofing has been found to be in a perfect condition after being on a roof for over 20 years. It is absolutely fire proof, and presents an attractive appearance.

Samples can be seen at the Office of the undersigned, and estimates and illustrated pamphlets will be promptly furnished upon application— W. M. DRADER, Sole Agent, Drader's Mills, Queen Street, Chatham.

BOTTLED MILK, CREAM AND BOTTLED BUTTER-MILK

The Maple City Creamery will deliver bottled milk on and after Tuesday morning, and respectfully ask for a trial order.

The milk will be bottled as soon after milking as possible, so our customers will get all the cream the cow puts into the milk.

Our bottles are all full imperial measure, and will be thoroughly washed every day and filled by machinery, and when the caps are put on no STRAIGHT DUST can get in and NO CREAM can get out.

Our bottles are all full imperial measure, and will be thoroughly washed every day and filled by machinery, and when the caps are put on no STRAIGHT DUST can get in and NO CREAM can get out.

SUNSHINE FURNACE advertisement with technical diagram showing boiler rivets, cup joints, and automatic gas damper.

And that's not all! The top of the dome is fastened to the sides with cement and boiler rivets, making the Sunshine just as smoke, gas, heat and dust tight as a steam boiler.

Notice, too, the Sunshine is equipped with an automatic gas damper. This damper automatically opens when the gas in the furnace reaches a certain pressure and allows it to escape up the chimney.

Safe as well as most healthful, easiest managed, cleanest, greatest labor-saving and fuel-economizing furnace you can buy.

If your local dealer does not handle the Sunshine write direct to us for free booklet.

DOVER CENTRE. Following is the report for April for S. S. No. 11, Dover:

Class V.—M. Jackson, H. Brown, Sr. IV.—J. Martin, I. Jackson, B. McKnight, F. Asher, O. Dunlop.

Sr. III.—W. Brown, W. Stokes, Jr. III.—B. Asher, O. Brown, E. Jackson, E. Tiffin, R. Stevens, P. Mills, E. Stevens, G. Heath, I. Heath.

Sr. II.—A. Martin, M. Nelly, A. Winter, H. Coran. Pt. II.—L. Stevens, E. Brown, B.

Kennedy, E. Montgomery, S. Stevens. Sr. I.—A. Martin. I. C.—B. Montgomery, F. Dunlop, C. Heath.

I. B.—W. Graham, B. Jackson, H. Jackson. Jr. I.—A. Jackson, H. Coran, V. Burks. Average attendance, 37. Dora McKerrall, Teacher.

Of plain sound sense life's current coin is made. Constancy is the complement of all other human virtues.

A PRINCE OF DWARFS. Career of the Famous Count Joseph Boruwaski. The most famous dwarf who has flourished in the British Isles is undoubtedly Count Joseph Boruwaski, whose long life— he died at the age of ninety-eight years—is another example of the longevity of his kind.

Boruwaski's last days were spent in peaceful retirement in the city of Durham. He tells us that in spite of the theory that dwarfs grow all their life he never added a quarter of an inch to his three feet three inches.

Poland was my cradle, England is my nest, Durham is my quiet place Where my weary bones shall rest.

He had known Marie Antoinette as a child, and he was living when Queen Victoria was crowned. It is in the Church of St. Mary the Less at Durham, close to the cathedral, in which his body lies, that you read the following inscription:

"Near this spot repose the remains of Count Joseph Boruwaski, a native of Pokucia, in the late kingdom of Poland. This extraordinary man measured no more than three feet three inches in height, but his form was well proportioned, and he possessed a more than common share of understanding and knowledge.

After various changes of fortune, borne with cheerful resignation to the will of God, he closed his life in the vicinity of the cathedral on Sept. 5, 1837, in the ninety-eighth year of his age."—P. T. O. of London.

A TORNADO. The Spiral That Connects the Earth With the Clouds. While in Kansas a few years ago I had a very clear view of a tornado.

It was about ten miles distant, passing swiftly over the prairie. It presented the appearance of a long rope about two feet in diameter. It extended from a dark, irregularly shaped cloud to the earth and was slightly curved.

It was of nearly uniform thickness and leaned about thirty-five degrees from a perpendicular toward the cloud. A line drawn from where I stood to the cloud would have made an angle of about forty degrees with the earth's surface.

After this ropelike projection had parted I noticed in the irregular cloud a perfectly shaped spiral of silver whiteness. It was shaped like a great auger and extended from the point where the funnel or rope had been connected with the cloud forward in the direction the cloud was moving.

All around it was in wild commotion, but the spiral itself seemed to stand like a great white ribbon coiled auger shape and fixed secure. This spiral at the time I caught sight of it was lying in a nearly horizontal position, the forward end being only slightly elevated.

I have never met any one who has seen this spiral in the tornado cloud, but by one who came dangerously near being caught by a passing tornado I was told that the center of the whirling funnel was as white as milk. From his statement, taken in connection with my own observations, I have formed the opinion that the center of all tornadoes is a perfectly shaped electrical spiral and that when in operation it connects the earth with the cloud.

It is manifest that such a spiral would give the middle of the tornado funnel a white appearance. But it is not likely that one looking at it in its upright form would detect its spiral form. Indeed, it would have to turn itself in a most favorable position in order to reveal to the eye of the observer its spiral form.—Scientific American.

A Stamp Menagerie. A very complete menagerie may be formed from a collection of postage stamps having animals, birds and fish as the central figures. The animals represented are lion, tiger, elephant, giraffe, jaguar, camel, hippopotamus, buffalo, bear, leopard, dog, kangaroo, deer, horse, cow, llama, goat, monkey, donkey, beaver, duckbill, seal, sable, gorilla, cobra, crocodile, tortoise. The fowl family is represented by the peacock, owl, heron, eagle, parrot, turkey, snipe, swan, goose, quail, dove, hula-bird, emu, pheasant, lyre bird, apteryx, torea. Of fish there are but two—the cod and carp. The insect kingdom has one representative in the butterfly, nestling in the culture of former Queen Lillibuland.—Frank J. Stillman in St. Nicholas.

Pain in the Back? That's Kidney Trouble. Backache is the first and surest sign of kidney trouble. Pain is nature's danger signal that something is wrong. Pills have reached the kidneys and bladder—and that they are healing and curing these organs.

CHATHAM TOWNSHIP. Following is the report of standing of pupils of S. S. No. 6, S., for April names in order of merit:

Class V.—L. Nichols. Absent—E. Stark, D. Henry. IV.—B. Moir, E. Oliver, H. See, F. Wicks, D. Moir, E. Bowers, A. Moore.

S. S. NO. 8, HARWICH. The following is the report for S. S. No. 8, Harwich, for April. Names in order of merit.

Class V.G. Donovan, E. Clunis, F. Nash. Class IV.—L. Smith, M. Tedford, S. Johnston, F. Smith.

Class III.—E. Donovan, N. Clunis, J. Neilson, R. Nash, N. Remington.

Some people seem to think that loud talk makes a sound argument.

100,000 People were kept warm and comfortable last winter by Hecla Furnaces. They chose the Hecla in preference to all others, because it is the only furnace that cannot leak gas, smoke or dust into the house through the joints between the iron and steel.

Hecla Fused Joints, which are covered by patents and which are used exclusively in Hecla Furnaces, guarantee this sanitary and healthful condition. There are no bolts to work loose or cement to dry and drop out.

Water Pan is placed where it will evaporate the right amount of water to keep a springlike atmosphere in the house. Fire Doors—large enough for any fuel and fitted with Gravity Catches which can never be jarred open.

Ash Pan—large and roomy. Clare Bros. & Co. Limited Preston, Ont.

Couldn't Be a Purer Flour Than "Kent Mills" Gold Medal

ONLY the best Manitoba and Ontario Red Winter Wheat are used in the production of "Kent Mills" Flour.

Before being ground the grains of wheat are thoroughly cleaned, dusted and scoured by special machines.

All the sand, dust, light grains, seeds and other foreign substances, which are always present to a more or less degree when wheat is delivered at the mill, are left behind when the wheat starts on its journey to be crushed into flour.

By our improved process of milling the hard, fibrous bran and cellulosic coats are so carefully removed from the starch and gluten cells, which are crushed into flour, that there's not the remotest possibility of a single atom of these impure and indigestible substances remaining in "Kent Mills" Flour.

Just as careful to keep every particle of the germ out, too. It may be useful in a breakfast food, but it impairs the keeping qualities of the flour.

And to make absolutely sure of every impurity being removed the flour is sifted through the finest silk cloths, which costs more dollars a yard than you would probably think of paying for even a ball dress.

It is because we are so careful in every step of the selecting of the wheat, the milling and the blending that we are able to produce a flour so immensely superior to all others.

A flour that is absolutely pure, always uniform, that will not dry out soon, but will keep fresh longer than any other.

A flour that will make more and better bread and pastry to the barrel than the best Manitoba patent. Every bag or barrel "Kent Mills" Flour guaranteed by both the manufacturer and dealer.

"Kent Mills" Flour Canada Flour Mills Co., Limited, Chatham, Ont.
