Income Tax Return

on or before the 30th of April, 1920.

Dominion of Canada

Department of Finance

ALL persons residing in Canada; employed in Canada, or carrying on business in Canada, are liable to a tax on income, as follows:—

1. Every unmarried person, or widow, or widower, without dependants as defined by the Act, who during the calendar year 1919 received or earned \$1,000 or more.
2. All other individuals who during the calendar year 1919 received or earned \$2,000 or more.
3. Every corporation and joint stock company whose profits exceeded \$2,000 during the fiscal year ended in 1919.

Forms to be used in filing returns on or before the 30th of April, 1920.

ALL INDIVIDUALS other than farmers and ranchers must use Form T 1.

FARMERS AND RANCHERS must use Form T 1A.

CORPORATIONS and joint stock companies must use Form T 2.

Penalty

Every person required to make a return, who fails to do so within the time limit, shall be subject to a penalty of Twenty-five per centum of the amount of the tax payable.

Any person, whether taxable, or otherwise, who fails to make a return or provide information duly required according to the provision of the Act, shall be liable on summary conviction to a penalty of \$100 for each day during which the default continues. Also any person making a false statement in any return or in any information required by the Minister, shall be liable, on summary conviction, to a penalty not exceeding \$10,000, or to six months' imprisonment or to both fine and imprisonment.

PAINT LENGTHENS LIFE OF BUILDINGS AND MACHINES

Many an old ship has stood the racket of ocean travel for years mainly on the strength of the tar or paint applied to her sides; but sailors do not wait for the ship's hull to become weather beaten before applying the first coat of paint. Farmers, on the other hand, seem much inclined to let their buildings reach a state of partial decay before making any special effort to safeguard them against the play of wind and water. As a matter of fact, nothing says better than paint applied immediately after the building is constructed, in lengthening the life of the structure. The same applies to farm machinery parts especially the wooden parts and it will always pay to paint such repairs to machinery wagons, etc., as have to be made before the work season for these articles commences.

Good paint applied to farm buildings and machinery, not only prevents the good management employed in serving them, but calls attention to running the farm, a fact that helps greatly in case the owner wishes to sell either the farm or some of its products. Many farmers have paid so much attention to the economic value of their farm that they have neglected an important side of farm life. There is no reason why the farmer and his family should not have as attractive a home as attractive as the city dweller has. The farmer's neighbors as well as the passing observer, will judge him largely by the care he takes of his stock, his machinery, and his buildings.

Painting is the easiest and least expensive way of making sure of neat clean surroundings, and is the best way of preserving the lumber in buildings, implements or machinery. With spring approaching, the time has arrived for going the rounds of the machine shed to lick out these articles that can be moved to a warm building for retouching with paint in addition to their annual overhauling and repair.

Seattle and Toronto All-stars played an exhibition game Saturday night. The score was 9 to 9.

SPRING CALF FEEDING

How to Feed and Handle the Young Arrival.

The Dam's Milk the Best First Food - Skim Milk Should Gradually Replace Whole Milk - Grass of Stable for Calves?

Contributed by Ontario Department of Agriculture, Toronto.

THE calf that comes in the spring, comes just at a time when everybody is so busy getting the spring work done that he is very liable to be neglected to a certain extent. Young calves are very susceptible to disease compared to young cattle and a little lack of attention to spring calves is liable to cause serious trouble to them.

There are two menaces to calves in spring and summer, and those are extreme heat and flies, and one is on a par with the other. Arrangements should be made whereby the calves are kept in during the day and allowed to run out in a paddock at night. By this means they are afforded a liberal amount of exercise and good pure fresh air, and also they are allowed to get some of the nice juicy green grass, which is the nearest thing to a complete and balanced ration that can be found outside of milk.

When the calf is dropped it may be well to leave it with the dam for a few hours in order that it may get the first milk (or colostrum) which is so necessary on account of its actions on the digestive tract. When the calf has received sufficient colostrum to set up the necessary action it should be removed from its mother into a separate stall, or it may be put into a stall with other calves of the same age or nearly so. If, by any chance, the cow's udder is inflamed, the calf may be left for a few days, because of the beneficial effect that the calf's punching has upon it.

For a few days the calf should be fed whole milk, but when it is two to four weeks old a change should be made, skim milk gradually replacing the whole milk, from eight to ten days taken for the change. When the whole milk is totally replaced the milk may be increased to eighteen or twenty pounds per day for a calf six weeks old. The best kind of skim milk for calves is warm, just when it leaves the farm separator. However, scours may not have a separator, and then this is not possible. In any event the system started with the calf should be followed as nearly as possible at all times, because of the danger in diet a calf sure to cause severe digestive troubles. Pails and all feeding utensils should be kept very clean to eliminate any danger of disease from bacteria that might be lurking within. Skim milk feeding may be continued as long as it is thought advisable, up to eight or ten months old. Good quality fresh hay may be weaned as early as three months old, providing good substitutes for the milk are used.

The most frequent trouble in raising calves is indigestion or common scours. This trouble is usually caused by overfeeding, feeding milk too cold, feeding milk heavily laden with the disease germs, or by keeping the calves in a dark, dirty, poorly ventilated quarter. The calves should be watched carefully, and if they show signs of scours, immediate steps should be taken to effect a cure. The ration should be reduced and a little lime water put into the milk. If immediate action is needed, about one-half cupful of strong black tea, or some castor oil should be given. As for meal for the calves, rolled oats are good, and if they are getting no whole milk a little linseed oil cake should be added. The oil cake has a laxative property as well as supplying a little fat to the ration. A good meal for calves: 100 lbs. of ground oats, 50 lbs. bran and oil cake (nutted) 25 lbs. Good clover hay is essential at all times, giving enough to allow the calves to pick out the nice succulent parts, and still not be wasteful. J. C. McBeath, O. A. College, Guelph.

Should Calves Go Out to Grass or Remain in the Stable?

Generally speaking, calves are better kept in the stable during the first summer, except where the conditions are not good, and where there is not enough labor to look after them and keep them dry and clean. The only other exception is in the case of calves dropped in the early winter and which have had three to six months of milk and more or less dry feed. Such calves may be all right, if turned out to grass as soon as the pasture is good and the weather warm and pleasant. Particularly in this case where milk and other feed is scarce on the farm. The chief advantages of keeping calves in the stable, the first summer are:

1. They can be fed milk and other feeds as required, which is often neglected when calves run with the cows, or are pasturing some distance from the barn.
2. Calves in a clean, well-ventilated stable are protected from the hot sun, storms and flies, which often prevent that good growth which is essential for a well-nourished thrifty calf.
3. If allowed to run with the herd, the older animals are likely to "boss" the calves and may injure them, or deprive them of their proper share of feed.
4. Cases of sickness, such as indigestion or "scours" are more likely to be noticed, and properly treated, if the calves are inside where they are seen frequently.
5. As a result of this better care and feed, better cows are more likely to be reared, which means larger returns to the owners of cows. Prof. J. H. Dean, O. A. College, Guelph.

The ex-Kaiser has suspended his wood-sawing operations during the visit of his daughter, the Duchess of Brunswick.

Where You'll Find Fire Boxes

The latest revised list of the number and location of fire alarm boxes is given below. Residents are advised to clip the list and keep it for reference in case of fire:

- 3—Packard Electric Works, Race Street.
 - 4—Central Fire Hall
 - 5—Police Station, Park Street
 - 6—Catharine and Edmund Sts.
 - 7—Pelham Road and Chetwood Street
 - 8—Brewery and St. Paul Sts.
 - 9—Neptune Hose Hall, St. Paul St. West
 - 12—Yate and Trafalgar Streets
 - 13—Yate and Ann Sts.
 - 14—Church and Ontario Sts.
 - 15—Queen and Duke Sts.
 - 16—Welland Ave. at Lake St.
 - 17—Ontario and Welland Ave.
 - 18—Lock 2, Welland Vale
 - 21—St. Paul and Geneva Sts.
 - 23—Queenston and Calvin Sts.
 - 24—Queenston and John Sts.
 - 25—Thorold Road at Whitman & Barnes plant.
 - 26—Queenston St. and Westchester Avenue
 - 27—Queenston St. and Vine St.
 - 28—Vint St. at Railroad Crossing
 - 29—Page and Davidson Sts.
 - 31—King and Academy Sts.
 - 32—Church St. near Court St.
 - 34—Welland Ave. and Court St.
 - 35—Church and Geneva Sts.
 - 36—Welland Ave. and Geneva St.
 - 37—Welland Ave. and Niagara St.
 - 38—George and Derby Sts.
 - 39—Lyman and Raymond Sts.
 - 41—Niagara St. and Canal Bridge
 - 42—Wiley St. and Russell Ave.
 - 43—Geneva and Daotah Sts.
 - 45—Russell Ave. and Rodman St.
 - 46—George and Albert Sts.
 - 47—Lake Ave. and Dufferin St.
 - 48—York and Louisa Sts.
 - 51—Ontario and McKinnon Dash
 - 52—York St. and Lowell Ave.
 - 53—Lake St. Fire Hall.
 - 54—Thomas and Louisa Sts.
 - 56—Henry and Elizabeth Sts.
 - 57—Facer and Currie Sts.
 - 61—Queen and King Sts.
 - 62—St. Paul and Queen Sts.
 - 63—Maple Leaf Milling Co's. Office, St. Paul St.
- In case of a general alarm the city bell will ring as follows: 1—12—123—twice, followed by the number of the box from where the alarm is being rung.

What Makes a Good Hardware Store?

Not alone the large plate glass windows on the main street, nor the fine showcases inside, nor even the genial, friendly proprietor.

The QUALITY OF THE GOODS sold is what really tells, and brings you back again next time.

That's just the case with the famous Hobbs Gold Medal Lines. The store that carries goods bearing this mark is a good store to trade at.

Look for the Gold Medal label on Harvest Tools, Garden Tools, Lawn Mowers, Sewing Machines, Washers and Wringers, Refrigerators, Cutlery, Binder Twine, Roofing, Saws, Sporting Goods, etc.

THE universal desire to make Easter breakfast a really delightful meal, is easily fulfilled by housewives who use

Swift's Premium Hams and Bacon

A few slices of this mild, delicately-cured ham or bacon—cooked to a tempting brown—served sizzling hot—make a meal the whole family will enjoy. For Swift's Premium is outstanding in excellence: the Ham, because of its extra mild cure and juicy tenderness; the Bacon because of its succulent fat and enticingly flavored lean; and both because of their characteristic savouriness due to the exclusive Swift process of selection and curing.

Save Swift's Premium on your Easter breakfast table and we know you will insist on this brand in future.
