Manufactured only at Professor HOLLOWAY'S Establishment,
78, NEW OXFORD STREET, (late 533, OXFORD STREET), LONDON

MOWAT SPEAKS.

In Loyalty to the Policy of Unrestricted Reciprocity and for British Connection.

The Globe of 14th inst. contains a letter from Hon. Oliver Mowat, premier and attorney general of Ontario, addressed to hon. Alex. Mackenzie, dealing at considerable length with the questions of reciprocity and annexation and embodying an exhaustive review of the political situation. He begins his letter in the following terms:

My honored and dear friend: You and I are among the oldest Canadian liberals still in public life. Throughout our time, and for long before, the principles of the liberal party have been British connexion, special interest in all that concerns the masses of the people.

MERCIER AND QUEBEC.

His Reply to Angers - Ten Thousand Attest to His Popularity.

Quebec, Dec. 18.—Ex-premier Mercier made public to-day the interim report of the royal commission which investigated the political situation in Quebec, and on the strength of whose findings Mr. Mercier was dismissed from office, together with hon. Anger's letter of dismissal and the ex-premier's reply thereto.

FARM AND FIRESIDE.

Timely Hints Useful to the Farmer and His Household.

BUTTER MAKING.

Allow your cows to get nothing but the purest water, and as much of it as they can drink at least twice a day. The milk from our common Canadian cows when grass-fed contains 87 per cent water. The cow has no filter in her purify water, and if the water is impure the impurity goes straight into the milk. If a cow drinks 100 lbs. impure water 87 per cent of the impurities of that water will be found in the milk. Never allow your cows to drink water you would not drink yourself. We will take it for granted that the man has done his part, that is, he has got the right breed of cattle and has fed and watered them properly. Next comes the woman's part, and first the milking, which should be done with clean hands. The cow's udder should be either washed or brushed off clean before commencing to milk, and the milking should be done into tin pails. Strain as soon as possible after milking. Use a strainer eight inches in diameter and twenty inches long. Add enough warm water to bring it up to 90° fah. and place it in ice-water sufficiently cold to bring it down to 40° fah. In the summer the cream will be at the top in twelve hours, while in winter it will require twenty-four hours. Skim with a creamer. Put the cream into a crock or tin can, and let it below 55° fah. until you have enough cream to churn. Twelve hours before you have enough cream to make a churning, take half a gallon of cream, heat it to 80°, and keep in warm place to ripen; wash all the cream in a wooden tub through a cloth, and hang it in the churn and strain the cream through it. If the customers desire the butter without coloring, give it to them so; but if they desire it colored, then use coloring.

BE A MAN

Lesson in the coils of the fatal serpent was not more helpless than the man who pines under the effects of disease, excess, overwork, worry, etc. Rouse yourself. Take heart of hope again and BE A MAN! We have cured thousands, who allow us to refer to them. WE CAN CURE YOU by use of our exclusive methods and appliances. Simply, unfeeling treatment at home for Lost or Falling Manhood, General Nervous Debility, Weakness of Body and Mind, Effects of Errors or Excesses in Old or Young, Robust, Noble Manhood fully restored, Improvement seen the first day. How to enlarge and strengthen, WEAK, UNDEVELOPED ORGANS and PARTS OF BODY. Most testify from 50 States and Foreign Countries. Write them. Book, explanation and proofs mailed (sealed) free. Address:

HOW TO PRESERVE POTATOES.

The French minister of agriculture publishes the details of the process in the official Bulletin of the Ministry of Agriculture for March, 1891. The following is a translation of the essential part of the scheme:

1. The method of preservation consists in plunging the tubers, before storing them away, for ten hours into a 2 per cent solution of commercial sulphuric acid in water; two parts of acid to 100 parts of water.
2. The acid penetrates the eyes to the depth of about one-fourth inch (two millimeters), which serves to destroy their sprouting power; it does not have any appreciable effect upon the skin of the potatoes.
3. After remaining in the liquid ten hours the tubers must be thoroughly dried before storing away.
4. The same liquid may be used any number of times with equally good results.
5. A barrel or tank of any kind will do for the treatment. The acid is so dilute it does not affect the wood.
6. Chemical analysis shows that potatoes treated by this process are as nutritious and healthful after eighteen months as when freshly dug.
7. Potatoes thus treated are of course worthless for planting.—Gerald McCarthy, N. C. experiment station, Raleigh.

THE HEAD SURGEON.

Of the Lunatic Medical Company is now at Toronto, Canada, and may be consulted either in person or by letter on all chronic diseases peculiar to man. Men, young, old, or middle-aged, who find themselves nervous weak and exhausted, who are broken down from excess or overwork, or who are afflicted with any of the following symptoms: Mental depression, premature old age, loss of vitality, loss of memory, bad dreams, dimness of sight, palpitation of the heart, emissions, lack of energy, pain in the back, itching or peculiar sensation about the scrotum, wasting of the organs, dizziness, spots before the eyes, twitching of the muscles, eye lids, and elsewhere, bashfulness, deposits in the urine, loss of will power, tenderness of the scalp and spine, weak and flabby muscles, desire to sleep, failure to be rested by sleep, constipation, dullness of hearing, loss of voice, desire for solitude, excitability of temper, ranken eyes surrounded with leaden lids, eye looking sick, etc. are all symptoms of nervous debility that he can cure, and death is averted. The spring or vital force having been restored, every function works in consequence. Those who through abuse committed in ignorance may be permanently cured. Send your address for book on all diseases peculiar to man. Book sent free on receipt of name and address of which are faint spots, purple lips, numbness, palpitation, skip beats, hot flushes, red of blood to the head, dull pain in the heart which beats strong, rapid and irregular, the second heart quicker than the first, pains about the breast bone, etc. can not be cured. No cure, no pay. Send for book. Address M. V. LUBON, 24 Madison Ave, Toronto, Canada.

QUEER CHINESE WAYS.

The Chinese have queer ways of doing things. They boil their rice in flat iron boilers so thin that they burn through very quickly. Some English makers thought the boilers would be thicker, and sent some thick ones there, but the Chinese refused to use them, saying that they were too thick, because, to get the rice boiling, they would have to spend more in fuel than would cost to renew the thin boiler.

NEW SARUM NOTES.

Dear Sirs—I have used six bottles of B. B. I took it for liver complaint. Before I took it I had headache and felt entirely well, but now I am healthy and entirely well. In addition I have a good appetite, which I did not have previously.
