most attention was the activity and strength of the Morgan stocks, such as Reading and Steels. On the other hand, for the first hour and a half, Southern Pacific and Union Pacific stocks, with which Mr. Harriman and Kuhn, Loeb & co. are identified, were dull, showing no rallying power. The buying of Southern Railway was particularly first-class security at the highest heavy, and it was thought that the orders were distributed by a prominent foreign house, which has often been connected with railroad transactions in the south. In Reading there was a resumption of so-called pool operations, while in Erie the buying was thought to be of an impressive character. Cov-ering of shorts was in evidence in Steel preferred. A favorable impression was created by the cessation of the heavy liquidation which was so noticeable yesterday, and by the absence of a pressure to sell. The mar-ket looks healthy and will in our opin-
