# SPECIAL TO THE DAILY BRITISH COLONIST

at one o'clock.

NEW WESTMINSTER, Feb 1 .- Council met

SATURDAY'S DESPATCHES.

Dr Helmcken gave notice that he would ask whether it was the intention of the Government to repeal the head tax and regulate the coasting trade; he would also move to introduce a bill to amend the Trade Licence Act.

The President said the Government would present the bill relating to Trades Licences The Council here adjourned to present the

reply to the Governor's speech, after which

the order of the day was resumed, Crease presented an indemnity ordinance for the Governor not enforcing the Stock and Harbor Dues Acts; passed first readingsecond reading on Monday. Also, an ordinance assimilating certain laws, which passed first reading; second reading on Tuesday. Crease did not touch the taxation question but said the ordinance having for its object uniformity of taxation would follow the amendment.

McDonald moved for an address to the Governor asking for a copy of instructions in regard to the constitution of the Council: car-

Crease brought in a customs declaratory ordinance, legalizing past and prospective collection of duties on goods from the Island, which led to a hot debate.

DeCosmos opened fire, accusing the mover of anticipating his motion, and argued at length on the illegality and injustice of the measure. He was willing to aid the Government, and would vote an indemnity for past acts, but not to perpetuate the wrong. On the same principle the Governer might colleet duties on goods passing from New West minster to Yale, or from Nanaimo to Victoria or between one store and another. It was admitted to be contrary to law and an outrage. He was, therefore, surprised that no mandamus had been applied for, or the Collector brought up under a writ of quo warranto to show his authority.

MacDonald expressed great surprise at the continuation of the illegal course, and that Government should seek to continue an act illegal in all its bearings.

Hamly maintained that the course was quite legal:

Helmcken protested against the measure as one of injustice and illegality, of which there was no question. He now felt for the first time the atter inutility of the representative members. A measure was carried by the Government members before it was introduced. There was no evidence that the illegal imposition was necessary; the question was one for the committee of ways and means. He warned the House against the serious consequences of the step; the people would lose all confidence in the Government, and there would be a strong opposition, not only to the measures, but to the Government and the form of Government.

Crease did not deny the doubt about the legality, but the question was one of expediency. The Governor took the first opportunity to ask the House to assist him.

Helmcken replied that he could not make Council a Court of Judicature to decide upon the legality of its Acts, and thought that the Government should consult the best legal authority.

Robson admitted the illegality of the collections, but would vote with the Govern

Young would vote for the first reading, as the bill was not yet before the Council.

The President thought the tax equitable for the time being. He had spoken to Victoria merchants who did not object. Money must be raised. Government had lost six thousand dollars on goods per Prince of Wales that were not landed on the mainland. The first reading was carried-Macdonald, Helmcken, DeCosmos, Pembertoncontra! Stamp, Walkem-absent. The second reading was set for Friday.

A motion by Helmcken to refer to the Committee of Ways and Means was lost. MacDonald's Municipal Bylaw Bill passed

first reading-second reading on Monday. DeCosmos' motion to suspend the collection of duties was deferred.

Council adjourned till Monday.

#### LOCAL INTELLIGENCE.

Saturday, Feb. 2. Later from Cariboo.

Mr Dodero, who arrived from Richfield last evening, reports that he was twenty-one days on the road. The weather was execreable, and the roads scarcely travelable, owing to the snow and ice. On Williams creek the claims were frozen up, and work was suspended. Snow to the depth of four feet lay on the ground. James Purdy, blacksmith at Richfield, was found dead in his bed on the 11th inst.; he had retired in good health

We have the Sentinel of the 15th January from which we learn that the remains of Honore Lion, who died in November last, were interred on the 13th January. George Wilson, the pugilist, has been appointed night watchman with a salary of \$175 per month. Carpenter Bros, cabin having been entered and robbed of several sacks of flour, Wilson went to search a Chinese house, when one of the celestials drew a knife upon him, and was committed for an assault with a deadly weapon. There was a rumor that a rich strike had been made somewhere. The colored people celebrated the anniversary of their liberation on 1st January; they were not unanimous on the subject, however. The admirers of Abe Lincoln met at the Parlor saloon; the apologists of Jeff Davis held forth in front of Dixie's shop: Characterise tic speeches were delivered by the speakers on each side.

SELLING OF HAIR .- The Municipal Council of the Department of Correze, in France, met recently and declared that the practice so prevalent of late years for the young wos hair in the market places of their respective villages was highly immoral, and therefore passed a statute forbidding the practice. The custom has been that those who wished to dispose of their chevelure should wear bright ribbons in their chignon, which were hair, it is for sale." Hair venders were then privileged to go up to the girl, untie the ribbons, examine the hair, and bargain as to its price. As soon as this knotty point was decided, the purchaser, armed with scissors, cut off his merchandise, leaving but a few short

RETURN OF A SCIENTIFIC EXPLORER.-Mr R: Brown, who was despatched four years ago on a roving commission to the countries lying on the Pacific slopes of the Rocky Mountains, under the auspices of some of the Edinburgh Societies, has again returned in sound health, and with a great store of scibotany, and the languages and history of the Indian tribes among whom he has been wandering. Mr Brown was selected in an early part of his career commander and Government agent of an expedition for the exploration of Vancouver Island, then as Desert .- London Watchman and Wesleyan

DE BISMARCK .- The Paris gossips, in their wrath with M. Bismarck, are circulating discreditable stories about him. His illness they attribute to abuse of alcoholic liquors. When he was about to start for the army savs one of their anecdotes, his son, a child, asked him how long he would be absent. The Count answered that he could not tell. At that moment his valet de chambre came into the room and asked him how many bottles of cognac he should pack up. "Twenty-four," said the Count. "Ah. papa!" said the terrified child, "it is for twenty-four days, then, that you are going The Hixon Creek Quartz Mill-A Letaway from ns "

PACIFIC INSURANCE COMPANY. - Mr J Robertson Stewart, the Victoria agent, has presented us with the annual report of the Pacific Insurance Company, San Francisco, from which it would appear that the affairs of the institution are in a highly flourishing state. During the year just ended, the income of the company was \$577,079 91: while the losses were only \$147,436 97. The managers of the company comprise some of the best and most responsible men of San

DEATH OF THE CASHIER OF THE BANK OF England .- Mr William Miller, who was appointed chief cashier of the Bank of England on the retirement of Mr Mathew Marshall in 1864, died on Thursday morning at the age of 57. Mr Miller, who entered the Bank, in 1829, has long suffered from the complication of disorders, including asthma, but the immediate cause of death was bron-

WOMANHOOD SUFFRAGE .- It is stated that committee has been formed, having for its object the abolition of the legal disability which at present debars women, as such, from voting for members of Parliament. It is proposed to present to Parliament during the ensuing session two petitions, one signe exclusively by unmarried women and widows qualified to vote in all respects except that of sex; and the other by persons of all classes, both men and women.

THE MUTINE-This war vessel will be sent South in a few days to relieve the Scout, now on the coast of Mexico.

#### RETURNED .- The Marsh and Pixley famlies returned from New Westminster last evening. They gave great satisfaction at the 'metropolis,' and are highly spoken of by all who witnessed their performances. We are sorry to learn that the engagement has not proved remunerative, but hope that better nck will attend the efforts of the worthy

artistes at the next entertainment here. THE GREAT RATTING MATCH.—This match ame off last night and afforded some excellent sport, Shirpser's dog Rose carrying off the stakes, After the match, the room was cleared, and the votaries of the noble art entered the arena; some friendly bouts succeeded, and the company separated, well pleased with their evening's amusement.

NEW FIRM .- Mr R. Brodrick has admitted Mr. Ed. Norton, late the popular purser of the Active, to a partnership in his business, and the firm will henceforth be known as Brodrick & Norton. Mr Brodrick, we hear, will leave to-day, and will be absent several months from the Colony. We wish him a pleasant voyage.

Only a Man Kilt-" Vat's de matter? vat's de matter?" exclaimed an old Dutchman, as he tucked up his apron and ran out of his shop to know the meaning of a crowd in his neighborhood. "Vat's the matter?" There is a man killed," said a bystander. Oh, ish dat all? shust a man kilt! Humph I thought it vash a fight!"

A CURIOSITY.-Mr Hammond, of Fort street, has just had prepared by Mr Bushell the horns and head of a specimen of the mountain sheep, taken on the Rocky Mountains of British Columbia, and which weighs men of Normandy and Brittany to sell their | 22 pounds. The horns at the base measure 14 inches in circumference. They will be forwarded to the Paris exhibition.

Police Court .- Yesterday, two wages cases, Brown v. Costello and Quinn v. Costello, were postponed for further hearing on Monday. Wm. Wright was in the dock, all synonymous with the words, "Look at my wrong as usual, and is trying a few hours o undisturbed repose in the police cells, failing the production of five shillings and costs.

> CRUEL-At a recent railroad dinner, in compliment to the legal fraternity, the toast was given, "An honest lawyer, the noblest work of God." But an old farmer in the back part of the house rather spoiled the effect by adding in a loud voice, "and about

FROM THE RIVER-The steamer Enterprise. with 40 passengers, returned last evening; among those on board we noticed Hon. J. J. Southgate, D. Leneveu, Esq., ex-Treasurer Franks, Mr Geo. F. Wilson, the Marsh and entific lore in geography, geology, zoology, Pixley families. Rough weather is reported during the trip.

> REPORTED ILLNESS OF THE PRINCESS DAG-MAR.—The Etendard announces that the Princess Dagmar is said to be attacked with typhus fever, and that Dr. Oppolzer, of Vienna, who prescribed for the late Czarewitch, has been summoned to St. Petersburg.

> THE DEFENCE of Mr Algernon Swinburne meets with a rather cool reception in London, and the Review even says of it: " He exhausts the language of wantonness, and recruits himself in a riot of blasphemy."

> THE FLY-The famous steamer Fly was sold by Mr McCrea yesterday for \$2700 cash-about one-tenth of the real value. Dougal Brothers were the purchasers.

Ex-OFFICIALS DEPARTING .- By the steamer to-day, ex-Auditor Wakeford and family will start for Australia; ex-Treasurer Franks tor England, and Mr Nesbitt for Bermuda.

## ter from the Projector.

MESSES. EDITORS :- I beg vou will insert

the following article in your columns: Having quitted Victoria for San Francisco, in order to learn the best means of obtaining a Quartz Mill, which I had the intention of erecting in Cariboo, where the ledges are very rich and in great number. I regret to say that from all I can learn, the expense of the necessary machinery, &c., will exceed my available means, and I find it difficult at the present time to secure the aid requisite to carry out so rich an enterprise, the share olders not having considered the information I have obtained at San Francisco sufficiently favorable. I proceeded to Grass Valley, a little city of which very little was thought 4 or 5 years ago, and which to day has 10,000 inhabitants, All this importance arises from the quartz mills which are established in the vicinity, which number from 50 to 60, almost all having their peculiar style of working in this place. I shall be enabled to acquire much knows ledge of this description of mining from seeing the various systems in active operation. The sum necessary for the purchase of a mill from the founderies at San Francisco. on the best system, with 10 stamps, capable of crushing from 24 to 25 tons of quartz per day would be \$3,000. I engage myself to take for my part a large number of shares, if that will be sufficient to secure for me the confidence of the public. I, however, leave those interested to act as they may think proper, and will esteem myself acquitted by the expenses I have already disbursed: It will be much to be regretted, if those who are interested in the progress of the Colony, should lose so excellent an opportunity to aid in its progress from a disinclination to aid one who is seeking to add to its welfare by carrying out the scheme above referred

MRS SUTRO, Pandora street, between 11 and 3.

# Scrofula, or King's Evil.

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by magnification of the control of the proportion of the control by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy nnhealthy 100d, Impure air, fifth, and fifthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

of the fathers upon their children.' Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks they have far less power to withstand the attacks of other diseases: consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the

cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

#### AYER'S Compound Extract of Sarsaparilla.

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disor-der from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DIS EASES, ST. ANTHONY'S FIRE, ROSE, OF ERY SIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER, and SALT RHEUM, SCALD HEAD, RINGWORM RHEUMATISM, SYPHILITIC and MERCURIA DISEASES, DROPSY, DYSPEPSIA, DEBILIT and, indeed, ALL COMPLAINTS ARISING FRO VITIATED OR IMPURE BLOOD. The popul belief in "impurity of the blood," is founded truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this San parilla is to purify and regenerate this vital flu without which sound health is impossible
