

liers' Day, Watford, Wednesday, 120. Reserve the date.

mas Lucas, of the Lpudon road, Wyoming, is one of the oldest, if not the oldest Orangeman in the county. He is 93 years of age, has been a member of the Orange Order for 70 years. Despite his age his eyes are still clear regarding events of seventy years ago. Mr. Lucas will be shown during the Big Orange celebration in Strathmore, August 23rd to September 6th.

nto has been selected as the disson depot for the Canadian war s. Three score carloads of trophies have been assembled and will eventually be sent to the museum at Ottawa or other cities and towns throughout the province. Meanwhile, they are at the Canadian National Exhibition, where they will be shown during the Big Orange celebration in Strathmore, August 23rd to September 6th.

g the word of Fred Richardson, all over the province as a horse-breeder of horses has been mentioned by the Ontario farmer because it makes money more readily in other stock. "It won't be long before there is a horse famine," he said. "I have about 170,000 fewer horses than a good horse is worth from \$325 in the market, but you can't animals."

sastrous fire occurred Monday about midnight near Courtwright, a handsome brick residence of N. Neal was almost completely destroyed by fire. The alarm was given by a fireman a few minutes before 12 o'clock, and almost immediately responded to the alarm and in saving a quantity of furniture the cause of the fire is unknown, were no lights or fires burning in the house. Only the walls remain.

form calling for tariff reduction of flour and principal food products as well as on farm machinery, lumber, fertilizer, and similar goods was adopted at the National party convention in Ottawa, last week. The convention declared that the development of the Dominion's natural resources is imperative and that reduction of tariff rates is necessary to achieve this end and to materially reduce the cost of articles of general consumption. An increase of the British tariff to 50 per cent. of the general tariff is recommended. The selection of the tariff was made on Thursday, the day on the shoulders of Hon. King.

er was lamenting the other day that "conveniences" were destroying the sociability of country life. No longer meet and exchange news and gossip at the post office or on the road. The mail is delivered daily to the farmer's own gate. Farmers have business to transact by telephone instead of driving to the telephone booth. A five-minute drive formerly has taken an hour. A tendency is for the young people to leave the farm to go to town by auto in the evenings, instead of holding the telephone. The young people are coming to pass that families on adjoining farms and the young people ever meet, unless they go to the same church or to the Farmer's Club or Women's Club. Much as the telephone, rural mail and automobile are doing for the isolation of country life, they are bringing about is not all

DEFECTIVE SIGHT CAUSES EYE HEADACHES

We harp on this because so many persons suffer needlessly. Just as sure as the sun rises, the proper glasses will at once relieve your eye headaches. All eye headaches do not need the same lenses, but all eye headaches do need lenses, and our one thought, if you come here is, "to give you exactly the right lenses. Why suffer."

Ford

Electric Starting and Lighting

NO car has a better starting and lighting system than that now available to purchasers of Ford Cars. It is a Ford product, built into the motor—

- a positive starter as reliable as the motor itself;
- a powerful lighting system, uniform under all engine speeds.

On the open models—Touring Cars and Runabouts—it is **OPTIONAL EQUIPMENT**. On closed cars—Sedans and Coupes—it is **STANDARD EQUIPMENT**.

On all models the Ford Standard Magneto also provides ignition independent of the batteries. See the Ford car with this new equipment.

Ford Runabout \$660; Touring \$690
On open models the Electric Starting and Lighting Equipment is \$100 extra.
Coupe \$975; Sedan \$1175 (closed model prices include Electric Starting and Lighting Equipment).
These prices are F. O. B. Ford, Ont. and do not include the War Tax.

HOME-MADE ELECTRICITY.

How a Farmer May Utilize a Little River.

Why not more electricity for our farmers? Easy to get, and mighty cheap, it there be on the farm even a tiny stream.

There are scattered throughout the country innumerable brooks and streamlets capable of supplying enough electric power for all farm and domestic needs.

A brook ten feet wide, with an average depth of two feet and flowing two feet per second under a "head" of five feet, can supply ten horsepower continuously—enough to light the average farmstead and leave enough over to operate motors for many of the needs of power on the farm.

Electricity on the farm is as helpful to the farmer's wife as to the farmer. It may be so utilized as to relieve her of much drudgery.

The first thing for the farmer with a brook at hand to consider is how much power he requires. The unit of electrical power being the "watt." One horsepower is the equivalent of 746 watts.

To run a twelve-inch electric fan requires forty watts; a toaster, 400 watts; a four-inch disk heater, 450 watts; a coffee percolator, 500 watts; a small hot-water heater, 1,500 watts. Lights consume ordinarily twenty-five or forty watts.

To run a churn takes half a horsepower, a cream separator the same, a milking machine the same, an ice cream freezer the same, a washing machine the same, a grindstone half that much, a wood saw three horsepower, a hay press the same, a feed grinder five horsepower.

Even an insignificant streamlet may supply all the current needed on a farm, for lighting if for no other purpose, when properly harnessed. With storage batteries provided it can use all of its energy throughout the twenty-four hours in loading them—the power to be drawn off during only a few hours each day.

Hydro-electric outfits suitable for farm use are inexpensive, and their upkeep costs almost nothing.

Where Wood Is Money.

Who ever heard of wooden money? The only known currency of this kind is issued by the Hudson Bay Company, and circulates all over the vast territory controlled by that powerful trading concern.

It is a currency consisting of pieces of wood known as "castors," which are stamped with a die. These are accepted everywhere in that territory as cash, and are exchangeable for all sorts of supplies and commodities at the widely scattered stations of the corporation.

The area governed by the company is vast. In one straight line it extends as far as from London to Mecca; from King's Posts to the Pelly Banks is further than from Paris to Sarum. Over all of this region the corporation exercises a complete dominion, employing the native Indians, chiefly Ojibway and Crees, to collect the furs which furnish its revenue.

Hudson Bay is about two-thirds the size of the Gulf of Mexico. It is an almost landlocked sea, with 2,000 miles of coast line. More than 300 years ago Hendrik Hudson, trying to find the northwest passage, wintered there. His crew mutinied and set him adrift in an open boat with his son and seven others. He and his companions were never seen again.

The unit of value in that part of the world is a beaver skin. Two martens are equal to one beaver, and twenty muskrats are equivalent to one marten. The trapping is done in winter, and in spring the Indians bring the pelts to the stations, receiving in payment for them wooden money. With the latter they buy what supplies they need at the store maintained by the company at the stations.

A Bird Refuge.

The most important, and by far the largest in extent, of national "refuges" for the preservation of wild birds on this continent is a vast area in the delta of the Yukon river, proclaimed as such by an edict from the White House just ten years ago. It is even more beneficial to the birds of Canada than to those of the United States.

It is an area approximately equal to Massachusetts, and the most valuable feathered species concerned are wild geese and wild ducks, which breed there in countless numbers.

There is found the proper home of the "emperor" goose, the "white-fronted" goose, and many species of ducks which are sought as game in other latitudes.

The region is known as "tundra country"—devoid of trees, swampy, with many lakes, and of no possible usefulness for agriculture or any other purpose. If, however, the wildfowl are there safeguarded on their breeding grounds, it will be a permanent source of game and food supply for Alaska and the entire Pacific coast.

In order that this may come to pass, it is necessary that the birds shall be protected during the mating season against the wholesale slaughter which formerly was conducted by pot-hunters and alleged sportsmen from year to year—a method commonly adopted being to drive the helpless creatures into pens built for the purpose, where they were ruthlessly murdered.

COUNTY OF LAMBTON

Treasurer's Notice as to Lands Liable for Sale for taxes for 1919.

TAKE NOTICE that the list of lands in the County of Lambton liable for sale for the arrears of taxes by the Treasurer of the County of Lambton has been prepared by me and that copies thereof may be had in the office of the County Treasurer.

And further take notice, that the list of lands for sale as aforesaid is now being published in the Ontario Gazette in the issues thereof bearing date the 12th, 19th, and 26th days of July and 2nd day of August, 1919.

And further take notice that in default of payment of the taxes in arrears upon the lands specified in said list, together with the costs chargeable thereon as set forth in the said list, so being published in the Ontario Gazette before the day fixed for sale of such lands, being the 18th day of October A. D. 1919, the said lands will be sold for the taxes pursuant to the terms of the advertisement in the Ontario Gazette.

And further take notice that this publication is made pursuant to Assessment Act Revised Statutes of Ontario 1914, Chapter 195, Section 149 sub. sec. 3. Dated at Sarnia this 5th day of July, A. D. 1919.

H. INGRAM,
deputy Treasurer of County of Lambton.

Voters' List--1919.

Municipality of the Village of Watford, County of Lambton

NOTICE is hereby given that I have transmitted or delivered to the persons transmitted in section 9 of "The Ontario Voters' List Act," the copies required by said sections to be so transmitted or delivered of the list, made pursuant to said Act, of all persons appearing by the last revised assessment roll of the said Municipality to be entitled to vote in the said Municipality at elections for members of the Legislative Assembly, and at Municipal Elections; and that said list was first posted up at my office, at Watford, on 4th day of August, 1919, and remains there for inspection, and I hereby call upon all voters to take immediate proceedings to have any errors or omissions corrected according to law.

Dated at Watford this 4th day of August 1919.

W. S. FULLER,
Clerk of Watford.

The death of Mrs. Mark Walker, a well known and esteemed resident, occurred at her home near Glencoe on Saturday last, after a lengthy illness. Mrs. Walker was in her 69th year and leaves her husband and two sons, Isaac and Ernest.

Wash The Kidneys!

After Bad Colds or Influenza! Look to Kidneys and Bladder!

Owing to bad colds, over-eating or intemperance, or to the after-effects of influenza—uric acid and toxins (poisons) are stored up in the body and cause backache, lumbago, rheumatic pains and stiff joints. It is most essential that treatment be directed towards prompt casting out of the poisons from the body which cause these pains and aches. This means that the excretory organs—the bowels, skin and kidneys—should be excited to their best efforts. Every one should clean house—internally—and thus protect one's self from many germ diseases, by taking castor oil or a pleasant laxative such as Dr. Pierce's Pleasant Pellets, which are made of May-apple, aloes and jalap. Take these every other day. This will excite efficient bowel action. If you suffer from backache, irritation of the bladder and the kidneys, shown by the frequent calls to get out of bed at night, considerable sediment in the water, brick-dust deposit, perhaps headache in the morning, you should obtain at the drug store "Anuria" (anti-uric acid), first put up by Dr. Pierce.

To build up the strength and improve the blood, take an iron tonic such as "Ironite," manufactured by Dr. Pierce, to be had in tablets at drug stores, or some good herbal tonic such as Dr. Pierce's Golden Medical Discovery, made from wild roots and herbs without alcohol, and put up in tablets or liquid.
