## THE TORONTO GRAIN AND SEED CLEANER AND GRADER MFG. CO.,

(LIMITED)

are the Sole Manufacturers of

## ..THE TORONTO.. GRAIN AND SEED CLEANER AND GRADER.

This Implement has no equal for Cleaning, Grading and Separating all kinds of Grain and Seeds. It will be seen by the adjoining cut that it is entirely

**DIFFERENT FROM THE ORDINARY FANNING MILL,**  
both in construction and motion, and a short honest trial will quickly prove the difference and improvement in the quality of work done.

**THE TORONTO GRAIN AND SEED CLEANER AND GRADER** possesses many points of advantage over the old Timers now in use, which our limited space prevents from describing, but the closest inspection is solicited by Farmers and others who are interested in **CLEAN GRAIN AND SEEDS.** This Machine is practically indispensable to all Farmers and Grain and Seed Dealers who desire **PURE GRAIN AND SEED FOR FEEDING AND MARKET purposes.** It has more Screen Surface and more capacity for Fast Cleaning, Grading and Separating, than any other Fanning Mill made in Canada, and is easier to handle. The Toronto Grain and Seed Cleaner and Grader is supplied with or without Elevator, the Elevator, however, is a Time and Labor Saving Attachment and on the above machine works easily and surely without the slightest waste.

The following Certificate is from a very thorough and well known farmer, Superintendent of the Pontonia Park Farm of which Mr. W. E. H. Massey, President of the Massey-Harris Co., Limited, is Proprietor.

"Dear Sirs - I have thoroughly tested the Grain and Seed Separator which Mr. Massey purchased from you, and I am quite satisfied that it is the best Separator on the market. We have run it both by hand and by power, and it works well. Wheat cleaned thoroughly as it can be done by your Separator will easily sell for 25¢ more for seeding purposes than when cleaned by an ordinary fanning mill. I take pleasure in recommending your mill.

WM. PATTON, Superintendent."
