

SCOTT & MACMILLAN

14 and 16 Mincing Lane

TORONTO, Jan., 1896.

To the Medical Profession of Canada:

GENTLEMEN,—We beg to announce that we have begun the manufacture of Pharmaceutical Specialties.

This branch of our laboratory has been fitted with the latest and most improved machinery and appliances, and is under competent and experienced supervision.

We guarantee absolute purity of all drugs and chemicals used in the manufacture of our specialties.

All preparations are assayed and adjusted to proper strength, and, where possible, conform to the B. P., thus insuring uniformity of strength in each shipment.

Any medical man who has not been sampled by our representatives will confer a favor by dropping us a line, when the matter will receive our prompt attention.

Hoping to merit your confidence, we remain, sincerely yours,

SCOTT & MACMILLAN.

OAK BARK (QUERCUS ALBA).

"WHITE AND DARK."

Most Valuable Aqueous Astringent known to the medical profession, and superior to anything of its kind made. DR. J. MARION SIMS wrote of it in a personal letter under date of August 12th, 1871, in which he said, "I have used the Extract of 'White Oak Bark, Q. Alba,' to my entire satisfaction. I gave to one of my professional brethren some of it to test in his practice. After using it, he agreed with me that it was superior as a medicinal to the 'Hemlock Extract Pinus Canadensis.' I bespeak for this new 'Oak Extract, Q. Alba,' a cordial reception by the profession."

LAKEHURST SANITARIUM

. . . OAKVILLE.

THE attention of the Medical Profession is respectfully drawn to the uniform success attending the treatment of Alcoholism and Morphine Addiction at Oakville. A prominent medical man in Toronto has, within the last few weeks, paid a glowing tribute to its efficacy in the case of one of his patients who had long since lost susceptibility to the ordinary form of treatment employed, and whose life seemed to hang in the balance. Many come to Oakville in the last stages of the malady, yet of these but two cases in four years have proved to be beyond reach of our treatment, a record well deserving the thoughtful consideration of the profession.
