Drug Reports.

Canada.

Business is keeping up well notwithstanding the summer holiday season is on.

Quinine has been reduced in price four cents an ounce by all the manufacturers.

Santonine has advanced sharply owing to the almost entire failure of the worm-seed crop, it is now quoted at from \$2 75 to \$3 00.

Glycerine is a little easier. We understand a quantity of English glycerine, 1250, has been unloaded on the Canadian market.

Ipecac root is higher. Those posted expect to see the price about \$8.00 lb., present quotations are \$5.00 lb.

Turpentine has advanced, and we do not anticipate any immediate decline in price.

English Market Report.

LONDON, July 24th, 1899.

This is the dull time of the year and changes are usually of an unimportant

character. Sanotine, owing to the reported failure of the seed crop, has risen greatly in value. Carbolic and citric acids always stiffen up at this season of the year. Colocynth is dearer, and partial failure of the crop is reported from Gara. Ipecacuanha is declining, partly from the absence of demand and growing stocks. Camphor has been reduced a fraction, but the outlook is firmer. Bismuth, copper and mercurials are all reported firm and likely to advance. Quinine is flat, stale and unprofitable, the market hoping for higher prices but fearing the reverse.

RAPID TEST FOR ARSENIC.—The discovery of Giosio that penicillium brevicaule grows with extreme rapidity in the presence of arsenic, and then develops a penetrating odor of garlic, has been reinvestigated by Abba (*Munch. Med. Woch.*). The latter detected arsenic by this means in 150 hides from India in less than twenty-four hours, and he recommends it as the most rapid, reliable and cheapest test for detecting arsenic.
