Quinine is easier.
Castor oil much advanced: advices from Calcutta indicate still higher price

Opium and morphia firm.
Manufacturers of Kootenay Cure have advanced the price to old figures, wholesale \$12 per doz., retail \$1.50 per bottle

Moth camphor balls will be about the same price in 1897 as in 1896

Sulphate copper has advanced.
Carbolic acid a trifle higher.

Thymol shows an advance probable.
Jamaica sarsaparilla, lower.

From Schimmel & Co.'s report we glean the following in reference to essential oils:

On account of the large crop of anise seed in Russia the price of the oil is low, and likely to continue so

Oil cassia has declined in price, a good deal of adulterated oil is offered, some samples containing only from 50 to 60 per cent. of pure oil.

Oil cloves is unprecedentedly low, the price at which it is sold to-day by the producers being only one-tenth of its price in 1875.

Oil bergamot will probably be reduced in price very shortly, as the reports from producing districts show a large yield.

Oil lemon remains at former figures. The season's crop has been favorable.

Oil peppermint. The yield of American oil is largely in excess of last year;

English oil, about average yield; Japanese oil, very large increase. Prices will probably decline

Menthol is very low, the quotations being very much below those of last year. The production has been more than double the shipments of menthol from Japan during the first six months of this year, being 23,825 cattie.

England.

London, Eng., Nov. 27th, 1896.

There has been hardly so much trade done this month in chemicals and drugs. Cod-liver oil has not tended higher, in spite of the consuming period having arrived. Citric and tartaric acid, also cream of tartar, are easier, but carbolic has advanced. Belladonna and gentian roots are dearer. Cardamom seeds are scarce, and prices are rapidly advancing. Gamboge easier. Glycerin is firm; myrrh lower; opium quiet. Oils—caraway easier, cloves dull, peppermint advancing, star-aniseed easier. Otto—prices are now firmer. Vanilla will be offered at special auction. Santonin has advanced fractionally.

Isococaine—Benzoate of iso-ethyl-ecgonin, a quick local anæsthetic.

Soluble bismuth phosphate is a soluble preparation used as a remedy in cholera infantum.

The "hit" of the day in drug store advertising is that of placing where it will not fail to meet the eye a perfectly white card, in size, say, 6x8 or 8x10 inches, containing a brief, terse sentence, calculated to fix itself indelibly in the reader's memory. The epigram, of course, calls attention to some particular article.

The card must be spotless, of good quality, and be printed in the neatest style of the typographic art, with deep margins.

We would be pleased to receive orders for the printing of such cards from readers of the CANADIAN DRUGGIST.

THE BRYANT PRESS,
20 Bay Street,
TORONTO.
