Histogenetic System of Medicine.

ANOTHER Wonderful Recovery

I had **Hip Disease** when young, followed by **Varicose Veins** in my leg, which have been large ever since. For a long time I have had **Varicose Ulcers** and **Erysipelas** in my leg and ankle of the same side, which has **laid me up** a great deal of the time. I commenced treatment **last April** with **HISTOGENETIC MEDICINE** and have only had **one attack** since commencing treatment. I only took **two lots** of medicine and have been so much benefited that I have been **able to work all summer**. I recommend all so afflicted to try the treatment.

September 9, 1891.

JABEZ JOHNSTON, Pine Orchard.

THEORY—
The diseased
Regulating the body
cells and tissues of the
with the same proximate prin-
ciples and so on, which are
normally prepared in the body
by the glands.

All diseases successfully treated
by the new system of pure and
tasteless medicine. So-called
incurable cases preferred.

And Still They Come

My sight and general health have been failing for over two years with intense aching of eye-balls, sight blurred, eyes very weak and irritable. Could not read or write in the least without glasses. My feet and hands were cold. Indigestion and general derangement of the stomach. Anything stronger than soda biscuits would cause distress in my stomach. My head always ached when I got tired and that was very frequently. My whole nervous system was very weak. I was advised by a friend to try Histogenetic Medicine. I went to Toronto, Ont., and consulted your physician in the new Arcade, corner Yonge and Gerrard Sts., and the Dr. thought my case curable. I commenced treatment at once, and to my great surprise and delight in three days I felt better. My eyes did not ache nearly as much. My nervous system began to strengthen. Stomach gained tone and digestive power. All my symptoms soon improved. I continued the medicine one month and can now read and write without glasses. I feel well, sleep well, eat almost anything that is good. I have gained six pounds in weight. The only defect I notice at all is that I can use glasses to advantage when reading fine print, and I feel confident that a little more medicine will give still more tone to the nerves and that I will not even find it necessary to use the glasses. I never saw anyone more astonished than the Dr. when I called to-day and gave this well-earned testimony. The improvement is so great he did not know me.

Sincerely,

E. J. SPROULE, Springfield on the Credit.
