WILLOUGHBY (LADY)—A DIARY.

Purporting to have been kept by LADY WILLOUGHBY of Farham, in the Reign of Charles I. embracing some Passages of her Domestic History from 1635 to 1648. To give additional Interest to the work, it has been printed and bound in the style of the period to which it refers. Small 4to. 18s. boards; or in morocco, by Hayday, 2l. 2s.

"The effect of the great civil war, as it spread over the face of the country, gradually absorbing all domestic and personal interests and affections, and finally overshadowing the whole framework of society, is strikingly illustrated in this remarkable work. But although one of the most delightful books of its class in the language, it is less for the sake of the historical hints to be derived from it that this Diary will attract attention, than on account of the purity and spiritual beauty of the character it develops. As a picture of the in-door existence of the wife of a Parliamentarian of rank, the volume is also new and curious. It is both externally and internally characteristic of the subject and the period. It is printed in the fashion of the seventeenth century, in small quarto, the type formally imprinted in gold, and the whole bound in a rich antiquated style, in imitation of the old staff printed in gold, with which initials and illuminated books used to be covered. It is a most charming book for the drawing-room table. Above all, it ought to be read for its chastity of heart by every woman in England."—Court Journal.
