HIGHER PRICE FOR WHEAT EXPECTED

Attitude of U. S. Senate Has Bullish Effect on Coarse Grain.

Chicago, March 22.—Action of the United States Senate in favor of a higher guaranteed price for the 1918 wheat crop had a bullish effect today on the value of coarse grain. Chieffy as a result, corn finished steady at 1/20 to 3/20 net advance, with March \$1.27% and May \$1.26%. Oats gained %c to 3/20. In provisions, the outcome varied from unchanged figures to a decline of 221/20. It was evident from the outset that the corn market had been decidedly stimulated by passage of the Gore resolution to lift the wheat guarantee to \$2.50 from \$2.20. Traders were not slow to act on the theory that if wheat was worth 300 a bushel more, other cereals should command a notable increase. Aside from legislative chances, moreover, it was worthed out that the movement of the state of the sta mand a notable increase. Aside from legislative chances, moreover, it was pointed out that the movement of the corn crop had seriously diminished, and that primary receipts today were nearly 900,000 bushels less than on the corresponding day last week, whereas North American clearances for the week had more than doubled.

Oats, as well as corn, responded promptly to the senate action concerning wheat. In the late dealings, however, something of a reaction took place, owing to gossip that export interests had ceased bidding.
