TURBINA WAS AT FAULT CAPTAIN IS SUSPENDED

Result of Commissioner Spain's Inquiry—Harbor Speed Regulation is Declared Out of Date.

As a result of the inquiry into the Turbina-Primrose collision of Aug. 12, the commander Spain has suspended the certificate of Capt. Bongard of the former steamer for nine months from that date. Capt. Bongard holds a certificate of service as master of a foreign- and-act rigging sailing ship in inland waters. This certificate is endorsed to permit him to act as master of a steamship also, but Commander Spain finds that it does not entitle him to command a passenger steamer.

"He is not considered officially for this but to resume command of a passenger steamer he must possess himself of the requisite papers."

Both steamers are held to have been transgressing the harbor rules in the matter of speed, but the commission adds that the section which makes the four miles the limit is an impossible one and after twenty years of experience the Turbina, being the over-taking vessel, should have kept clear of the Primrose.

"It seems to the court," continues the report, "that it showed lack of judgment on the part of the master of the Turbina that he should have been unable within a distance of 3,000 yards to avoid a collision, which he himself, apparently, considered a possibility."

"The court also desires to point out to the Toronto Ferry Company that the system of not having a proper lookout on board the ferry boats, which is the same as her helm at the moment of striking was still hard a-starboard."

"The court also desires to point out to the Toronto Ferry Company that the system of not having a proper lookout on board the ferry boats, which is the same as her helm at the moment of striking was still hard a-starboard."

ment and harbor board, and no one in particular to enforce the law. Comm in his report agrees with the proposition of A. D. Church that the government should bring the act up to date. It is likely the harbor board will invite the department or Ottawa to discuss changes in the law to make the harbor board to enforce all laws. Controller Spence, who has made a good chairman this year, agrees that the harbor board should be increased. Dominion Steam-boat Inspector Evans has also reported about Toronto being the most peculiar congested harbor in Canada, and that several ships are not being enforced.

MUSTN'T BELIEVE THEIR OWN EYES

Wm. Jetty Still Refuses to Be Twin Brother's Scapgoat.

After a week of inquiry the police have failed to locate the twin brother of Wm. Jetty, whom he blames for the thefts for which he is now incarcerated. Jetty in his attempt to verify his family history said he and his brother were born on Dovercourt-road in 1883, but the parliament buildings' records failed to show it.

A Mrs. Holmes, with whom Jetty is alleged to have lodged, on Stracan-ave., positively identified him, but he declared that it was the first time he had ever set eyes on her. He also refused to recognize Mrs. Macdonald, a Toronto functionary, who said he had lodged with her under the name of Walker and had gone away without paying his bill. Other witnesses swore that they had known him, out of the corner of their eyes, and that he had been an impressive face and maintained that they were mistaken.

He was remanded for another week.

Annual Western Excursions, September 22 and 23.

From Toronto to Port Huron, Detroit, Saginaw, Bay City, Cleveland, Chicago, St. Paul, Minneapolis, St. Louis, St. Paul, Minneapolis, Grand Rapids, Drayton, St. Paul and Minneapolis. The direct service is via the Great Northern Railway. Every comfort en route. Tickets are valid returning until Oct. 9. Call at city office, northwest corner of King and Yonge streets, for tickets and full information.

Just \$12.40 to Chicago

Via the fast Grand Trunk express trains. Leave Toronto at 7:30 a.m., 4:40 p.m. and 11:20 p.m. Tickets are valid to return until Oct. 9. For tickets and reservations call at city office, northwest corner of King and Yonge streets.

MEETING TO FORMULATE PLAN TO LIFT EMBARGO

English and Municipal Bodies Interested in Cattle Trade to Hold Conference.

(Canadian Associated Press Cable.) London, Sept. 22.—Secretary Lyttelton, in his reply to Canada's question on the cattle embargo, referred to the enormous losses British agriculturists have suffered mainly by reason of the increased pressure of colonial and foreign competition. The minister said that the government is anxious to remove the embargo, but that it is necessary to formulate a plan to lift the embargo.

In summarizing a series of special articles from the Canadian press, the minister said that Canada is more protectionist to-day than the United States, has passed without question and we are inclined to think that unless this is clearly recognized by our importers it will be absolutely impossible to turn to advantage the very important opportunity of improving our trade relations with the Dominion as presented by the new import tariff.

COURTNEY HASN'T RESIGNED.

Ottawa, Sept. 22.—The report that J. M. Courtney, deputy minister of finance, had resigned is not correct. There is no resignation so far, and in the absence of Mr. Courtney, Mr. Courtney is acting as deputy minister.

Weak, Run-down, Worn-out Men.

I have the greatest invention of the age for weak, run-down, worn-out men; the surest and easiest cure for all nervous and chronic diseases. It is a powerful tonic and energizer, and it is the only medicine that will give you back your strength and vitality.

Why will you be weak? Why do you go on from day to day when you know you are losing your nerve force, your manhood—when you see a cure within your grasp? Do not delay a matter which is the key to your future happiness. Whatever your condition to-day, you will not improve as you grow older. Age calls for greater vital force, and the older you get the more pronounced will be your weakness.

Dr. McLaughlin's Electric Belt

will make you strong. It will send the life-blood dancing through your veins. You will feel the exhilarating spark warm your frame; the bright flash will come to your eye, and a firm grip to your hand, and you will be able to grasp your fellow-man and feel that what others are capable of doing is not impossible to you. This grand appliance has brought strength, ambition and happiness to thousands of men in the past year.

It is the one sure remedy for the cure of Rheumatism, Weak Back, Weak Kidneys, Weak Stomach, Varicose, Loss of Power in young or old, and similar ailments, as well as Dyspepsia, Constipation, etc. How can anyone remain in doubt as to the value of this grand remedy when you see so many cured by it?

MR. JEROME SANDLON, Ansonia, Conn., says: "I have been wearing your Belt a month and I am very much improved in health. I have gained over seven pounds in weight. Those pains have never returned since wearing your Belt. I have developed quite a bit of muscle and strength, and have had only one headache since. My bowels keep regular. I have been working very hard while using your Belt, so I think that it is a pretty good test."

MR. WALTER B. KERLER, Andover, Mass., says: "Your Belt has done me a world of good. It has freed me up all right, and I would not take twice what I gave for it if I could not get another. It is the most wonderful invention I have ever known. I don't want to say much more, but I will say that it is the only medicine I have used since getting it. Before getting it I could not work with rheumatism in my shoulder and back."

That is the money that I am after, because for every dollar I take I can give a thousand per cent. interest, and I don't want it at all until I have cured you if you will secure me. I have cured so many cases like yours that I can prove my claims to you, but if that proof is not enough I'll give you the names of men right near you—where you live."

If you are sceptical all I ask is reasonable security for the price of the Belt, and you can wear it until cured and pay me when the work is done.

CAUTION.—Don't be misled by imitations. Remember that electricity must be properly applied to cure, and that for your case there is but one way to apply it properly. Without that you might just as well not use it at all.

Call To-day.

Free Consultation. Book. If you can't call send coupon for free book.

CANADA AND JAMAICA.

It is not often, even in these days of forecast and probabilities, that a newspaper writer finds himself a prophet. Yet such has been the rare fortune of the present writer, who in your issue of July 30 last pleaded for and prophesied the starting of a Canadian West India Fruit Company, and on Aug. 30 finds one started; a company that at least goes a long way towards the ideal, and presents it only undertaken to produce fruit and only works in Jamaica.

It is therefore with much personal satisfaction as well as honest hopefulness that I write again to show the reasonableness of hoping for good prospects on the lines of the company. I do so as one having no pecuniary interest in the concern, and as quite ready to criticize or caution if either be necessary. While on a good many technical points I cannot pretend to detail the knowledge, yet I can demonstrate some of the more important general principles it will clear the way for acquiring more particular information hereafter.

(1) The company is undoubtedly wise not to attempt to rival the two great West India fruit companies, viz., the United Fruit Company of New York and Boston, and the Guano and Guano Company of England. If it succeeds it will probably proceed to have its own line of steamships, and will undoubtedly on the safe side to content itself with producing the fruit. It is also wise in the choice of districts for the plantations. The north-west end of Jamaica has some of the richest soils on the island, and some of the best cultivation in other lines of agriculture. But it has a little less than the south, and the company has chosen the best of the two. The north-west end is the best of the two, and the company has chosen the best of the two. The north-west end is the best of the two, and the company has chosen the best of the two.

(2) As to the two lines of cultivation, viz., bananas and coconuts, they are alike easy of production, and require little capital in the way of land, and in the way of labor. The company has chosen the best of the two, and the company has chosen the best of the two.

(3) The general advantages of a company of this kind are many. It is a company of this kind, and it is a company of this kind. It is a company of this kind, and it is a company of this kind.

(4) The general advantages of a company of this kind are many. It is a company of this kind, and it is a company of this kind. It is a company of this kind, and it is a company of this kind.

(5) The general advantages of a company of this kind are many. It is a company of this kind, and it is a company of this kind. It is a company of this kind, and it is a company of this kind.

(6) The general advantages of a company of this kind are many. It is a company of this kind, and it is a company of this kind. It is a company of this kind, and it is a company of this kind.

(7) The general advantages of a company of this kind are many. It is a company of this kind, and it is a company of this kind. It is a company of this kind, and it is a company of this kind.

(8) The general advantages of a company of this kind are many. It is a company of this kind, and it is a company of this kind. It is a company of this kind, and it is a company of this kind.

(9) The general advantages of a company of this kind are many. It is a company of this kind, and it is a company of this kind. It is a company of this kind, and it is a company of this kind.

(10) The general advantages of a company of this kind are many. It is a company of this kind, and it is a company of this kind. It is a company of this kind, and it is a company of this kind.

(11) The general advantages of a company of this kind are many. It is a company of this kind, and it is a company of this kind. It is a company of this kind, and it is a company of this kind.

JAMAICA

INVESTMENT OF 50 PER CENT. PER ANNUM.

A return of 50 per cent. is not an unusual one in many Tropical Investments, indeed many pay much higher than this, but the public generally are not aware of this fact on account of their limited knowledge of the Tropics.

We have secured land in Jamaica, British West Indies, uniting all desirable features and the highest quality of soil for the cultivation of Cocoa and Bananas, and it is the company's intention to put 1000 acres of this land under the highest state of cultivation in Cocoa and Bananas.

Bananas produce a revenue after the ninth month, and after twenty months will pay \$100 per acre profit. Cocoa will pay \$100 per acre profit after the fifth year. The supply of both Cocoa and Bananas is not equal to the demand, and will not be for many years to come. They are both staple articles of food, and in daily use, with the demand increasing faster than the supply.

Our managers have had over twenty years' experience in the growing and marketing of both Cocoa and Bananas in the Island of Jamaica.

Jamaica is a British colony, with language, laws, politics and institutions distinctly English. The Governors have been the best that Britain can give to her colonies, by which we enjoy guaranteed safety and success.

Exports of Bananas from Jamaica for the year 1903 were:

14,184,375 Bunches, valued at \$5,672,750 or an average of 40 Cents Per Bunch.

Exports of Cocoa for the same year were:

2,524,000 Pounds, Valued at \$328,120.

COCOA AND BANANA culture in Jamaica are both in their infancy, and the next five or six years will see these figures more than doubled. Our lands were specially selected for the cultivation of Cocoa and Bananas, with the best of shipping facilities. The company are offering a limited number of shares of \$100 each, two of which are equivalent to one fully developed acre, paying the second year \$100 profit, or fifty per cent. on the money invested.

A few shares in this company will give a competency for life. Remember, there is no element of speculation about this proposition; no probability of shrinkage in value, or failure of development, as contracts are made to have the property turned over to the company in a fully developed state.

The same are being made on many plantations in Jamaica every year. \$200 invested in this company will give a permanent income of \$100 yearly. Call or write for illustrated booklet and prospectus.

AGENTS WANTED.

JAMAICA COMMERCIAL CO., LIMITED,

73 Adelaide-st. East, Toronto.

G. CAMPBELL ARNOTT, Gen. Manager

PROTECTION FOR MUSKRATS.

Government Prosecuting Man for Illegal Possession of Skins.

Six witnesses must come from North Bay to prove that George Monteth of that place purchased from them muskrat skins, which were taken during the open season. He is being prosecuted by the Ontario government for illegally having them in possession during the closed season. C. H. Ritchie, K. C., proffered affidavits supporting the government's case.

On reading over the law on the evidence the magistrate remarked that it contradicted itself. He said that it was necessary for dealers to take out a license to hold skins in the closed season. Anyone might say that the skins in his possession had been taken during the legal time, but the magistrate thought that others should be permitted to do business without taking them out.

The magistrate thought that the client that all he needed was a certificate from the vendor of the skins. The magistrate thought that the skins were taken during the legal time, but the magistrate thought that others should be permitted to do business without taking them out.

REAL GRANARY OF EMPIRE.

Dr. Saunders Says Canada Can More Than Supply All Needs.

Ottawa, Sept. 22.—Dr. Saunders, director of experimental farms, wires the agricultural department from Brandon that after seeing the large area of land available for wheat growing in the Northwest he must say the crops are immense and the possibilities of wheat-growing in Canada are very great.

He says that the figures given in his pamphlet on wheat-growing are well within the mark. That is to say that the average of Manitoba during the last ten seasons the total crop of the three provinces would be over \$12,000,000. This would be ample to supply the home demand for thirty millions of inhabitants and to satisfy the present need of the world.

In this estimate no account is taken of Eastern Canada.

Dr. Saunders' conclusion, therefore, based upon a sound judgment of the country's possibilities, is that in the early future we will produce grain enough to meet the home consumption, to provide Britain with all the wheat and flour she requires, leaving a surplus also for export to foreign countries.

AN EARLY ELECTION.

Regina, Sept. 21.—(Special.) T. F. Bole was nominated at the Liberal convention here to run against Laird in the local contest. Laird defeated Bole two years ago in a mayoralty election by four votes. Speaking on this occasion Premier Scott indicated that elections would not be long delayed.

Election Trial Dates.

Justice Magee has arranged the place of the Monck election protest from Welland to Toronto, and that of South Ontario from Whitby to this city, both being placed for Oct. 7.

This suggests to indicate that the objection to Richard Harcourt and Charles Calder is a matter of form only.

Dedication of McCall Synagogue.

The McCall-street Methodist Church will be dedicated as a Jewish Synagogue on Sunday at 4 o'clock. Admission is free. The services will be by card only, no one will be admitted without, and parties who have received invitation cards are notified to be in their places not later than 3.30. After 4 o'clock no one will be admitted in the building, as the services commence punctually at four.

Raised in Sections.

Montreal, Sept. 22.—The government steamer Hosanna, which was sunk in the channel just below the harbor a few days ago by the steamer Empire, has been raised in sections.

A Narrow Escape.

A clerk in the assessment department says he heard a 22 bullet whizz past his head in Ashbridge's marsh yesterday.

CULTURED TASTE OF THE NORTHWEST

Striking Evidence of the Refinement and Education of the People of the West.

We are apt to think of the people of the northwest provinces as a rural people lacking in the culture and refinement that is common to older communities.

This is surely a misconception so far, at any rate, as the people of Manitoba and the Northwest Territories are concerned.

Mr. George Heintzman of the old firm of Heintzman & Co
