received the following despatch from New York to-day:

The stock market was enlivened this afternoon by influential buying of Chesapeak & Ohio and Rock Island. Both stocks advanced and the list generally rallied, closing about the best and for gains of day's trading. Outside interest appears to have subsided for the present and trade waiting for further developments. Numerous railroad earnings reported to-day were favorable. C. & O., third week of August, increased 23,000, and Louisville & Nashville for same period gained \$24,000, and Southern \$15,000 gross. For June quarter, Lake Shore shows increase in surplus of \$66,000. Very considerable increase in N. Y.C. earnings is predicted.

McIntyre & Wardwell (John J. Dixon) received the following despatch to-day from Chicago:

Of a Private Nature, as Impotency, Sterility, Varicoccele, Nervous Debility, etc., (the result of youthful folly and excess). Gleet and Stricture of long standing.

DISEASES OF WOMEN — Painful, DISEASES OF WOME

ceived the following despatch to-day from Chicago:

Provisions—Opened strong on buying of September and October ribs by shorts. Outside trade bought October and December pork. Market advances quickly and at the advance packers sold October ribs moderately. Product is now held by strong parties, who will sell higner if grain markets continue strong. Estimated hogs tomorrow 22,000.

Wheat—There was a scramble to buy wheat to-day and in the rush September sold at \$1.03½, and December at 96 cents. The sensational rise in September price was due to a few scattered buying orders and none being offered. The shadow of manipulation has hurt the market considerably; it has not only made local traders very conservative, but driven away outside trade, and, instead of having a large, broad market to-day, it was very small and narrow. Cables were higher early, but speedly quoted advances lost and indicate that foreign markets have lost their tone. There was some selling for foreign account reported at New York and no export business. The speculative situation has not gained strength, and, with prospects of largely increasing receipts in the near future, we think the market will surer some decline. Corn—Market is higher and attracting buying. News from all cources lessens expectations on crop outcome. Probability of damage is a great menace to the plant that has failed in its average progress. The Government gave 1,164,000,000 as farmers' holdings on March 1, 1897, distribution of 17 months preceding averaging 192,000,000 bushels.

Oats—Market's action is nealthy, with other conditions of the mean day average progress. bushels.
Oats—Market's action is nealthy, with buyers more disposed to meet advanced views of sellers. Export sares light.
