

The Bell Piano

The Home Piano

While we build a good proportion of the pianos used by the most eminent artists on concert platforms, **THE BELL PIANO** is essentially the "HOME" PIANO. It is primarily built for home use, and as such stands in an unassailable position in Canada. Ask the men of woman who own one. That is the crucial test of piano merit.

WATCHMAN DOING BETTER.

George Farmer, who well down his cellar Friday night, sustaining serious injury, was reported by the Western Hospital, to which he was conveyed, to be somewhat better Saturday afternoon. Farmer is an employee of Cowan's Limited, and was on his way to attend to the furnace for the night, and, tripping on the stairs, fell heavily, striking his head on the cement floor.

HYDRO POWER IS WANTED UP NORTH

Crowded Meetings Held During Week Preparatory to Voting on Power Bylaws.

GALT'S BENEFITS AIRED

Clean Sweep For Municipal Ownership Bylaw Is Expected by Its Supporters.

NORTH BAY, Nov. 16.—Crowded meetings have been held every night this week at the Royal Theatre preparatory to the voting on the hydro-electric and Nipissing Power Company franchise bylaw. Last night the theatre was packed to the doors when Mayor Scott of Galt spoke at considerable length and enthusiastically of two years' operation by the hydro-electric commission in this town, where the service has been profitable from the start and this year is piling up a big surplus. A clean sweep for the municipal ownership bylaw is expected.

UNTO R. J. BELONGS ALL THE CREDIT

A. C. Lewis, secretary of the harbor commission, stated Saturday that to R. J. Fleming rightly belonged all the bouquets that are being flung at the harbor commission for the new harbor scheme.

"He it was that not only conceived the idea first, but he was the actual pioneer in the putting of the idea into effect. He submitted plans of seawalls, boulevards and such developments. To him is due the credit that Toronto now owns 80 per cent. of the waterfront. His department prepared plans showing the values and owners of the property and began a systematic purchase of it. Give him credit."

CONT. MCCARTHY WILL NOT RUN

Controller McCarthy on Saturday stated definitely that he would not be a candidate for re-election. The controller gives as a reason that the position of a controller is utterly destructive to a man's private business. "I like the work and would be glad to concentrate my energies on civic affairs," declared he, "but I have decided to retire from municipal life."

This Distinctive Elegance Now Possible at \$4200

The Secret Behind our Offering of That Which Highest Priced Limousines Afford—How \$1750 is Saved

THERE is no waste or unnecessary extravagance in the HUDSON limousines and coupes, yet these cars embody in every particular the same rich luxuriousness and distinctiveness for which makers of 1000 to 2000 cars—and we know of but one whose output has reached the latter figure—must charge you from \$5000 to \$6000.

There is a sound commercial reason for securing such luxuriousness as they build at \$1750 less. The secret lies in this fact:

We build 10,000 cars this year. The maker of the \$5000 and \$6000 limousine builds less than 2000 pleasure cars.

We buy materials in from five to ten times the quantities he does. On some of the parts of these cars we need pay only half of what he pays, though we get identically the same things. It is not wonderful then that for approximately \$1750 less you can get the same thing in the New HUDSON "37" limousine that last year you were forced to pay \$6000 for.

Creators of \$5000 Cars

RECOGNIZED artists in designing beautiful bodies—men who created \$5000 and \$6000 closed cars—were employed to construct the HUDSON limousines and coupes.

And the mechanical perfection of the car is made certain by the fact that it is the creation of 48 picked engineers from 97 famous factories of the world. These men had a hand in building over 200,000 automobiles. They worked under the direction of Howard E. Coffin, America's foremost designer—the man who created six cars, more than any other engineer, and never built a failure.

Our closed cars are electrically self-cranked. They are electrically lighted, and have a full complement of lamps, consisting of beautiful dome lights, running board illuminators, head lights and side lights.

YOUR FACE IN FIRE

It Costs About \$100 For a Two-Minute Blaze.

It is said that in all the world there are only fifteen real masters of the art of mixing fireworks. These "ool-or-mixers," as they are called, are nearly all Englishmen. From generation to generation their secrets are handed down by word of mouth, but never in any circumstances committed to writing.

Some few years ago a new firm of able and experienced men was formed to manufacture fireworks. Their first proceeding was to approach their collector-mixer, and suggest that his recipes should be written out and locked up in their safe. He stared at them a moment incredulously, then simply burst into laughter.

The curious thing is that chemical analysis has entirely failed to reveal these secrets, and that a chemist has lost hair and eyebrows, to say nothing of incurring more damage, in the vain attempt to search out the hidden ingredients and formulas of the masters of the pyrotechnic art.

The firework experts boldly assert that nothing in the way of set pieces is beyond them. They will give you "The Destruction of Pompeii" or "The Falls of Niagara" with equal confidence. It is only a question of money.

Portraits in fire of well-known personages are always popular. If you wish to see your own face in fire on a big scale—say twenty feet by twenty—you can have that satisfaction at a cost of about \$100. It will last for nearly two weeks, and it is for yourself to judge whether it is worth the money.

As everyone knows, fireworks can be had at all prices and in all sizes. The largest individual fireworks are giant bombs, five feet in diameter, which are fired from a mortar weighing a ton and a half. These monsters cost some \$75 a piece, and will last for about half a minute.

For its size, the most expensive fireworks is the "hanging chain" rocket. It contains a parachute and some two hundred feet of cord. To the cord are attached at intervals cases which burn like balls of fire. The effect is that of a chain of flaming balls suspended in mid-air.

It is a most difficult matter to pack the parachute and cord so that neither will be set afire when the rocket bursts, and it requires still greater skill to arrange the cord so that it will not tangle as it drops, and so that the cases will be fired in their regular order. Rockets of this type cost ten dollars apiece and upwards.

Firework-making is one of the very few industries in which machinery plays hardly any part. Practically everything is done by hand, and the dexterity of the workers—many of whom are girls—is almost marvellous. The pleasure-seekers, givers of coming-of-age parties, organizers of festivals of public rejoicing—these are the usual patrons of the firework-makers. The lighter side preponderates with fireworks, but there is a serious point of view—the rockets used on board ships, those employed in saving life at sea, and those used for the humble purpose of testing drains.

COPELAND'S CURE FOR CONSUMPTION IT NEVER FAILS

Dear Mr. Copeland: I have enclosed five dollars for another supply of your medicine. Consumption has been a terrible trial to me for seven years. This last two years it has been bad. The doctors told me one of my lungs was affected. I have not done a day's work for over a year, but I am getting better and brighter. Please send the medicine by return so I will get it Saturday, and oblige.

Yours sincerely, James A. Watt, Huron, Ont.

A WORD IN SEASON

A cough or cold is nothing—until neglected. Once the vitality runs down inherent weakness has its chance to gain in power. Then, what there is no other medicine on the market today which has achieved such a wonderful record of its power to cure and heal as COPELAND'S CURE FOR CONSUMPTION. Given to the public but one short year ago—it has conquered cases upon cases and specialists despaired of a cure. Of bleeding lungs, the stories of sufferers themselves are a revelation of what this medicine can do. Prevention is better than cure, and in the interests of yourself, family and relatives, you should make a point to always have a bottle on hand.

Prof. Mulveney's Tape Worm Cure

Say Have You Heard of Prof. R. L. Mulveney's World's Famous TAPE WORM CURE

Tape worm is bred from a parasite. This parasite is a creature male and female in one. It is of pear shape, having two, four and six suckers. It lays the eggs, which are only connected together with slime. They develop and form a body, which is the worm. Each joint is an individual, having a sucker or mouth. The worm grows to be much longer than the bowels where it is located, and sometimes a whole colony of them are found enough to fill a quart of solid worm, and when put in a bucket of water would apparently fill it. It is the hardest task in the world to destroy this parasite without doing injury to the individual who may be so unfortunate as to have it, as the parasite clings to the bowels, freeing itself from the body of the worm, and remains there to breed another. It is an internal demon and causes its victim to suffer all the symptoms of disease imaginable. The cleverest physicians are led to believe the patient is suffering from some other disease, as nearly every person has different symptoms. Some have been treated for cancer of the bowels, consumption of the bowels, consumption of the lungs, chronic dyspepsia, nervous prostration, melancholia, hypochondria, hysteria, inflammation of bowels, appendicitis and other complaints, when one or more of these internal demons were eating their lives away.

Prof. Mulveney has made the discovery to free the victim of this monster without injury to the system, destroying the parasite as well as expelling the worm with one dose of medicine without any previous starvation. Visit his office, where he has in his possession the most wonderful collection of these death-dealing monsters in the world, which have been expelled from hundreds of people by his famous remedy, some bottles containing colonies of worms, and any one seeing them cannot imagine how a person could possibly live with them in his bowels. It is surprising the number of people that have them. Thousands have them and are not aware of the fact. The letters and testimonials the Professor has in his possession are enough to convince us of this alarming fact. Some of the most prominent symptoms are ravenous appetite, dizzy spells, headaches, cramps in the bowels, a feeling of something moving in the bowels, all so a feeling as though something was crawling up the throat. The certainty of having one in the system, when segments or joints are seen, comes away almost any time. They are flat and from 3-4 of an inch to 1 inch long, which have often been mistaken for pin worms by those who do not know the difference. There are many other feelings of distress which would take too long to enumerate. Strange to say, some people of strong constitution have very little distress.

Tape Worm Exterminator is safe, sure and harmless. No starvation, no danger, is not disagreeable to take. One dose nearly always effects a cure. Further information free. Send stamped envelope or call at 167 Dundas street. Prof. R. L. Mulveney, Toronto, Ont.

Prof. Mulveney examining the head of Tape Worm expelled from Mr. Charles Jenkins's system by one dose of his famous cure. Other part of worm in a bottle on the table.

Toronto, October 9, 1912.

Dear Sir: This is to certify that we have used Prof. Mulveney's World Famous Tape Worm Cure, which expelled a monster tapeworm from my husband in one hour, without any previous starving and without sickness or loss of time. Mr. Jenkins had been treated on two different occasions for heart disease in the hospital. The second time the doctor discovered he had a tapeworm, for which he was treated, without success. After being out of the hospital for several months and still suffering and in a most miserable condition, I decided that if something was not done he would surely die, so I made up my mind to try the hospital again. I had the necessary papers made out for his admittance for 14 days to be treated for tapeworm, when we were recommended to try Prof. Mulveney's wonderful cure. We started for 167 Dundas street, and it took all the strength my husband could muster to get there, as he was suffering from terrible weakness and shortness of breath. We arrived and were soon convinced that we had reached the right place, as the pro-

fessor has hundreds of these horrid monsters in bottles, together with many testimonials from those who were so fortunate as to be relieved of them. After seeing the wonderful work the professor had done, we decided to try his remedy, which we took home and used with most gratifying results. It expelled the monster, which is about 30 feet long in one hour, and the head and all was plain to be seen. One can hardly imagine our great joy, for it was like a resurrection to life for both of us to see the annihilation of the monster that was the cause of the trouble. Mr. Jenkins had been suffering for the last three years and was constantly treated, without relief. I am sure this medicine is a blessing from God, and Prof. Mulveney is a life-saver and public benefactor. We do not hesitate in recommending his remedy to others. Words would fail to express our gratitude, and I am sure we wish the professor a long life of happiness and continued success in the wonderful work he is doing.

Mrs. Charles Jenkins, 311 Parliament street.
