

THE
Faculty of Medicine.

OF THE

UNIVERSITY OF BISHOP'S COLLEGE.

The eighteenth session of this Faculty will commence on Tuesday, the second day of October, 1888, and will be continued regularly until the end of March, the usual Christmas vacation intervening.

Having every facility for imparting a thorough practical medical education, this Faculty possesses equal advantages with any other school of medicine in Canada, and in respect of Obstetrics its advantages are in many respects superior.

The General Hospital and Dispensaries afford every opportunity to students of this College to receive clinical instruction in medicine and surgery. At the Western Hospital special advantages are afforded for the practical study of Obstetrics and Gynecology.

The College building contains three large lecture rooms, several smaller lecture rooms for Practical Chemistry, Histology, etc., and a large, airy, well-lighted dissecting-room at the top of the building, isolated from the rest of the class-rooms. Under the new Anatomy Act of the Province of Quebec, ample material for dissection is provided at a moderate rate.

The Histological Laboratory has during the past year been supplied with a number of new Microscopes, and also a complete outfit of Bacteriological apparatus.

This Faculty is recognized by the Royal College of Surgeons, England, and the Royal College of Physicians, London. Class tickets for the various courses are accepted by these Colleges as qualifying candidates for examination. The Royal College of Physicians of Edinburgh, the Royal College of Surgeons of Edinburgh, and the Faculty of Physicians and Surgeons of Glasgow also accept the class tickets of Bishop's College, and the Diploma of this University exempts its owner from being examined on the subjects of the Primary branches and Matriculation. Such candidates are therefore only required to
