means whereby he may appear to be gaining great triumphs, even though the substance may be lacking. By virtue of his own report and his own editorial comment in the Sentinel he won a great success at Kamloops thus showing himself capable of achievements far beyond the powers of other premiers. Though this triumph was quite unique in its own line it was well paralelled in another line by the delicate manipulation which secured Mr. Davie an invitation to open the fair at Chilliwack and gave the organs an opportunity to represent him as overwhelmen with popular favor there. That was a well planned affair. But it seems that both these schemes are overshadowed by the plan taken to gain the premier an advantage at Vernon. The Vernon correspondent of the Columbian describes it in this way: "It has leaked out that Premier Davie obtained his invitation to open the Vernon fair in a very peculiar, but not uncharacteristic way. Mr. F. S. Barnard, M. P., it is stated on indisputable authority, unformed some of the society per cent, is said to be the ideal tariff officers that if they did not invite Mr. Davie to open the fair he (Mr. Barnard) would withdraw his \$25 donation, and the president finally, on his own authority, issued the invitation. As stoted before, the premier's reception was a very chilly one." This scheme may be safely recommended to statesmen generally. We have heard of many odd and original dodges in connection with politics, but none of them could come up to this in point of eccentricity. It is a little strange, however, that the organs failed in getting up a popular welcome at Vernon for premier. Perhaps they were .too much startled by the display of inventiveness by which the invitation was secured to indulge in their usual gyra-

THE SENATE'S DELAY.

There can surely be no fault found with the action of the majority in the U. S. senate in endeavoring to bring the question of silver coinage repeal to a vote. While the minority should be given every fair opportunity of making a fight for its opinions, the "filibuster ing" in the senate seems to the impartial observer a decided stretching of the minority's privileges, and the resort to continuous sessions is only a mild way of meeting the obstructionist tactics. If the senate and the house are to be considered at all representative of the people, then the popular voice in the United States is decidedly for repeal of the Sherman silver purchase act. There are many indications, apart from the position of congress, that the people strongly incline in this direction. The mere fact that the passage of the repeal bill by the house was promptly followed by a return of confidence in financial and commercial circles and a general improvement in the business situation shows that repeal was much wanted. But a minority in the senate has been able to block the movement and run the country into danger of a second collapse. The people will be apt to conclude from this that the minority has too much power, and that the situation calls for a more severe remedy than night suttings of the senate. The friends of free sil- Belyea said, it would have been better if ver say they see many signs of a growing demand for bi-metallism, not only in the States but in Britain. THE MINISTERS' VISIT. Apropos of the visit of Ministers Fos-

er and Angers the Winnipeg Tribune says: "Let Manitobans be perfectly frank with the Dominion ministers, who have come here ostensibly for a specific business purpose, and not on a triumphal political tour for the purpose of enthusing the old guard. Almost to a man our people have been complaining of the operation of the tariff, and almost to a man the resolution has been made to bend the utmost efforts in sweeping the curse away. And now that Messrs. Foster and Angers have come to inquire into the matter let us be frank with them: let them be informed in the plainest language possible that Manitobans are heartily sick of the tariff, and will never rest until it is abolished. Let them know that the policy which has so long been pursued towards this country is a mistaken one and that the interests, nay the very existence, of the settler demand that it shall be changed. The greatest care should, therefore, be taken not to give the ministers the impression that the country is satisfied and that it can be relied upon to stand by the tariff at the next election. Now is our time to be honest both with ourselves and the government." This advice may well be taken by British Columbians in their own case. They have more reason even than the Manitobans to complain of the incidence of the present tariff, for it combia is fertile in devising ways and pels them to contribute more than twice as much per head to the customs revenue. people must pay a high tax on many articles of necessity either in the shape of duties or heavy freight charges. It is province should contribute from two or three times as much per head to the revenue as the inhabitants of other provinces. Instead of removing this anomaly the Dominion government has shown itself anxious to aggravate it, as witness Mr. Foster's brilliant stroke when he put a duty on eggs, a tax apparently levelled against this province at the instance of eastern egg dealers. It may be alleged that the amount involved is not large, but that does not lessen the injustice, and this tax serves as a good illustration of the government's present methods. The necessity for a reform should be most earnestly impressed on

means, at Washington, desires to see enacted, with an important extension of the free list in raw materials. Should this aim be realized, and the Canadian government adhere to the determination stated by Sir John Thompson, to accord the same measure to Canada, there would not be much coom for contention over the tariff on the ground taken up by the opposition at Ottawa. As between the two political parties, the tariff question would leave little to contend for. Should Congress pass a tariff on these lines, the United States will, at once, become a formidable competitor with the great manufacturing nations of Europe. With free raw materials for her industries, and free food, she would be in a position to carry on that competition with every chance of success. So long as the United States weighted herself with heavy taxes on raw materials essential to her manufactures, the handicap held her back in the race, and she counted for little in the world's competition. Protection could only aid her in the home market, and even there, competition in the abscence of unlawful combination, not seldom proved ruinous. Free raw materials would once for all release her manufactures from shackles and restrictions which impeded her progress, and give her a start in the race of competition in the markets of the world that nothing else could." If the effect of tariff reform in the States were such as the Monetary Times predicts-and there is little doubt that it would be-the object lessons to Canada would be exceedingly graphic. Not only would Cana dians feel impelled to follow the example of their neighbors; they would want to "go them one better" in the way of reducing duties and securing free raw materials, in the hope of bringing about even better results. Then the Conservative policy would still leave much to

be desired.

The council is not to be congratulated on the result of its dealing with the back and express question. In fact, as Ald no change had been decreed, for the evil is only spread out a tittle instead of being wiped off. We believe Victoria is press wagons. The stranger visitor si Moreover, he finds his nostrils assailed

wondering what sort of civic gov erning body we have. The stranger, course, cannot be expected to know the the majority of our aldermen have et and noses that were intended to be u in spying out and smelling for spe votes and not in search for what is

in the interest of the community large. When this fact is kept in mind the reason for the most of the aldermanic eccentricities is made plain. Then some of the hack champions are honestly suffering from ignorance; they go abroad so seldom that they do not know what usages obtain in modern cities. In any other place the conclusion that hacks should not be at liberty to block up the principal business street would be followed by their removal to a more suitable place; but here the aldermanic intellect is exhausted in the process of reaching the conclusion, and is unequal to the task of finding a remedy for the admitted evil. And thus it is that Governnent street is to be left with the appearance and odor of a neglected horse stable, while visitors are left to wonder whether or no most of our city fathers are in the hack and express business.

Our own "Hansard" is a volume which no one would voluntarily wade through but it is apparently not quite so bad as the official report of the debates congress. Of the latter the St. Paul Pioneer-Press says: "The Congressional Record has long been a symbol for dreariness. But the mammoth editions that are now issued excel in size and aridity the dust heaps of Boffin's Bower, without their contributions to wealth and to poetry. One only gets an idea of the awful avalanche of slush that has fallen on the national capital when he looks at British Columbia is so situated that its the daily editions of this ponderous quarto. Judge of the intellectual and moral desolation to which these crowded sheets point the way. From them we learn that Mr. Teller, during the space of no less than two weeks, contributed remarks connected with the silver question to 38 pages of the Record, and Mr. Stewart to 46. This is what these gentlemen call preserving the freedom of debate and the traditions of the senate, most of these pages being filled with extracts from books and with newspaper clippings. This is the sort of thing that Mr. Voorhees feels so tender toward that he asks the senate to adjourn at about 5:15 each day after an executive session to rest the legs and voices of the filibusters. And for the printing of this refuse the people pay thousands upon thousands every Says the Monetary Times: "Twenty year. > The Colonist boldly asserts that "Mr. Davie neither canvassed for Mr Murphy, nor did he by word or gesture express any preference for any one candidate over the other." How does the Colonist know? Was its editor in company with Mr. Davie all through its Cariboo trip? Statements that come from Cariboo are quite distinct on this point, and we prefer to believe them rather than the organ's frothy denial.

The Colonist repeats its denial that the premier favored Mr. Murphy's candidature in Cariboo-"on the quiet." We have again to ask the Colorist how it knows what Mr. Davie did in Cariboo. Was it with him then, in body or in spirit? Or has it the faculty for divining things? The fact is that our neighbor's denial is quite worthless and will be accepted by nobody except itself.

Definite word has been received from Mr. Laurier that he will not be able to visit this province and the Northwest this year, but that he expects to come next August or September, accompanied by some of the prominent eastern Liberal politicians. British Columbians will regret the postponement of the Liberal leader's visit, but they will be ready to welcome him heartily whenever he comes.

Some days ago, as a result of the coal strike in England, a vessel was charered to take a cargo of 2500 tons of the olack fuel from Montreal to Liverpool. This was not exactly a case of "coals to Newcastle," but was not far off, and it afforded a strong indication of the extent to which the strike had affected business

While they were resting thus inactive, the throng of "plungers" left in complete control moved prices at

their will, and for obvious reasons it was their choice to drive the market up-ward. In the more sober minded of the community there was little discernible but an anxious look. There is not often less of real significance in a rapidly rising market than there was in to-day's. Its story is easily told. No buyer of consequence was bold enough to either buy or sell, consequently the cheaper speculators bought, proposing to sell again later. The Tariff Inquest. The Empire says the tariff conferences led by Mr. Wallace and Mr. Wood are

not like the plebiscite on prohibition This is true. The plebiscite gives ever electo r inOntario the opportunity of ex pressing his opinion on prohibition. Th tariff commissioners gather a few elec ters into a room and tell them what sor of tariff is good for them and how thank ful they ought to be for the present condi tion of affairs.
