

ZIONISTS ARE SEEKING MEN FROM THE U. S.

Good Progress Made in Restoring Holy Land—Power from the Jordan—Arabs Content.

(Copyright, 1920, by Public Ledger Company.)

Paris, Sept. 9.—Morris Margulies, a member of the national executive committee of the American Zionist organization, smiled today on the Holy Land. He gave the Public Ledger details of work accomplished in the Holy Land since it was restored to the Jews by action of the Peace Conference at San Remo last spring. He said:

"American Jews have taken the lead in sending supplies and money, but Great Britain up to now has furnished the majority of officials and workers. Most of the money must come from America, but we also must send men, especially experts. If we wish to reconstruct along modern lines, and not merely to transplant Polish or Russian ghettos.

To Harness Jordan.

"American engineers already are considering the harnessing of the River Jordan which, when accomplished, will supply light and heat for the entire land. Until that is done, industry cannot thrive, for there is no coal, petrol or wood. The country was entirely deforested by the Turks. Also, in the last few months, the American engineer, Mr. Cantor, of Rochester, has begun a complete sewerage system for the city of Jerusalem, where such never existed before.

"In the matter of hygiene, America has taken the lead. The American Zionist Medical Union has already in operation four complete hospitals in Jerusalem, Safed, Joppa and Tiberias; also a nurses' training school, which is the only institution in the world, where all training is done in one Hebrew tongue; and also two orphanages.

"The Arabs are gradually becoming accustomed to Jewish occupation. They have never done anything to develop the country. Therefore, they have nothing, and so cannot say the Jews have taken anything away from them. The Jewish system of paying a daily wage also strikes them as more desirable than the old method of their tribal chieftains, in giving them a percentage of the produce.

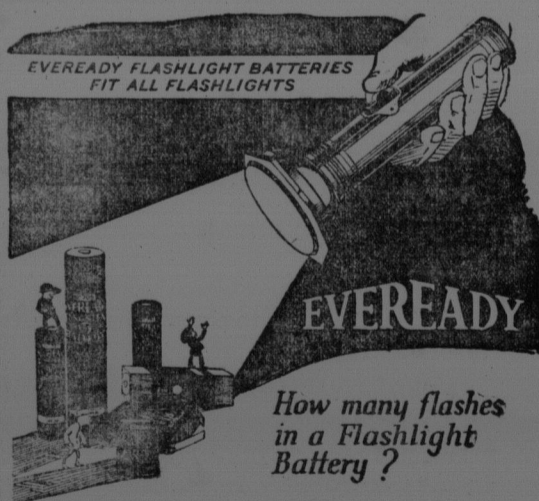

Turk Misrule Apparent.

"Evidence of Turkish misrule are apparent everywhere. So far as the Jews are concerned, the Turks even refused building permits, except for 'stables'—synagogues were registered at Constantinople as 'stables.' Most of the Arab outbreaks nowadays are against each other, rather than against the Jews, and I am sure if we persist in our efforts to reclaim the country, that in fifty years there will be no greater evidences of centuries of Arab occupation than of the Indians in America today.

RUM RUNNER SHOT BUT MADE ESCAPE

Windsor, Ont., Sept. 9.—At least one rum-runner was wounded in a gun fight which took place on the Detroit River opposite Sandwich West, when license inspectors endeavored to stop a boat in which three rum-runners were carrying a supply of liquor to the American side. Orders to stop were disregarded by the smugglers, and when the officers commenced to carry out their threat to fire, the trio of rum-runners showed no hesitation in replying in like manner at close range, maintaining their position until one of their number was hit. They then made a quick run to the American side. Owing to the possession of a high-speed boat, the men escaped.

The man who suffers had luck in the worst kind of a bore.

How many flashes in a Flashlight Battery?

WEEKS and even months of service—a flash for a second or so whenever you want it—a steady stream of brilliant light if you need it—that's the sort of service you demand from a flashlight battery.

Whether you use your flashlight continually or occasionally, insist upon Eveready, the battery that makes all flashlights more reliable.

Fresh, strong Eveready Batteries that fit all Flashlights are waiting for you at Eveready Dealers.

Quality and Service of Eveready Flashlight Batteries are Certified by the dealer, Guaranteed by the maker.

RECOMMEND AN INTERNATIONAL COAL BUREAU

Miners' Federation Favor This Means of Distributing World's Supply to Nations.

(Copyright, 1920, by Public Ledger.)

Washington, Sept. 9.—The 25th international congress of the International Miners' Federation has requested the International Labor office of the League of Nations to undertake to find the best method of establishing an international coal office for the purpose of securing a more equitable distribution of coal throughout the world, according to a statement given out by the international labor office.

Mr. Albert Thomas, director general of the international labor office, who was present at the session during which the creation of an international coal bureau was decided upon, made it clear that the distribution of coal in accordance with the needs of various nations would in no way modify or alter existing agreements arrived at by the treaty of peace or of the Spa conference and that such a task could only be carried out in co-operation with other branches of the League of Nations. He stated, however, that subject to these reservations he was ready to respond to the appeal made by the miners' congress and agreed to bring the matter before the governing body of the international labor office at its meeting on October 6th.

It is thought that such an international coal bureau will eliminate much of the present loss and waste involved by defective organization of distribution and transport of coal throughout the world. This request coming from the first congress to be held by the international miners' federation since the war, is interpreted by officials as indicating the confidence of labor in the international labor organization.

HOLLAND MAKES BIG LOAN TO GERMANY

In Return Germans Agree to Supply 90,000 Tons of Coal Each Month.

(Copyright, 1920, by Cross-Atlantic.)

Berlin, Sept. 9.—The draft of a bill sanctioning a loan to be granted by Holland to Germany has been before the Reichstag. It provides for a loan of 200 million florins at 6 per cent, repayable after ten years. Sixty millions are to be applied towards the purchase of food, the remaining 140 millions to pay for raw material which may be bought in any country. This 140 millions credit is to be perpetually renewed by Holland. In consideration of these facilities Germany agrees to send a monthly minimum of 90,000 tons of coal, briquettes or coke to Holland, such supply to be sent for four years and to be paid for at the international market price.

BRYAN A "DRY," NOT DEMOCRAT ANY MORE

(Public Ledger Service.)

Washington, Sept. 9.—William Jennings Bryan virtually has abandoned the Democratic party. He announced today that he would devote his efforts in the fall campaign to a non-partisan effort to ensure the election of a dry Congress. He refused to discuss Democratic politics. He would not say what part, if any, he would take in the fight to make Governor M. Cox the next President of the United States.

This is the first time since 1896 that the Commoner has declined to inject himself with all of his energy into the campaign in behalf of the party that three times made him its standard-bearer. It bears out his statement made at San Francisco following the nomination that that his "heart is in the grave."

The Miracle Man Said: "Let There Be Business"

And Behold, Record-Breaking Business Came

How they poured into this store—a seething mass of economy seekers. Some came with the "Show me" spirit—they were shown, some came with rapacious appetites for bargains, they bought bounteously, some came out of curiosity to see what marvels a Miracle Man can work—they remained to praise and to profit.

At times the buying overwhelmed us—swept beyond our control but not beyond our resources—reserve forces of salesmen were rushed into action and everyone was served, and satisfied with the greatest apparel money savers that ever hit town. Fine merchandise absolutely below wholesale replacement value today.

And still this carnival of economy goes on—this festival of future values, this banquet of bargains. There will be no halting or relaxation, no retrenchment from the extraordinary value-giving until stock clearance is accomplished. Your chance beckons you, economy urges you not to evade it. Get your share.

But buy these suits for less than we'll pay for equally good values at wholesale for fall.
