CANADIAN FLOUR IS THE BEST.

to supply the home markets as much as possible with the million and a half of cattle, and the seven millions of sheep that are being annually land-ed on his shores. Every year will see less grain growing and more stock-raising in Britain. And here is Canada's chance to step in the gap

Concad's chances to step in the gap vacated by the home farmer. The British public refuse absolutely to be fed with home-made grain. They deny that it makes the best or the most satisfying bread-loaf. Thirty years ago it was the custom in that country to make flour suitable to the public taste, that would give satisfaction to the consumers both in towe and country, by the admix-ture of 75 per cent. of home-made wheats with 25 per cent. of for-eign. In fact, after an ordinar-ily favorable harvest some large country mills, Tavorably situated in good wheat districts, would grind 80 per cent., or even 100 per cent. of native grain. Fifteen years ago the proportion of foreign wheat that a miller would be compelled to use thad increased to one-half, whilst to-day, it is not safe to make flour most satisfying bread-loaf. Thirty

to-day, it is not safe to make flour to make flour to meet the general demand from a mixture containing more than 20 to 25 per cent. of English wheat, and there are mills where even this small proportion has had to be re-duced to 15 per cent. Why This Change?

er is It is because British agriculturists, unlike their Canadian brethren, are not alive to the essential quality of "strength" in their wheat. They do not recognize as Canadian farm-ers do that strength is determined by the presence in wheat of what is known as gluten, and that of the path of duty, defined after right kind. And so to-day Canada is in every sense of the term ".The Granary of the World."

The farmers of Canada know by experience that the Government have their interests at heart, for have not their interests at heart, for have not the farmers full pockets as the result of following their teaching and train-growing the best wheat in the world, as proved by comparisons of analyses. Canadian best patents show wet gluten 34.22, and dry gluten 12.33, as growing 26.17 wet guiden 34.22 and state of canada and all things Cana-dan in the most useful of all callas against 26.17 wet gluten, and dian 9.79 dry gluten, in the best grades ings. dian in the most useful of all call

SOME COLLIERS' SUPERSTITIONS. ****** Much excitement is being caused at Glyncorrwg, in South Wales, by

the statement that the Cymeas coal mine is haunted. Some weeks ago it was whisper-

ed that curious noises were being heard in the mine. Then one day a number of the men said they saw a dove outlined in white against the him to recover. All hope had dark mass of coal behind it. Others vowed that a woman's voice came to them wailing out of a disused

gallery. With one accord the men all struck work. They declare that thesa sounds and apparitions presage dis aster.

Somersetshire miners believe that a kindly spirit sometimes takes the shape of a white rabbit to warn them against impending disaster.

Another warning sign held in spe cial reverence by the Midland min-crs was the sound of the "Seven ers was the sound of the "Seven Whistlers." The origin of this superstition was probably the call

has pointed out that it is not merely a question of open air, but of the training of the sight upon things that are afar off and difficult to see. "Vision," he says, "like every other nerve function, must be cultivated for the attainment of a high degree of excellence. The visual power of London children is not cultivated by their environment. They see the other side of the street in which they live and the carts and omni-buses of the thoroughfares. They scarcely ever have the visual atten-tion directed strongly to any object 1-1-1-10.15 scarcely ever have the visual atten-tion directed strongly to any object which is difficult to see or which subtends a visual angle approaching the limits of visuality; hence the seeing function is never exerted to anything like what should be the extent of its powers. With a coun-try child the case is widely differ-ent.' Mr. Carter would like to see a place given to excellence of vision among the various physical qualifica-tions which are habitually tested by competition and for which prizes are awarded.—The Hospital. "Well, put the brick to soak in the coal oil and go to bed."-Chicago Triview. Minard's Liniment for Rheumatism.

The new popilns and mohairs again to be in such vogue this fall are scarcely to be distinguished from some of the soft-ribbed silks. While retaining their standard merit of durability, the French manufacturers have succeeded in imparting a very beautiful mer-cerized finish to the surface, and,

as the materials are rendered much more soft and pliant by the pro-cess, the requirements of prevail-ing styles in making them up are wholly met.—N. Y. Evening Post. The millinery ornaments which give the finishing touch to ele-gant creations of headwear, as pre-

viously recorded, run this season in rhinestone and cut steel, with some show of mock pearl, and greater favor for cut jet than has been manifested for a couple of years. Large flat cabochons, bars and pins with large heads are the conceits which seem newest in col-lections, some of these showing in device an intermixture of crystal steel and pearl.-The Milliner, Trade Review.

Many of the hats are finished with tulle or lace on the under sides of the brims. One big white hat has the whole top a mass of American Beauty roses. There are the flat as usual, and many low crowns, but the higher crowns talked of have not

made their appearance in this early output of hate Heavy plush ribbons are to be seen on the ribbon counters and on the new hats. The lightest and heavi-est goods are being combined this year. The lightest of tulles and laces,

THE FASHIONS

as well as the heavy fur felts, real furs and plush ribbons, are used.

Braidings of all kinds are in vogue for froggings and tabs, while long tassels in passementeric chenille or crochet cords are used on the fronts crocnet cords are used on the fronts of coats and mantles, or at the back, depending from the shoulders or the point of the fashionable monk's hood. There is no doubt that these long tassels and cords and other pon-

dant trimmings will be greatly in vogue during the early winter.

many kind words are being said of Dodd's Kidney Pills for the wonderful

work they did in Mr. Teeny's case. This remedy has always been re-cognized among the people as a sure cure for Eackache, Rheumatism and all Kidney Troubles, but this is the first case ever reported in this vi-cinity where they have been used with such quick results.

Mr. Teeny himself is very grate-ni to Dodd's Kidney Pills for his happy restoration.

People in and about Sumner have Just about concluded that there is mothing in the way of sickness that Dodd's Kidney Pills will not cure, and only in coal but in tin and othe there is scarcely a home to be found in the neighborhood that does not contain a box of this wonderful medicine.

Men, women and children are finding out every day some new virtues In it, and it is very interesting to hear them get together and comney Pills have done in their various nomen
