

# A Money-Making Satisfying Outfit

The Kind that Makes Good Everywhere—It's a Famous Up-to-the-Minute AULTMAN-TAYLOR

## Just What You Want For 1914

OUR 1914 CATALOG tells you all about the many superior features of construction of AULTMAN-TAYLOR Machinery. It's a book brimful of pointers. It contains just the information you're looking for. Do you want one of these big, new catalogs? If so, use the coupon or drop us a post card.

Get our Catalog—Read it carefully, then let us figure with you on your requirements. If you need an engine, we can furnish you either gas or steam, both of which are leaders in their class. The Aultman-Taylor 30-60 Gas Tractor holds Three World's Records and is without an equal—a tractor that does just what we recommend it to do. If you prefer a steam tractor engine, the Aultman-Taylor Independently Mounted Engine with its Famous Boiler is just what you should have.

How about that new Separator? Sure you have heard about the "New Century." Have you seen it work? It's a dandy. It certainly will pay you to see this wonderful separator before you buy. Its Open Webb Conveyor and Rotary Straw Rack form the greatest combination of separating devices ever used in the construction of a separator—the only perfect system of separation known. Investigate and learn the difference. It has pleased thousands of wide-awake, progressive Canadian Threshermen. It will please you.

We are also builders of the "Matchless" Clover and Alfalfa Huller. The Speediest and cleanest huller in the market. Ask any man who owns one. He can tell you.

By all means get our catalog before you buy. We can save you money.

**INTERNATIONAL HARVESTER COMPANY OF CANADA, Ltd., Canadian Sales Agents for the Famous "New Century" Separator.**
