BUILDINGS AND STOCK SUCH AS ARE FOUND IN THE BEST SECTIONS OF QUEBEC PROVINCE

Good buildings and good stock are characteristic of the farms in some sections of the Eastern Townships of Quebec. Dairying is the basis of this prosperity. The farmers of the district have long been noted as breeders of high class Ayrshire cattle such as are second to none of the breed in America; and intelligent care of high quality dairy stock is a sure forerunner of success in dairy farming. These Quebec men appreciate the position they have attained as dairymen, and in the Interprovincial Dairy Farms Competition conducted by Farm and Dairy, more farms were entered in the Quebec district than in any other. The buildings here illustrated are such as may be found on many Quebec farms.
