No. 1324

Prompt Shipments Assured And Quality Guaranteed

Manufacturers, to-day, are laboring under difficulties, because of the scarcity of materials, shortage of labor and delays in transportation.

Notwithstanding these difficulties, we are able to assure good service, and can make prompt shipments of telephones and telephone materials.

We are maintaining the same high standard of quality in our telephones as we did before the scarcity of materials developed. The instruments we are making to-day are fully capable of sustaining our reputation as makers of the highest class telephones.

Five Bulletins

- The No. 3 tells how to build rural lines.
- The No. 6 describes our rural telephones.
- The No. 5 describes our Presto-Phone Automatic Systems for large factories.
- The No. 7 describes our small private systems for homes, garages, etc.

Everything we sell is guaranteed, and we carry everything required for equipping a complete telephone system, no matter how large or how small.

We are the only INDEPENDENT company manufacturing telephones in Canada for the INDEPENDENT operators, and as such solicit the patronage of all who have the interests of the INDEPENDENT telephone movement at heart.

Our prices are right.
Let us estimate on your requirements during 1918.

Canadian Independent Telephone Co., Limited
