Conserve Fuel and Save Money

By Replacing Your Rail Fence with a Frost Wire Fence

1.—IT IS A PATRIOTIC DUTY. You have seen by the papers that coal is very scarce in many localities this winter, hence wood will have to be used considerably. You intend to replace your rail fence some day with a wire fence, but now is the time you can get the highest price for your rails, and at the same time help out on the important question of fuel.

2.—IT MEANS A SAVING TO YOU. At present prices, your rails will bring more than a new Frost Wire Fence will cost you. Think of the difference in appearance, also of the greater field space a wire fence will leave you for cultivation. A Frost Wire Fence will greatly increase the value of your farm. It will mean the end of the unsightly weeds, ant-hills, etc. that are always associated with a rail or stump fence.

3.—FROST WIRE FENCE IS A PAYING INVESTMENT. It is different and

better than the ordinary wire fences because, in the first place, it is made from Canadian-made wire, specially tempered and galvanized in our own wire mills to suit our rigorous Canadian climate. Secondly, it is woven more slowly than other kinds of wire fence and on improved lines of construction, which result in having every horizontal exactly the same length and every upright perfectly straight and evenly spaced. Note also the Frost tight lock. No other wire lock has yet been produced which can equal it in neatness and security of holding.

The FROST "hold-tight lock"

Help both your Country and Yourself by at once deciding to replace all your wooden fences with the most perfect wire fence you can buy.

If you do not know our nearest dealer's name, write us for particulars.
