

The Advertisement Reproduced Below:

Is appearing now in some of the daily papers. It means that another milestone on the road of progress has been passed by our farmers' company. No farmer needs anyone to tell him just what this, and the co-operative buying of all our farm machinery through **The GGG Co.** will mean to him in dollars and cents. This is the time to consider the **Cause** as well as the **Effect**.

Started seven years ago by farmers to try to properly take care of the marketing of their grain, the Company has, through the commission earned each year on an increasing volume of grain, been able to expand into several different lines.

The **Cause** is just this: "Commission earned by handling farmers' grain." You must pay this commission in some form or other to anyone that may

handle your crop. Surely it seems to be a reasonable argument that you should send your grain through the farmers' own company so that the commission earned in the handling of it may work to your advantage long after the grain has been disposed of. Remember, also, that in selling your grain through the farmers' own company you are sure of getting the very best results obtainable.

*Another
Milestone on
the Road of
Progress!*

The Grain Growers' Grain Co.'s Gas Tractor Demonstrations

TO TAKE PLACE AS FOLLOWS:

BRANDON, FRIDAY AND SATURDAY	OCTOBER 16 AND 17
REGINA, TUESDAY AND WEDNESDAY	OCTOBER 20 AND 21
SASKATOON, SATURDAY AND MONDAY	OCTOBER 24 AND 26
YORKTON, THURSDAY AND FRIDAY	OCTOBER 29 AND 30
HEADINGLY	NOVEMBER 5 AND 6

A combination that will cut the cost of plowing to one-half the cost of horse-power. The Grain Growers' Grain Company Limited has been working for some time on a proposition that will do just what is claimed above, and today their plans are complete. They offer "The Grain Growers' Special" (as the tractor will be known) a three-wheeled, eleven horsepower, draw-bar tractor, has two speeds ahead, 2 and 3 miles per hour, weight 6,000 pounds and is fully warranted to do the work of eight horses in the field. It is manufactured for The Grain Growers' Grain Company by the Minneapolis Steel and Machinery Company, who are the most successful manufacturers in the world of Gas and Oil Tractors. "The Grain Growers' Special" will sell for \$850.00 f.o.b. Winnipeg. With "The Grain Growers' Special" we offer a three-bottom LaCrosse power light tractor plow at the price of \$140.00.

In selling this machine, we are adopting the principle of profit sharing with the purchaser. We are not yet in a position to announce the exact conditions of this plan, but it will take the form of a rebate to each purchaser at the end of the year. The amount of this rebate will depend on the number of machines sold. We are prepared to take orders from now on for spring delivery.

Terms—\$100.00 cash must accompany order, balance C.O.D.

The reason the farmer can buy this machine at a saving of about 100 per cent. compared to any other machine of this kind now on the market is:

- 1st—Because The Grain Growers' Grain Company has been working for some time to reduce tillage costs for the farmer.
- 2nd—Because The Grain Growers' Grain Company's Co-operative method of selling means the very smallest expense in distribution.
- 3rd—Because it is spot cash—no expense in collecting.
- 4th—Because the volume of business, that is bound to come with this great reduction in price, lowers the cost of manufacture.

To prove the above statements you only need to see this machine. Come and give us a boost at each point.
